State Standard Devices

OKLAHOMA

State standard devices are established to keep Oklahoma secure.

The mobile device standard for the State of Oklahoma is Apple iOS\iPadOS devices. However, we are now beginning to add some select Android devices. Apple iOS\iPadOS devices and a select few Android models are the only mobile devices authorized to authenticate to the State network and access resources. If you have a device that does not meet state standards or is not on these lists, please upgrade to a new approved device as soon as possible.
