

Oklahoma Overdose and 2013 Drug Law (Pre-training)

Date _____

of years as a law enforcement officer _____

of years as a Tulsa law enforcement officer _____

We'd like to ask about your experience with serious heroin or opiate pain medication overdoses. In such an overdose:

- A person's skin, lips, or fingers turn blue;
- They stop breathing, or breath really slowly; or
- They nod off and CAN'T be woken up without medical intervention (e.g., CPR, opiate-antidote Narcan or naloxone)

1) When was the last time you were at the scene of a serious heroin or opiate pain medication overdose? (check one)

- Within the past 12 months
- More than a year ago
- Never

2) What do you think about law enforcement officials being authorized to administer Narcan/naloxone without a prescription? (check one)

- Strongly support
- Somewhat support
- Neutral
- Somewhat against
- Strongly against
- Don't know

Why? _____

3) How willing are you to administer Narcan/naloxone to an overdose victim? (check one)

- Very willing
- Somewhat willing
- Not very willing
- Definitely would not
- Don't know

4) In your experience, how often are police present at the scene of an overdose? (check one)

- Always
- Usually
- Sometimes
- Rarely
- Never

5) How important do you think it is for police to be at the scene of an overdose for the purpose of keeping medical personnel safe? (check one)

- Very important
- Somewhat important
- Not very important
- Not important at all
- Don't know

6) How important do you think it is for police to be at the scene of an overdose for the purpose of enforcing laws? (check one)

- Very important
- Somewhat important
- Not very important
- Not important at all
- Don't know

Please provide any other comments you would like:
