Submitted to (Administrator of Community	Correcti	ons or D	esignee):		
Forward this report with corrective action to the	Environm	ental Hea	Ith and Sa	afety unit and administrator of Probation and		
Parole Services.						
I. Chemicals						
	Yes	No	N/A	Comments		
Each chemical has a SDS and it must be						
located in each place where chemicals are						
stored.						
Chemicals are disposed of in accordance						
with the manufacturer's SDS.						
The inventory log is updated continuously.						
All bottles are labeled with the correct						
chemical.						
Chemicals are stored appropriately (special						
storage for flammables in flammable						
cabinet).						
U 04						
II. Storage		T				
	Yes	No	N/A	Comments		
Storage is 24" from ceiling when there is no						
fire suppression system.						
Storage is 18" from the fire sprinkler head						
when there is a fire suppression system.						
III. Fire Extinguishers						
	Yes	No	N/A	Comments		
Extinguishers are in designated locations as						
reflected on the Evacuation Plan.						
Annual inspection and tag by a licensed fire						
service current.						
Checked and signed monthly, fully charged-						
(in green area).						
Zip tie with tag attached and pin.						
There is no physical damage, corrosion,						
leakage, or clogged nozzle.						
Three foot clearance around and in front of						
extinguisher.						
Mounted on wall.						
Access/visibility is not obstructed.						
N/ 0-5-4-10						
IV. Safety/Sanitation	V ·		N1/A	2		
	Yes	No	N/A	Comments		
Each area has an evacuation plan that						
represents the correct exits, both primary						
and secondary, and is mounted/placed in						
the orientation of the location (overhead or						
garage doors cannot be a designated exit).						
"You are here" is clearly marked on the						
evacuation map. Exits are marked with a sign with letters that						
are at least 6".						
Emergency lights work (push test button and						
ensure lights illuminate exit path).						
Entry and exit paths are not blocked.						
Exit doors and stairways are not blocked.						
Stair treads are in good condition and						
stairways have rail barriers or are enclosed.						
Area is clean and free of unused/abandoned						
equipment/debris.
