Attempt to Contact Prescribing Practitioner Tracking Sheet

Pharmacists: Make sure to keep this in patient file

353.20.2- Limitation on Refill Dosage – Professional Judgement – Dispense without a Prescription- Opioid Prescription

C. 1. A pharmacist may dispense without a prescription one or more devices or medications as medically necessary to prevent the death of or serious harm to the health of a patient. If the following conditions are met:

a. the pharmacy which the pharmacist owns or at which the pharmacist is employed has a current record of a prescription for the medication or device prescribed in the name of the patient who is requesting it, but the prescription has expired and a refill requires authorization from the licensed practitioner who issued the prescription and neither the patient nor the pharmacist was able to obtain the refill after reasonable attempts were made to obtain such refill and the pharmacist documents such attempts on a form prescribed by the State Board of Pharmacy.
