

HL7 On-boarding Provider Tip Sheets

- After contacting the HL7 team follow the link given to register a new account in the OSIIS QA site.
 - Follow the link to the QA site and register for a new user account.
 - https://osiis-qa.health.ok.gov/osiis_qa/Login.aspx
- Once the user request is approved login credentials will be sent.
 - Login to the QA site.
 - Find the Onboarding tab on the far left and begin the activities that are listed.
 - Onboarding -> activities
 - The resources tab shares links that may be helpful to completing the onboarding modules.
- Email the OSIIS HL7 inbox when all the activities have been 100% completed.
- **After the onboarding modules are completed, instructions will be sent on how to send real production data messages in the QA site.**
 - **QBP (Immunization History messages will also be tested in the QA endpoint)**
- 2 consecutive weeks' worth of these messages will have to be AA 90% of the time.
 - All require elements must be submitted more than 80% of the time before going to production.
- Once 2 weeks' worth of consecutive clean production data is sent and reviewed the HL7 team will then move your facilities over to the production site.
- Production monitoring
