

## Supply Chain Security Standard

### Introduction

Globalization of world economies has intensified the need for supply chain security beyond the physical threat. With the rapid advancement and sophistication of technology, cyber threats now pose significant risk to supply chain security, as well. The United States federal government maintains a list of equipment and services that pose a threat to national security. The risks posed by these data security threats include but are not limited to unauthorized access to the state network, sensitive state data and individual personal data.

To increase security to the State of Oklahoma, OMES prohibits the use or acquisition of services and products from these organizations, or any of these organizations' predecessors, successors, parents, subsidiaries or affiliates, that are named on the Federal Communications Commission's threat list.

### Purpose

This document provides guidance on excluding certain services, products or suppliers identified on the national security threat list.

### Standard

OMES prohibits the use or acquisition of any services or products from suppliers or subsidiaries:

- on the FCC national security threat list;
- located in, or have close ties to, a country or regime that has current sanctions levied against them by the U.S. or their allies.

### Compliance

This standard shall take effect upon publication and is made pursuant to Title 62 O.S. §§ 34.11.1 and 34.12 and Title 62 O.S. § 35.8. OMES IS may amend and publish the amended standards policies and standards at any time. Compliance is expected with all published policies and standards, and any published amendments thereof. Employees found in violation of this standard may be subject to disciplinary action, up to and including termination.

### Rationale

To coordinate and require central approval of state agency information technology purchases and projects to enable the chief information officer to assess the needs and capabilities of state agencies as well as streamline and consolidate systems to ensure that the state delivers essential public services to its citizens in the most efficient manner at the lowest possible cost to taxpayers.
