

Oklahoma SHIP

Oklahoma's 2023–2028 State Health Improvement Plan

Overview

The Oklahoma State Health Improvement Plan (SHIP) is a five-year, systematic plan to address priorities for health improvement as identified by Oklahomans in the [State Health Assessment \(SHA\)](#).

The SHIP describes how the public health system will work together to improve health in Oklahoma.

SHIP stakeholders, partners, and community members use the plan to set shared priorities, direct the use of resources, and develop and implement projects, programs, and policies.

The plan is much more comprehensive than the roles and responsibilities of the health department alone. The SHIP includes the participation of a broad set of stakeholders and partners and reflects the results of a collaborative planning process that includes significant involvement by a variety of sectors.
