OKLAHOMA HEALTH WORKFORCE DATA BOOK

THE 2014-2015 OKLAHOMA HEALTH WORKFORCE DATA BOOK COMPILES INFORMATION FROM OKLAHOMA LICENSURE BOARDS INTO A SINGLE REPOSITORY AND DESCRIBES THE SUPPLY AND DISTRIBUTION OF ACTIVELY PRACTICING INDIVIDUALS IN TWENTY-ONE (21) HEALTH PROFESSIONS BY COUNTY.

THE INTENTION OF THE DATA BOOK IS TO PROVIDE AN EASILY ACCESSIBLE RESOURCE FOR STATE, COUNTY, AND LOCAL PLANNING GROUPS AS THEY ADDRESS HEALTHCARE WORKFORCE NEEDS AND ACCESS ISSUES.

THIS REPORT ALSO INCLUDES INFORMATION ON HEALTH FACILITIES AND MAPS SHOWING HOW EACH OF THESE LICENSED HEALTHCARE PROFESSIONS AND OCCUPATIONS IN THE STATE ARE DISTRIBUTED GEOGRAPHICALLY AND CONCENTRATED RELATIVE TO POPULATION.

THE OKLAHOMA WORKFORCE DATA BOOK IS PRODUCED BY THE OFFICE OF PRIMARY CARE AND RURAL HEALTH DEVELOPMENT, DIVISION OF STATEWIDE ACCESS TO CARE PLANNING, WITHIN THE CENTER FOR HEALTH INNOVATION AND EFFECTIVENESS OF THE OKLAHOMA STATE DEPARTMENT OF HEALTH. THE DATA INCLUDED IN THIS PUBLICATION WAS GATHERED FROM A VARIETY OF SOURCES FROM JUNE 2014 TO MAY 2015.

OKLAHOMA HEALTH WORKFORCE DATA BOOK

EXECUTIVE SUMMARY / INTRODUCTION

The Oklahoma State Department of Health Office of Primary Care and Rural Health Development is located within and under the governance of the Center for Health Innovation and Effectiveness. The Office of Primary Care (OPC) is concentrated in two areas: Statewide Access to Care Planning and Provider Relations, Recruitment, and Retention.

Among the principle responsibilities of the OPC are: to conduct assessments of access to care in Oklahoma; secure federal designations for medically underserved areas and populations (MUA/Ps) and health professional shortage areas (HPSAs) for primary, dental, and mental health care, manage federal certification and outreach processes required for National Health Service Corps loan repayment and scholarship programs, and provide strategic planning and project management for access to care and health workforce initiatives.

The 2014-2015 Oklahoma Health Workforce Data Book

Of the 3,878,051 residents of Oklahoma, almost 36% live in the 59 counties that are federally defined as “rural”.¹

The Census Bureau’s urban-rural classification is fundamentally a delineation of geographical areas, identifying both individual urban areas and the rural areas of the nation. The Census Bureau identifies two types of urban areas: Urbanized Areas of 50,000 or more people; and Urban Clusters of at least 2,500 and less than 50,000 people. “Rural” encompasses all population, housing, and territory not included within an urban area.

The vast majority of Oklahoma counties are designated as HPSAs. Of the state’s 77 counties, 64 are Primary Care HPSAs, 69 are Mental Health Care HPSAs, and 9 are Dental Care HPSAs. Approximately 58.6% of Oklahomans reside in Primary Care HPSAs (2,271,705).²

There are 158 licensed hospitals in Oklahoma: 37 non-profit hospitals; 61 for-profit hospitals; 41 city and/or county-owned hospitals; 7 government-owned hospitals; 2 Veterans Administration hospitals; 2 Indian Health Service Hospitals; 6 tribally-operated hospitals; and 2 Teaching Hospitals (1 state and 1 for-profit).³

The specialty and Critical Access Hospitals are included in other categories: 14 for-profit specialty hospitals; and 34 Critical Access Hospitals.³

Physician shortages in Oklahoma

- Oklahoma Ranks 49th in the nation in primary care providers (United Health Foundation Health Care Rankings) with 80.2 physicians per 100,000 citizens
- According to the American Medical Association, Oklahoma ranks last in the nation in physician to patient ratio
- Oklahoma ranks third lowest among rural states for misdistribution of physicians, with only 184 physicians per 100,000 people
- Only 6 percent of residents nationally desire a rural practice

OKLAHOMA HEALTH WORKFORCE DATA BOOK

FEDERAL SHORTAGE DESIGNATIONS

A federal shortage designation is a way for communities and health care facilities in Oklahoma to establish a need for additional health care professionals and resources. The overall purpose is to identify areas of greatest need, so that limited resources can be prioritized and directed to the people in those areas. This need is evaluated based on criteria set forth by two federal shortage designation programs: Health Professional Shortage Areas and Medically Underserved Areas/Populations. The designations qualify areas for federal and state government programs and/or resources for communities, health care facilities, and providers. Health Professional Shortage Area (HPSA) and Medically Underserved Area (MUA) / Medically Underserved Population (MUP) designations are administered by the federal Health Resources and Services Administration's (HRSA) Shortage Designation Branch.

The Value of a Shortage Designation

Many health care facilities depend on the benefits of a shortage designation to provide access to care for their underserved communities. Numerous federal programs depend on the shortage designation to determine eligibility or funding preference as a way to increase the number of physicians and other health professionals who practice in those designated areas, which include: National Health Service Corps Loan Repayment and Scholarship Programs; Exchange Visitor Program; Conrad State 30 Program (J-1 visa waivers); Health Center Program grants; Rural Health Clinic Program; Medicare HPSA Bonus Payment; Indian Health Service Scholarship Program; Medicare Physician Bonus Program; and the Medicare Surgical Bonus Program. ⁴

HPSA Overview

HPSAs demonstrate a critical shortage of either primary care, dental, or mental health providers, in accordance with the federal HRSA Shortage Designation Branch guidelines.

There are three types of HPSA designations: Primary Care, Dental, and Mental Health. Each type of HPSA is further classified into one of the following categories: geographic, population group, facility, or automatic.

Each HPSA is given a score by the Shortage Designation Branch based on certain specific criteria for each type of HPSA. This score indicates the degree of shortage. HPSA designations are evaluated, and if applicable, re-classified every 3-4 years by HRSA.

Types of HPSAs

Primary Care HPSA: Identifies within an area that there is insufficient access to primary care physicians (M.D. and D.O.) that primarily practice in one of the following specialties: family practice, general practice, internal medicine, pediatrics, OB/GYN, and general geriatrics. A population-to-provider ratio based on the number of provider FTEs (full time equivalents, 1 Full Time Equivalent (FTE) = 40 hours of direct patient care per week) is used to determine eligibility.

FEDERAL SHORTAGE DESIGNATIONS, CONT.

Dental HPSA: Identifies an area's access to dental care. Unlike the Primary Care and Mental Health HPSAs, dental provider FTEs (full time equivalents) are calculated by weighting the number of patient care hours provided by a dentist (general and pediatric) per week by the dentist's age and the number of assistants the dentist employs.

Mental Health HPSA: Identifies an area's access to either psychiatrists only, or core mental health professionals (CMHPs) which include psychiatrists, clinical psychologists, clinical social workers, psychiatric nurse specialists, and marriage and family therapists. Similar to Primary Care and Dental HPSAs, a population-to-provider ratio is used to help determine eligibility. Several different population-to-provider ratios are available for consideration depending on whether the population-to-provider ratios include psychiatrists only or include all CMHPs.

HPSA Sub-Categories: Each type of HPSA must be categorized into one of the following categories. Each category has a different set of qualifying criteria.

Geographic: This designation demonstrates a shortage for the total population of an area. (e.g., if a county has a population-to-provider ratio of greater than 3,500 to 1, the entire county is likely a geographic HPSA).

Population Group: This designation demonstrates a shortage of providers for population groups. A population group must be one of the following:

- Low income populations (greater than 30% of population with incomes at or below 200% of the Federal Poverty Level).
- Migrant and/or seasonal farmworkers and families
- Medicaid-eligible
- Native American/Native Alaskan
- Homeless Populations
- Other populations isolated from access by means of a specified language, cultural barriers, or handicap.

Facility: Facilities can be designated as a HPSA if the facility is located in a Medically Underserved Area (MUA). Facilities that can apply for this designation include community health centers, rural health clinics, federal correctional facilities, and state hospitals. Some of the factors used to evaluate a facility's designation eligibility are outpatient census, wait times, patients' residences, and in-house faculty.

Automatic: All Federally Qualified Health Centers and Rural Health Clinics that provide access to care regardless of ability to pay receive automatic facility HPSA designation.

HPSA Scoring

The federal Shortage Designation Branch calculates a score (0 to 25 for both primary care and mental health, and 0 to 26 for dental) with 25 / 26 representing the highest degree of shortage for each designated HPSA. The score is used to prioritize areas of greatest need for providers including National Health Service Corps placements. Each HPSA application is evaluated and scored based on the criteria listed below.

Primary Care:

- Population-to-provider ratio
- Percent of individuals below 100% of the federal poverty level
- Infant health index (infant mortality rate or low birth weight rate)
- Average travel time or distance to nearest source of non-designated accessible care

Dental:

- Population-to-provider ratio
- Percent of individuals below 100% of the federal poverty level
- Water fluoridation status
- Average travel time or distance to nearest source of non-designated accessible care

Mental Health:

- Population-to-provider ratio
- Percent of individuals below 100% of the federal poverty level
- Youth ratio (ratio of children under 18 to adults ages 18-64)
- Elderly ratio (ratio of adults over 65 to adults ages 18-64)
- Substance abuse prevalence
- Alcohol abuse prevalence
- Average travel time or distance to nearest source of non-designated accessible care

HEALTH PROFESSIONAL SHORTAGE AREAS PROCESS CHART

CRITERIA FOR DETERMINING PRIMARY CARE HPSAs OF GREATEST SHORTAGE

SCORE FOR POPULATION-TO-FULL-TIME-EQUIVALENT PRIMARY CARE PHYSICIAN (PCP) RATIO

RATIO > 10,000:1, OR NO PCPS & POPULATION GE 2500	5 POINTS
10,000:1 > RATIO GE 5,000:1, OR NO PCPS & POPULATION GE 2000	4 POINTS
5,000:1 > RATIO GE 4,000:1, OR NO PCPS & POPULATION GE 1500	3 POINTS
4,000:1 > RATIO GE 3,500:1, OR NO PCPS & POPULATION GE 1000	2 POINTS
3,500:1 > RATIO GE 3,000:1, OR NO PCPS & POPULATION GE 500	1 POINT

NOTE: GE IS DEFINED AS GREATER THAN OR EQUAL TO

NOTE: THESE POINTS ARE DOUBLED IN CALCULATING THE FINAL SCORE.

U.S. Census data on these variables should be used for any service area considered: data on these variables may be calculated for the actual service area rather than the whole county or PCSA of the entity's location, if a more accurate definition of the actual service area is available.

SCORE FOR TRAVEL DISTANCE/TIME TO NEAREST SOURCE OF ACCESSIBLE CARE OUTSIDE THE HPSA

TIME GE 60 MINUTES OR DISTANCE GE 50 MILES	5 POINTS
60 MIN > TIME GE 50 MIN OR 50 MI > DIST GE 40 MI	4 POINTS
50 MIN > TIME GE 40 MIN OR 40 MI > DIST GE 30 MI	3 POINTS
40 MIN > TIME GE 30 MIN OR 30 MI > DIST GE 20 MI	2 POINTS
30 MIN > TIME GE 20 MIN OR 20 MI > DIST GE 10 MI	1 POINT

NEAREST SOURCE OF CARE is defined as the closest location where the residents of the area or population that is designated have access to comprehensive primary care services.

These estimates can be based on use of GIS road classification data. In some cases, they may not accurately reflect the actual time/distance to nearest source of care for the population being reviewed. Local data could be submitted in accordance with the existing HPSA regulations.

INFANT HEALTH INDEX

IMR GE 20 OR LBW GE 13	5 POINTS
20>IMR>18 OR 13>LBW>11	4 POINTS
18>IMR>15 OR 11>LBW>10	3 POINTS
15>IMR>12 OR 10>LBW> 9	2 POINTS
12>IMR>10 OR 9>LBW> 7	1 POINT

INFANT MORTALITY RATE/LOW BIRTH WEIGHT

In most cases, county-level data are the only data available for these birth outcome variables. In urban areas, it may be possible to get more specific data for portions of the county; in order to use such sub-county data, there must be at least 4000 births in the area over a 5-year period.

SCORE FOR % OF POPULATION WITH INCOMES BELOW POVERTY LEVEL (P)

P GE 50%	5 POINTS
50% > P GE 40%	4 POINTS
40% > P GE 30%	3 POINTS
30% > P GE 20%	2 POINTS
20% > P GE 15%	1 POINT

CRITERIA FOR DETERMINING DENTAL CARE HPSAs OF GREATEST SHORTAGE

SCORE FOR POPULATION-TO-FULL-TIME-EQUIVALENT DENTISTS (DDs) RATIO	
RATIO > 10,000:1, OR NO DDs & POPULATION GE 3000	5 POINTS
10,000:1 > RATIO GE 8,000:1, OR NO DDs & POPULATION GE 2500	4 POINTS
5,000:1 > RATIO GE 6,000:1, OR NO DDs & POPULATION GE 2000	3 POINTS
4,000:1 > RATIO GE 5,000:1, OR NO DDs & POPULATION GE 1500	2 POINTS
3,500:1 > RATIO GE 4,000:1, OR NO DDs & POPULATION GE 1000	1 POINT

U.S. Census data on these variables should be used for any service area considered: data on these variables may be calculated for the actual service area rather than the whole county or PCSA of the entity's location, if a more accurate definition of the actual service area is available.

SCORE FOR TRAVEL DISTANCE/TIME TO NEAREST SOURCE OF ACCESSIBLE CARE OUTSIDE THE HPSA	
TIME GE 90 MINUTES OR DISTANCE GE 60 MILES	5 POINTS
90 MIN > TIME GE 75 MIN OR 50 MI > DIST GE 50 MI	4 POINTS
75 MIN > TIME GE 60 MIN OR 40 MI > DIST GE 40 MI	3 POINTS
60 MIN > TIME GE 45 MIN OR 30 MI > DIST GE 30 MI	2 POINTS
45 MIN > TIME GE 30 MIN OR 20 MI > DIST GE 20 MI	1 POINT

NOTE: THESE POINTS ARE DOUBLED IN CALCULATING THE FINAL SCORE.

NEAREST SOURCE OF CARE is defined as the closest location where the residents of the area or population that is designated have access to dental care services.

These estimates can be based on use of GIS road classification data. In some cases, they may not accurately reflect the actual time/distance to nearest source of care for the population being reviewed. Local data could be submitted in accordance with the existing HPSA regulations.

SCORE FOR % OF POPULATION WITH INCOMES BELOW POVERTY LEVEL (P)	
P GE 50%	5 POINTS
50% > P GE 40%	4 POINTS
40% > P GE 30%	3 POINTS
30% > P GE 20%	2 POINTS
20% > P GE 15%	1 POINT

PERCENT OF POPULATION WITH ACCESS TO FLUORIDATED WATER	
< 50%	1 POINT
≥ 50%	0 POINTS

CRITERIA FOR DETERMINING MENTAL HEALTH HPSAs OF GREATEST SHORTAGE

The reporting of the number of psychiatrists present is required in all mental health HPSA applications; the reporting of other mental health professionals is optional. Other mental health professionals include: clinical psychologists, clinical social workers, marriage and family therapists, and psychiatric nurse specialists. Depending upon the data reported, the scales utilize a population-to-psychiatrist ratio and/or a population-to-core mental health provider ratio. [Core mental health providers include psychiatrists and other mental health professionals.] The table below defines the various provider to population ratios and related scores:

SCORE FOR POPULATION-TO-FULL-TIME-EQUIVALENT PROVIDER RATIO			SCORE FOR % OF POPULATION WITH INCOMES BELOW POVERTY LEVEL (P)	
PSYCHIATRIST RATIO	CORE MENTAL HEALTH RATIO	POINTS		
> 45,000:0 AND	> 4,500:0	8 POINTS	P GE 50%	5 POINTS
	> 4,500:1 AND < 6,000:1	7 POINTS	50% > P GE 40%	4 POINTS
< 20,000:1 AND > 15,000:1 AND	> 6,000:1 AND < 9,000:1	6 POINTS	40% > P GE 30%	3 POINTS
< 30,000:1 AND > 15,000:1 OR	> 4,500:1 AND < 6,000:1	5 POINTS	30% > P GE 20%	2 POINTS
< 45,000:1 AND > 20,000:1 AND	> 4,500:0 AND < 6,000:0	4 POINTS	20% > P GE 15%	1 POINT
> 20,000:1 AND	> 6,000:1	3 POINTS		
> 30,000:1		2 POINTS		
	> 9,000:1	1 POINT		

U.S. Census data on these variables should be used for any service area considered: data on these variables may be calculated for the actual service area rather than the whole county or PCSA of the entity's location, if a more accurate definition of the actual service area is available.

SCORES FOR ADDITIONAL FACTORS:

YOUTH RATIO: RATIO OF CHILDREN UNDER 18 TO ADULTS 18-64	
≥ 60%	3 POINTS
<60% AND >40%	2 POINTS
<40% AND >20%	1 POINT

ELDERLY RATIO: RATIO OF ADULTS OVER 65 TO ADULTS 18-64	
≥ 25%	3 POINTS
< 25% AND > 15%	2 POINTS
< 15% AND > 10%	1 POINT

SCORE FOR TRAVEL DISTANCE/TIME TO NEAREST SOURCE OF ACCESSIBLE CARE OUTSIDE THE HPSA	
TIME GE 60 MINUTES	5 POINTS
< 60 MINUTES AND > 50 MINUTES	4 POINTS
< 50 MINUTES AND > 40 MINUTES	3 POINTS
< 40 MINUTES > 30 MINUTES	2 POINTS
< 30 MIN AND > 20 MINUTES	1 POINT

NEAREST SOURCE OF CARE is defined as the closest location where the residents of the area or population that is designated have access to mental health services

These estimates can be based on use of GIS road classification data. In some cases, they may not accurately reflect the actual time/distance to nearest source of care for the population being reviewed. Local data could be submitted in accordance with the existing HPSA regulations.

SUBSTANCE ABUSE PREVALENCE: AREA'S RATE IS IN WORST QUARTILE FOR NATION/REGION/OR STATE	
YES	1 POINT
NO	0 POINTS

ALCOHOL ABUSE PREVALENCE: AREA'S RATE IS IN WORST QUARTILE FOR NATION/REGION/OR STATE	
YES	1 POINT
NO	0 POINTS

Since a larger number of factors are considered in the mental health HPSA scoring methodology, there is no doubling of the weights. The possible points for the population to provider ratio, 8, is greater than for any of the other factors, in recognition of its primary importance as mentioned above. The maximum score is 26.

FEDERAL SHORTAGE DESIGNATIONS, CONT.

Medically Underserved Areas (MUAs) and Populations (MUPs) Overview

A Medically Underserved Area/Population (MUA/P) designation identifies areas or populations with a shortage of health care services. These areas are only applicable for primary health care services and, unlike a HPSA, this type of designation does not expire under current federal guidance. Designation is based on the explanation as to why the area in question is “rational” (similar to the HPSA process) and the documentation of four factors: health care provider-to-population ratio, infant mortality rate, percentage of population below 100% of the federal poverty level, and the percentage of population aged 65 and over.

An MUA/P may apply to whole counties, a group of counties or civil divisions, or a group of urban census tracts. MUPs include groups of persons who face documented economic, cultural, or linguistic barriers to health care.

MUA Designations

An MUA designation involves the application of the Index of Medical Underservice (IMU) to data of a proposed rational service area to obtain a score for the area. The IMU scale is from 0 to 100, where 0 represents completely underserved areas and 100 represents the least underserved areas. Under established criteria, each service area found to have an IMU of 62.0 or less qualifies for designation as an MUA.

The IMU involves four variables: ratio of primary medical care physicians per 1,000 population, infant mortality rate, percentage of the population with incomes below the poverty level, and percentage of the population age 65 or over. The value of each of these variables for the service area is converted to a weighted value, according to established criteria. The four values are summed to obtain the area's IMU score.

The MUA designation process therefore requires the following information:

- (1) Rational service area - Define the proposed service in terms of:
 - (a) a whole county (in non-metropolitan areas);
 - (b) minor civil divisions (MCDs), or census county divisions (CCDs) in non-metropolitan areas, with population centers within 30 minutes travel time of each other;
 - (c) metropolitan areas, a group of census tracts (C.T.s) which represent a neighborhood due to homogeneous socio-economic and demographic characteristics

In addition, for non-single-county service areas, the rationale for the selection of a particular service area definition, in terms of market patterns or composition of population, should be presented. Designation requests should also include a map showing the boundaries of the service area involved and the location of resources within this area.

MUP Designations

An MUP Designation involves application of the IMU to data on an underserved population group within an area of residence to obtain a score for the population group. Population groups eligible for designation are those with economic barriers (low-income or Medicaid-eligible populations), cultural, and/or linguistic access barriers to primary health care services.

The MUP essentially involves the same process and computational steps as stated for MUAs above. The population is now the population of the requested group within an area rather than the total resident civilian population of an area. The total FTEs of primary care physicians would include only those serving the requested population group. The ratio of the total FTE of primary care physicians serving the population group per 1,000 persons in the group is used in determining weighted value. The weighted value for poverty is based on the percent of population with incomes at or below 100% of the federal poverty level in the area of residence for the population group. The weighted values for percent of population age 65 and over and the infant mortality rate would be those for the requested segment of the population in the area of residence, if available and statistically significant; otherwise, these variables for the total resident civilian population in the area should be used. If the total of the weighted values is 62.0 or less, the population group qualifies for designation.

FEDERAL SHORTAGE DESIGNATIONS, CONT.

Governor's Designation

A State Governor can request a designation for an “Exceptional Medically Underserved Population (EMUP)” if a population group does not meet the established MUA/P criteria, but has “unusual local conditions which are a barrier to access to or the availability of personal health services” for the population. The lack of services must be documented and the recommendation for designation must come from the Governor of the State and may include recommendations of other local officials.

CRITERIA FOR DETERMINING MUA/P DESIGNATIONS OF GREATEST SHORTAGE

THIS INVOLVES APPLICATION OF THE INDEX OF MEDICAL UNDERSERVICE (IMU) TO DATA ON A SERVICE AREA TO OBTAIN A SCORE FOR THE AREA. THE IMU SCALE IS FROM 0 TO 100, WHERE 0 REPRESENTS COMPLETELY UNDERSERVED AND 100 REPRESENTS BEST SERVED OR LEAST UNDERSERVED. UNDER THE ESTABLISHED CRITERIA, EACH SERVICE AREA FOUND TO HAVE AN IMU OF 62.0 OR LESS QUALIFIES FOR DESIGNATION AS AN MUA AND MUP.

PERCENTAGE OF POPULATION BELOW POVERTY LEVEL		PERCENTAGE OF POPULATION AGE 65 AND OLDER		INFANT MORTALITY RATE		RATIO OF PRIMARY CARE PHYSICIANS PER 1,000 POPULATION	
PERCENTAGE	POINTS	PERCENTAGE	POINTS	PERCENTAGE	POINTS	PERCENTAGE	POINTS
0	25.1	0 - 7.0	20.2	0-8	26.0	0 - .050	0
0.1 - 2.0	24.6	7.1 - 8.0	20.1	8.1 - 9.0	25.6	.051 - .100	0.5

MUA vs. MUP DESIGNATION USING IMU MEASURES

- MUAs are calculated using the criteria above for the entire population of the area being considered.
- MUPs are calculated using the criteria above for a subset of the population with significant economic barriers, such as low-income or Medicaid-eligible populations, or those who experience cultural and/or linguistic access barriers to primary medical care services.

STATE OF OKLAHOMA

POPULATION: 3,878,051 — LAND AREA: 68,594.99 SQ. MILES

HEALTH PROFESSIONAL SHORTAGE AREAS (HPSAS):

PRIMARY CARE: 64 COUNTIES

MENTAL HEALTH CARE: 69 COUNTIES

DENTAL CARE: 9 COUNTIES

MEDICALLY UNDERSERVED AREA/POPULATIONS (MUA/PS): 66 COUNTIES

PHYSICIANS	NUM.
PHYSICIANS (D.O. AND M.D.)	7,838
<i>RATE PER 10,000 POPULATION</i>	20.36
OSTEOPATHIC PHYSICIANS (D.O.)	1,619
ALLOPATHIC PHYSICIANS (M.D.)	6,219
PRIMARY CARE PHYSICIANS	3,642
<i>RATE PER 10,000 POPULATION</i>	9.46
FAMILY / GEN. PRACTICE PHYSICIANS	1,684
INTERNAL MEDICINE PHYSICIANS	1,116
PEDIATRIC PHYSICIANS	490
OB-GYN PHYSICIANS	352

ADULT CRISIS CENTERS	12
RETAIL PHARMACIES	950
NUMBER OF HOSPITAL BEDS	13,687
NUMBER OF NURSING HOME BEDS	26,534

OKLAHOMA HEALTH WORKFORCE RANKINGS BY COUNTY

County Comparisons & Rankings

In this Workforce Data Book, county comparisons on population values are noted at the top of each county's page in the row titled *Population Rank*. Similarly, comparisons are made as to the type and amount of health professionals across counties, which are ranked according to the amount or rate of selected health professionals that are currently practicing within a county's boundaries.

Healthcare facilities are not ranked for their quantities or rates per population.

County Ranks for Health Professionals

Throughout the Health Workforce Data Book, county rankings are presented adjacent to the numbers for the listed health professionals. For example, the total number of primary care physicians for each county is presented, and each county receives a rank based on the size of this value, where the county with the greatest number of primary care physicians is ranked highest, as "1" (Oklahoma County: 1,156) and the county with the least primary care physicians is ranked lowest, as "77" (Grant County: 0).

County Rank "Ties" of Health Professionals

There are instances where multiple counties contain the same number of health professionals in a given category. In these instances, the rank assigned for that category is listed as a "tie" and all counties with the same value will have the same rank. Counties that have ties for rank occupy more than one position, meaning that the next unique ranking in the series can vary. For example, Roger Mills County and Washita County have the same number of primary care physicians (2) practicing within their boundaries, and therefore are "tied" for the 69th position in the ranking. The next rank in the series will occupy the 71st position.

All counties with no health professionals practicing in a given category have a value of '0' for the health professional amount and rate per population. Multiple counties with a value of '0' "tied" for the same position for that health professional category. This position represents the least number of health professionals (or health professionals per 10,000 people) in the state, for the category being measured. The actual rank value for this "last" position can vary with each health professional category, because there are different numbers of unique and "tied" values, which will influence the relative positioning.

Additional information on the county rankings is included in Appendix A: *Ranking Methodology*.

DENTAL HEALTH PROFESSIONAL SHORTAGE AREAS

HEALTH PROFESSIONAL SHORTAGE AREA (HPSA) DESIGNATIONS ARE USED BY THE FEDERAL HEALTH RESOURCES AND SERVICES ADMINISTRATION TO IDENTIFY AREAS AND POPULATION GROUPS WITHIN OKLAHOMA THAT EXPERIENCE A SHORTAGE OF PROFESSIONALS IN THREE HEALTH DISCIPLINES: PRIMARY CARE, MENTAL HEALTH CARE, AND DENTAL CARE.

DATA SOURCE: OKLAHOMA STATE DEPARTMENT OF HEALTH – OFFICE OF PRIMARY CARE

PROJECTION/COORDINATE SYSTEM: USGS ALBERS EQUAL AREA CONIC

OFFICE OF PRIMARY CARE AND RURAL HEALTH DEVELOPMENT
 CENTER FOR HEALTH INNOVATION AND EFFECTIVENESS
 OKLAHOMA STATE DEPARTMENT OF HEALTH

MEDICALLY UNDERSERVED AREAS & POPULATIONS (MUA/PS)

A MEDICALLY UNDERSERVED AREA/POPULATION DESIGNATION IDENTIFIES AREAS OR POPULATIONS WITH A SHORTAGE OF HEALTH CARE SERVICES. THESE AREAS ARE ONLY APPLICABLE FOR PRIMARY HEALTH CARE SERVICES AND, UNLIKE A HPSA, THIS TYPE OF DESIGNATION DOES NOT EXPIRE UNDER CURRENT FEDERAL GUIDANCE. DESIGNATION IS BASED ON THE EXPLANATION AS TO WHY THE AREA IN QUESTION IS “RATIONAL” (SIMILAR TO THE HPSA PROCESS) AND THE DOCUMENTATION OF FOUR FACTORS; HEALTH CARE PROVIDER-TO-POPULATION RATIO, INFANT MORTALITY RATE, PERCENTAGE OF POPULATION BELOW 100% OF THE FEDERAL POVERTY LEVEL, AND THE PERCENTAGE OF POPULATION AGED 65 AND OVER.

AN MUA/P MAY APPLY TO WHOLE COUNTIES, A GROUP OF COUNTIES OR CIVIL DIVISIONS, OR A GROUP OF URBAN CENSUS TRACTS. THE MUP INCLUDES GROUPS OF PERSONS WHO FACE DOCUMENTED ECONOMIC, CULTURAL, OR LINGUISTIC BARRIERS TO HEALTH CARE.

DATA SOURCE: OKLAHOMA STATE DEPARTMENT OF HEALTH – OFFICE OF PRIMARY CARE

OKLAHOMA HEALTH PROFESSIONALS BY OCCUPATION

PHYSICIANS (D.O. & M.D.)

THE NUMBER OF PHYSICIANS FOR EACH COUNTY INCLUDES ALL D.O. OR M.D. NON-RESIDENT, FULLY LICENSED PHYSICIANS THAT PRACTICE IN ANY SPECIALTIES.

PROJECTION/COORDINATE SYSTEM: USGS ALBERS EQUAL AREA CONIC

OFFICE OF PRIMARY CARE AND RURAL HEALTH DEVELOPMENT
CENTER FOR HEALTH INNOVATION AND EFFECTIVENESS
OKLAHOMA STATE DEPARTMENT OF HEALTH

PRIMARY CARE PHYSICIANS (PCPs)

THE NUMBER OF PRIMARY CARE PHYSICIANS FOR EACH COUNTY INCLUDES ALL D.O. OR M.D. NON-RESIDENT, FULLY LICENSED PHYSICIANS THAT PRACTICE IN ANY OF THE FOLLOWING SPECIALTIES: FAMILY/GENERAL PRACTICE, INTERNAL MEDICINE, OBSTETRICS AND GYNECOLOGY (OB/GYN), GENERAL GERIATRICS, AND PEDIATRICS. PHYSICIANS WHO WERE BOARD-CERTIFIED IN A PRIMARY CARE SPECIALTY AND AN ADDITIONAL NON-PRIMARY CARE SPECIALTY WERE EXCLUDED FROM THE PRIMARY CARE PHYSICIANS SUB-GROUP COUNT AND RATE PER 10,000 POPULATION.

PROJECTION/COORDINATE SYSTEM: USGS ALBERS EQUAL AREA CONIC

OFFICE OF PRIMARY CARE AND RURAL HEALTH DEVELOPMENT
CENTER FOR HEALTH INNOVATION AND EFFECTIVENESS
OKLAHOMA STATE DEPARTMENT OF HEALTH

PHYSICIAN ASSISTANTS (PAs)

THE NUMBER OF PHYSICIAN ASSISTANTS FOR EACH COUNTY INCLUDES ALL PHYSICIAN ASSISTANTS WHO HAVE AN ACTIVE OKLAHOMA LICENSE AND AN IDENTIFIABLE PRACTICE ADDRESS IN THE STATE.

PROJECTION/COORDINATE SYSTEM: USGS ALBERS EQUAL AREA CONIC

OFFICE OF PRIMARY CARE AND RURAL HEALTH DEVELOPMENT
CENTER FOR HEALTH INNOVATION AND EFFECTIVENESS
OKLAHOMA STATE DEPARTMENT OF HEALTH

REGISTERED NURSES (RNs)

THE NUMBER OF REGISTERED NURSES IN EACH COUNTY INCLUDES ALL RNS WHO HAVE AN ACTIVE OKLAHOMA LICENSE AND AN IDENTIFIABLE PRACTICE ADDRESS IN THE STATE.

THE RN COUNT FOR EACH COUNTY INCLUDES NURSES WHOSE RN LICENSE WAS ACTIVE AT THE TIME OF ANALYSIS (DECEMBER 2014).

PROJECTION/COORDINATE SYSTEM: USGS ALBERS EQUAL AREA CONIC

OFFICE OF PRIMARY CARE AND RURAL HEALTH DEVELOPMENT
CENTER FOR HEALTH INNOVATION AND EFFECTIVENESS
OKLAHOMA STATE DEPARTMENT OF HEALTH

LICENSED PRACTICAL NURSES (LPNS)

THE NUMBER OF LICENSED PRACTICAL NURSES IN EACH COUNTY INCLUDES ALL LPNS WHO HAVE AN ACTIVE OKLAHOMA LICENSE AND AN IDENTIFIABLE PRACTICE ADDRESS IN THE STATE.

THE LPN COUNT FOR EACH COUNTY INCLUDES THOSE NURSES WHOSE LPN LICENSE WAS ACTIVE AT THE TIME OF ANALYSIS (DECEMBER 2014).

PROJECTION/COORDINATE SYSTEM: USGS ALBERS EQUAL AREA CONIC

DENTISTS (DDS & DMD)

THE NUMBER OF DENTISTS FOR EACH COUNTY INCLUDES ALL DENTISTS WITH AN IDENTIFIABLE PRACTICE ADDRESS ACCORDING TO 2014 DATA FROM THE NATIONAL PROVIDER IDENTIFICATION FILE. THIS REPORT, ISSUED BY THE CENTER FOR MEDICARE AND MEDICAID SERVICES, LISTS ALL DOCTORS OF DENTAL SURGERY (DDS) OR DOCTORS OF DENTAL MEDICINE (DMD) WITH THE REQUIRED IDENTIFICATION NUMBER TO BILL FOR ANY FORM OF INSURANCE. REGULATORY GUIDANCE FROM THE HEALTH RESOURCES AND SERVICES ADMINISTRATION INFORMS THE SELECTION OF DENTISTS SPECIALIZING IN EITHER GENERAL OR PEDIATRIC/PEDODONTIC DENTISTRY.

DATA SOURCE: CENTER FOR MEDICARE & MEDICAID SERVICES, HEALTH RESOURCES & SERVICES ADMINISTRATION: NATIONAL PROVIDER IDENTIFICATION DATA (2014)

PROJECTION/COORDINATE SYSTEM: USGS ALBERS EQUAL AREA CONIC

CENTER FOR HEALTH INNOVATION AND EFFECTIVENESS
OFFICE OF PRIMARY CARE AND RURAL HEALTH DEVELOPMENT
OKLAHOMA STATE DEPARTMENT OF HEALTH

PSYCHIATRISTS (DO & MD)

THE NUMBER OF PSYCHIATRISTS (D.O. AND M.D.) FOR EACH COUNTY INCLUDES PHYSICIANS (BOTH OSTEOPATHIC AND ALLOPATHIC TRAINING) WHO HAVE AN ACTIVE OKLAHOMA LICENSE IN EITHER GENERAL, CHILD, OR ADOLESCENT PSYCHIATRY AND POSSESS AN IDENTIFIABLE PRACTICE ADDRESS IN THE STATE. A QUALITATIVE ANALYSIS IN STATISTICAL ANALYSIS SOFTWARE (SAS) AND MICROSOFT EXCEL OF LICENSURE DATA IDENTIFIED THE PSYCHIATRY OR CHILD AND ADOLESCENT PSYCHIATRY SPECIALISTS OF INTEREST AND ACCOUNTED FOR DIFFERENCES IN SPELLING OR TERMINOLOGY BETWEEN THE TWO STATE BOARDS THAT LICENSE PHYSICIANS. PHYSICIANS WHO WERE BOARD-CERTIFIED IN PSYCHIATRY AND AN ADDITIONAL SPECIALTY OR SUB-SPECIALTY WERE EXCLUDED FROM THE PSYCHIATRISTS (D.O. AND M.D.) SUB-GROUP COUNT AND RATE PER 10,000 POPULATION.

PHYSICIANS ENROLLED IN GRADUATE MEDICAL EDUCATION, SUCH AS RESIDENCY OR POST-GRADUATE FELLOWSHIPS IN PSYCHIATRY, WERE EXCLUDED FROM THE PSYCHIATRISTS (D.O. AND M.D.) FOR EACH COUNTY.

PROJECTION/COORDINATE SYSTEM: USGS ALBERS EQUAL AREA CONIC

HEALTH FACILITIES IN OKLAHOMA

HOSPITALS (GENERAL MEDICAL/SURGICAL AND CRITICAL ACCESS)

CRITICAL ACCESS HOSPITALS: ESTABLISHED UNDER THE FEDERAL BALANCED BUDGET ACT OF 1997, CRITICAL ACCESS HOSPITALS (CAHS) ARE LIMITED SERVICE HOSPITALS LOCATED IN RURAL AREAS. CAH IS A SPECIAL MEDICARE DESIGNATION LIMITED TO HOSPITALS WITH 25 BEDS OR LESS WITH AN AVERAGE LENGTH OF STAY OF LESS THAN FOUR DAYS. CAHS RECEIVE PAYMENTS FOR PROVIDING CARE TO UNDERSERVED POPULATIONS.

GENERAL MEDICAL/SURGICAL HOSPITALS: THE NUMBER OF GENERAL MEDICAL SURGICAL HOSPITALS INCLUDES INSTITUTIONS CAPABLE OF DIAGNOSIS AND TREATMENT OF MEDICAL CONDITIONS IN AN INPATIENT SETTING. GENERAL MEDICAL / SURGICAL HOSPITALS PROVIDE A WIDE VARIETY OF LABORATORY, DIAGNOSTIC, AND SURGICAL SERVICES.

NUMBER OF GENERAL MEDICAL/SURGICAL HOSPITALS: 99

NUMBER OF CRITICAL ACCESS HOSPITALS: 34

PA-C – Physician Assistant - Certified

PCP – Primary Care Physician

RN – Registered Nurse

SAS – Statistical Analysis System

USGS – United States Geological Survey

VA – Veterans Affairs

GLOSSARY AND DEFINITIONS

Adult Crisis Centers

The number of Adult Crisis Centers in each county includes mental health facilities that specialize in treating acute psychiatric conditions on a walk-in basis. Adult Crisis Centers are in operation 24 hours a day. ⁵

Advanced Practice Registered Nurses (APRNs)

APRN Subgroups, by Type: Nurse Practitioners (CNP); Nurse Midwives (CNM); Clinical Nurse Specialists (CNS); Nurse Anesthetists (CRNA)

The number of APRNs for each county includes all Advanced Practice RNs who have an active Oklahoma license and an identifiable practice address in the state.

During the review of APRN licenses, staff identified multiple licenses that were issued to the same individual by the Oklahoma Board of Nursing. For example, the same licensee could receive training as an LPN, RN and/or APRN throughout their career. For these licensees, an individual's multiple licenses were compared to one another, using the Date of Issue or Re-Licensure field and the status of the License (Active or Inactive) as indicated by the Oklahoma Board of Nursing.

The APRN count for each county includes those nurses whose APRN license was the most recent and active license at the time of analysis (December 2014). ⁶

Beds, Number of Hospital

The number of Hospital Beds for each county includes the number of beds for all hospitals identified by the Oklahoma State Department of Health's Medical Facilities listing. Note that this listing does not include Federal (Veterans Affairs Facilities) or Tribal Hospitals, due to differences in certification for these types of facilities. ⁷

Beds, Number of Nursing Homes

The number of Nursing Home Beds for each county includes the total count of all beds owned by all nursing homes listed as licensees by the Oklahoma State Department of Health's Long Term Care Division. ⁸

Community Mental Health Centers

The number of Community Mental Health Centers (CMHCs) for each county includes all main and satellite offices of state-operated and contracted non-profit providers of mental health services. CMHCs provide a variety of mental health and support services to assist adults and children. CMHCs in Oklahoma provide services to adults with an income of 200% or lower of the Federal Poverty Level, and to children who have no other method of payment. ⁹

Dentists

The number of Dentists for each county includes all dentists with an identifiable practice address, based on 2014 data from the National Provider Identification file. This report, issued by the Center for Medicare and Medicaid Services (CMS) lists all Doctors of Dental Surgery (DDS) or Doctors of Dental Medicine (DMD) with the required identification number to bill for any form of insurance. Regulatory guidance from the Health Resources and Services Administration informs the selection of dentists specializing in either General or Pediatric/Periodontic Dentistry. Dental sub-specialists were not selected in this listing of dental health professionals. ¹⁰

Federally Qualified Health Centers

Federally Qualified Health Centers are public and private non-profit health care organizations that serve a medically underserved populations. FQHCS must offer comprehensive health care services, with fees adjusted

Federally Qualified Health Centers, cont.

on patients' ability to pay. Additionally, FQHCs comply with clinical, financial and governance regulations under Section 330 of the U.S. Public Health Service Act. FQHCs apply for and receive Health Center Program grant funding that, on average, constitutes about 20 percent of their operating revenue. The remainder comes from Medicaid, Medicare, private insurance, patient fees and other resources. ¹¹

Free and Charitable Clinics

The number of Free Clinics for each county includes primary, mental, pharmacy, or dental health clinics that serve patients at no-cost. Only charitable clinics that could be verified online or by phone were included. Free Clinics have the option to enter into contract with the Oklahoma State Department of Health to provide malpractice insurance for providing services. ¹²

Health Professional Shortage Area (HPSA)

Health Professional Shortage Area (HPSA) designations are used by the federal Health Resources and Services Administration to identify areas and population groups within Oklahoma that experience a shortage of professionals in three health disciplines: Primary Care, Dental, and Mental Health. Entire counties that are currently designated as HPSAs are indicated with a YES adjacent to the appropriate discipline. NO indicates that the entire county is not currently designated as a HPSA. PARTIAL indicates that only a portion of the geographic area of the county is currently designated as a HPSA, rather than the entire county. HPSAs are determined by taking into account factors including the number of physicians (or other relevant health professionals) and comparing the ratio of these professionals to the population in the area. ¹³

Hospitals, Critical Access

Established under the federal Balanced Budget Act of 1997, Critical Access Hospitals (CAHs) are limited service hospitals located in rural areas. CAH is a special Medicare designation for payment that is limited to hospitals with 25 beds or less with an average length of stay of less than four days. ¹⁴

Hospitals, General Medical/Surgical

The number of General Medical/Surgical Hospitals includes institutions capable of diagnosis and treatment of medical conditions in an inpatient setting. General Medical Surgical Hospitals provide a wide variety of laboratory, diagnostic, and surgical services related to the treatment of medical conditions. ¹⁵

Indian Health Services (Federal)

The number of Indian Health Services (Federal) facilities for each county includes unique hospitals and outpatient clinics identified by the federal Indian Health Service. The Indian Health Service is the federal agency operating comprehensive healthcare systems for eligible members of federally recognized American Indian and Alaska Native tribes. ¹⁶

Indian Health Services (Tribal)

The number of Indian Health Services (Tribal) facilities for each county includes unique hospitals and outpatient clinics that are operated by independent self-governing Tribal Nations. There are 38 federally recognized tribal nations in the State of Oklahoma, some of which operate their own tribal health facilities, in addition to the health facilities provided through the federal Indian Health Service. ¹⁷

Inpatient Mental Health Facilities

Inpatient Mental Health Facilities include inpatient health institutions whose primary function is to provide diagnostic and treatment services for patients who have psychiatric conditions. The list of Inpatient Mental Health Facilities excludes General Medical/Surgical Hospitals that offer psychiatric inpatient services as part of a

Inpatient Mental Health Facilities, cont.

broader set of services and capabilities in their health system. ¹⁸

Licensed Practical Nurses (LPNs)

The number of Licensed Practical Nurses (LPN) in each county includes all LPNs who have an active Oklahoma license and an identifiable practice address in the state. Additionally, some members of the nursing workforce were determined to have multiple licenses issued to the same person by the Oklahoma Board of Nursing. For example, the same licensee could receive training as an LPN, RN and/or APRN throughout their career. For these licensees, an individual's multiple licenses were compared to one another, using the 'Date of Issue or Re-Licensure' field and the status of the License ('Active' or 'Inactive') as indicated by the Oklahoma Board of Nursing.

The Licensed Practical Nurses count for each county includes those nurses whose LPN license was the most recent, active license at the time of analysis (December 2014). ¹⁹

Medically Underserved Areas / Populations (MUA/Ps)

A Medically Underserved Area/Population designation identifies areas or populations with a shortage of health care services. These areas are only applicable for primary health care services and, unlike a HPSA, this type of designation does not expire under current federal guidance. Designation is based on the explanation as to why the area in question is rational (similar to the HPSA process) and the documentation of four factors; health care provider-to-population ratio, infant mortality rate, percentage of population below 100% of the federal poverty level, and the percentage of population aged 65 and over.

MUA/P may apply to whole counties, a group of counties or civil divisions, or a group of urban census tracts. The MUP includes groups of persons who face documented economic, cultural, or linguistic barriers to health care. ²⁰

Pharmacies, Retail

The number of Retail Pharmacies for each county includes all unique retail pharmacy locations with active licenses by the Oklahoma State Board of Pharmacy. This count includes independent, supermarket and 'chain' pharmacies that dispense medications and prescription drugs to the general public. ²¹

Physicians (D.O. and M.D.)

Physician Subgroups, by Training: Osteopathic Physicians (DO) and Allopathic Physician (MD)

Physician Subgroups, by Selected Specialty: Primary Care Physicians, General Surgeons, Psychiatrists*, Child and Adolescent Psychiatrists*

*Psychiatrists & Child and Adolescent Psychiatrist data is found on each county's ***Mental and Behavioral Health Professionals Section***.

The number of Physicians (D.O. and M.D.) for each county includes all physicians (both osteopathic and allopathic training) who have an active Oklahoma medical license and an identifiable practice address in the state. Physicians enrolled in graduate medical education, such as residency or post-graduate fellowships were excluded from the Physicians (D.O. and M.D.) count for each county. Non-resident, fully licensed physicians of all specialties or sub-specialties are represented in the Physicians (D.O. and M.D.) count, which indicates the overall number physicians per county. All subgroups of physicians also are defined using non-resident, fully licensed physicians. ²²

Primary Care Physicians

Primary Care Physician Subgroups: Family / General Practice Physicians, Internal Medicine Physicians, Pediatric Physicians, OB-GYN Physicians. Regulatory guidance from the Health Resources and Services Administration

Primary Care Physicians, cont.

informs the selection of Family / General Practice, Internal Medicine, Obstetrics & Gynecology (OB-GYN) and Pediatrics as the four “primary care specialties.” In order to be counted as a primary care physician, the physician cannot provide care as a sub-specialist that is within the scope of these broad fields, such as Cardiology, which is a sub-specialty within Internal Medicine.

The number of Primary Care Physicians for each county includes all D.O. or M.D non-resident, fully licensed physicians, that practice in any of the four specialties listed above. Physicians who were ‘board-certified’ in any of the four specialties listed above. Physicians who were board-certified in a primary care specialty and an additional non-primary care specialty were excluded from the Primary Care Physicians sub-group count and rate per 10,000 population. A qualitative analysis in SAS and Microsoft Excel of licensure data identified the Primary Care Physicians of interest and accounted for differences in spelling or terminology between the two state boards that license physicians. ²³

Physician Assistants (PAs)

The number of Physician Assistants for each county includes all physician assistants who have an active Oklahoma license and had an identifiable practice address in the state. ²⁴

Psychiatrists

The number of Psychiatrists (D.O. and M.D.) for each county includes all physicians (both osteopathic and allopathic training) who have an active Oklahoma license in either general or child or adolescent psychiatry and possess an identifiable practice address in the state. A qualitative analysis using the Statistical Analysis System (SAS) and Microsoft Excel of licensure data identified the Psychiatry or Child and Adolescent Psychiatry specialists and accounted for differences in spelling or terminology between the two state boards that license physicians. Physicians who were board-certified in psychiatry and an additional specialty or sub-specialty were excluded from the Psychiatrists (D.O. and M.D.) sub-group count and rate per 10,000 population.

Physicians enrolled in graduate medical education, such as residency or post-graduate fellowships in psychiatry were excluded from the Psychiatrists (D.O. and M.D.) count for each county. ²⁵

Psychiatrist, Child and Adolescent

The number of Child and Adolescent Psychiatrists (D.O. and M.D.) for each county includes all physicians (both osteopathic and allopathic training) who have an active Oklahoma license in either child or adolescent psychiatry and possessed an identifiable practice address in the state. A qualitative analysis in SAS and Microsoft Excel of licensure data identified the Child and Adolescent Psychiatry specialists of interest and accounted for differences in spelling or terminology between the two state boards that license physicians. Physicians who were board-certified in psychiatry and an additional specialty were excluded from the Child and Adolescent Psychiatrists (D.O. and M.D.) sub-group count and rate per 10,000 population.

Physicians enrolled in graduate medical education, such as residency or post-graduate fellowships in child or adolescent psychiatry were excluded from the Child and Adolescent Psychiatrists (D.O. and M.D.) for each county. ²⁶

Psychologists, Clinical/Counseling

The number of Clinical/Counseling Psychologists (Ph.D) for each county includes all psychologists who have an active Oklahoma license in a clinical or counseling specialty and have an identifiable practice address in the state. The Oklahoma State Board of Examiners of Psychologists identifies a number of psychologists who actively practicing in Oklahoma, but only a home, rather than a practice address, could be identified. ²⁷

Registered Nurses (RNs)

The number of Registered Nurses in each county includes all RNs who have an active Oklahoma license and an identifiable practice address in the state. Additionally, some members of the nursing workforce were determined to have multiple types of nursing licenses issued to the same person by the Oklahoma Board of Nursing. For example, the same licensee could receive training as an LPN, RN and/or APRN throughout their career. For these licensees, an individual's multiple licenses were compared to one another, using the 'Date of Issue or Re-Licensure' field and the status of the License ('Active' or 'Inactive') as indicated by the Oklahoma Board of Nursing.

The RNs count for each county includes those nurses whose RN license was the most recent, active license at the multiple licenses were compared to one another, using the Date of Issue or Re-Licensure field and the status of the License (Active or Inactive) as indicated by the Oklahoma Board of Nursing (December 2014).²⁸

Rural Health Clinics

Rural Health Clinics are outpatient health care clinics, certified by the Center for Medicare and Medicaid Services (CMS) as operating in rural, underserved, or Health Professional Shortage Areas.²⁹

Surgeons, General

The number of General Surgeons for each county includes all physicians currently licensed in a general surgery specialty. Physicians who were board-certified in a general surgery specialty and an additional non-general surgery specialty were excluded from the General Surgeons sub-group count. A qualitative analysis of physician specialties in SAS and Microsoft Excel of licensure data identified the General Surgeons of interest and accounted for differences in spelling or terminology between the two state boards that license physicians.³⁰

Urgent Care Centers

The number of Urgent Care Centers in each county includes outpatient facilities that specialize in providing health care to treat acute conditions and injuries on a walk-in basis. Urgent Care Centers provide treatments for conditions that are not life-threatening. Urgent Care Centers typically remain in operation during non-traditional business hours, including nights and weekends.³¹

Veterans Affairs Facilities

The number of Veterans Affairs Facilities for each county includes unique hospitals and outpatient clinics that are operated by the federal Veterans Affairs department. The Veterans Health Administration operates an integrated health care system for veterans of the United States Armed Forces.³²

APPENDIX A: RANKING METHODOLOGY

Geography and Population Data Comparisons:

Source (County Map): Oklahoma State Department of Health – GeoDatabase ³³

Source (County Land Area): U.S. Census Bureau, TIGER/Geographic Identification Code Scheme File ³⁴

Source: (County Populations): U.S. Census Bureau – *Annual Estimates of the Resident Population: April 1 2010 to July 1, 2013* ³⁵

Each of Oklahoma’s 77 counties is represented on a separate page of the databook, in alphabetical order. The heading of each page shows basic information about each county and includes a **County Map** depicting the location of the county created in ArcGIS 10.2 software.

The **Land Area** of each county, in square miles is identified by the U.S. Census Bureau’s national geographic (TIGER) database.

The **Population** data for each county was obtained from the U.S. Census Bureau’s **Annual Estimates of the Resident Population (2013)**, the most recent population estimate for Oklahoma at the time of publication (December 2014-June 2015).

The **Population Rank** is determined by ranking all counties based on the size of their respective **Population** values provided by the U.S. Census Bureau. The county with the greatest number of people is ranked “1” (**Oklahoma County: Population: 755,245**) while the county with the least number of people is ranked “77” (**Cimarron County: Population: 2,335**).

Rates of Health Professionals per 10,000 population

For selected health professional categories such as **Primary Care Physicians** the **Rate per 10,000 population** is calculated to provide context for the number of health professionals. This rate shows a county’s health workforce in **proportion to its population**, such as the number of primary care physicians practicing for every 10,000 people in the county.

The general formula below shows how the number of professionals for each specific type for every 10,000 residents was calculated:

[Total Number of Active, Fully-Licensed Practicing Professionals of each type within a county]

[County Population (2013)]

X 10,000

The use of active, practicing professionals per 10,000 population, rounded to two decimal places, allows for greater comparability between the resulting numbers. Although not every county in the state has 10,000 or more people, calculating the rate per 10,000 population standardizes practitioner counts, allowing for direct comparisons across counties for all counties that possess at least one practitioner.

In cases where no health professionals could be identified as practicing within the appropriate geographic boundaries, both the number and rate of providers per 10,000 people are displayed as ‘0’.

County Comparisons & Rankings

The population of each county is an important factor to consider, given the fact that many counties have large differences in their numbers of residents.

Comparing the **Population** values for each county is made easier by the **Population Rank** row at the top of each county's page. Similarly, comparing the amount of health professionals of each type across counties is aided by a county's **Rank**, showing the relative position of counties for the **amount** or **rate** of selected health professionals that are currently practicing within a county's boundaries. Healthcare **facilities** are not ranked for their quantities or rates per population in this edition of the Data Book.

County Ranks for Health Professionals

Throughout the Health Workforce Data Book, county rankings are presented adjacent to the numbers for the listed health professionals. For example, the total number of primary care physicians for each county is presented, and each county receives a **Rank** based on the size of this value, where the county with the greatest number of primary care physicians is ranked highest, as **"1"** (**Oklahoma County: 1,156**) and the county with the least primary care physicians is ranked lowest, as **"77"**. (**Grant County: 0**).

The **Rank** for the **rate** for applicable categories of health professionals is also adjacent to the calculated rate per 10,000. For example, the county with the greatest number of primary care physicians per 10,000 population is ranked as **"1"** (**Tulsa County: 16.31 per 10,000 people**) and the county with the least number of primary care physicians per 10,000 population is ranked lowest, as **"77"** (**Grant County: 0 physicians per 10,000 people**).

"Ties" – County Ranks for Health Professionals

There are instances where multiple counties contain the same number of health professionals in a given category. In these instances, the **Rank** assigned for that category is listed as a "tie" and all counties with the same value will have the same **Rank**. Counties that have ties for **Rank** occupy more than one position, meaning that the next unique ranking in the series can vary. For example, **Roger Mills County** and **Washita County** have the same number of primary care physicians (**2**) practicing within their boundaries, and therefore are "tied" for the **'69th** position in the ranking. The next **'Rank'** in the series will occupy the **'71st** position.

All counties with no health professionals practicing in a given category have a value of **'0'** for the health professional amount and rate per population. Multiple counties with a value of **'0'** "tied" for the same position for that health professional category. This position represents the least number of health professionals (or health professionals per 10,000 people) in the state, for the category being measured. The actual **Rank** value for this "last" position can vary with each health professional category, because there are different numbers of unique and "tied" values, which will influence the relative positioning.

In other words, if the ranked position of a county with **"0"** practitioners is **"30"**, this indicates that there are only **29** counties with practitioners. All counties that have a value of **"0"** health professionals will be "tied" at the rank of **"30"**.

County Ranks of Psychiatrists

The rank by rate of 'Psychiatrists' uses an alternative method of ranking when the number of psychiatrists is **'0'** for a county. For the **52** counties in Oklahoma that do not have a psychiatrist, an assessment of the population of counties without any psychiatrists allows for rankings that are unique.

For example, both Cimarron County and Harmon County (and many other counties) have a value of **"0"** and **"0.00"** for the number of active psychiatrists and the rate per 10,000 for psychiatrists. However, Cimarron County and Harmon County have different total populations **Cimarron County, population of 2,335** versus

County Ranks of Psychiatrists, cont.

Harmon County, population of 2,869. Cimarron County's ranking of "26" is higher than Harmon County's ranking of "27" due to the fact that there are fewer people in Cimarron County who are impacted by the lack of a psychiatrist within their county of residence. Of the 52 counties in Oklahoma that have no psychiatrists, the one with the least number of residents is ranked as 26, (Cimarron County, population of 2,335) and the county with the greatest number of residents is ranked as 77 (Canadian County, population of 126,123).
