

Focused Field of Study

Oklahoma Academic Standards Assurance

The Oklahoma State Department of Career and Technology Education (ODCTE) believes that each of its programs must develop an industry and community specific curriculum for all courses in a college/career ready pathway. The Focused Field of Study STEM pathways prepare secondary students to be successful at the college level.

The ODCTE-STEM Focused Field of Study programs use mathematics and science courses aligned to the most current Oklahoma Academic Standards to ensure rigorous advanced level instruction.
