

Screening, Brief Intervention and Referral to Treatment (SBIRT) Implementation Guide Q&A

1. Since we know that untreated pediatric ADHD, depression, anxiety, etc. can increase the risk of substance use later in life, would screening for these pediatric disorders meet the screening criteria under the SBIRT model?

Screening adolescents for substance use is recommended beginning around early adolescence. Routine screening during health care visits typically begins at age 12 as a baseline. Please see the recommended screening tools for adolescents in the SBIRT PowerPoint training.

2. I've had difficulty finding inpatient facilities that accept Oklahoma Medicaid/SoonerSelect for substance use, particularly alcohol detox treatment. Do you have a list of inpatient facilities that currently accept these insurance policies?

There are several helpful resources to leverage in finding an inpatient substance use facility. Explore the [SoonerCare provider search tool](#) on the Oklahoma Health Care Authority website and/or the [treatment locator](#) on the Substance Abuse and Mental Health Services Administration (SAMHSA) website.

Additionally, the three contracted entities below maintain lists of contracted providers on their websites.

- Aetna Better Health of Oklahoma: [Find a Provider | Aetna Better Health of Oklahoma](#)
- Humana Healthy Horizons: [Find Care - Humana](#)
- Oklahoma Complete Health: [Find a Provider | Oklahoma Complete Health](#)

3. Is there another screening tool available, besides the DAST-10, for multi-use screening?

The [ASSIST](#) screening tool is a good alternative to the DAST-10.

4. How are payments related to this program distributed?

Refer to this [one-pager](#) for more information regarding SBIRT incentive payments.

TREATMENT (SBIRT) IMPLEMENTATION GUIDE Q&A

5. Is the SBIRT incentive payment included in the SHOPP payments we received last year?

SBIRT payment is not included in SHOPP payments. SBIRT has its own separate payment. For more information, reference the [SHOPP Forms and Reports webpage](#).
