

# COMMUNITY SENTENCING 2024 ANNUAL REPORT

**OKLAHOMA**  
**Corrections**

*“To build a stronger Oklahoma by transforming lives in a safe, rehabilitative and compassionate environment.”*

**THE STATUTORY PURPOSES OF THE OKLAHOMA COMMUNITY SENTENCING ACT,  
ACCORDING TO 22 O.S. § 988.3 ARE TO:**

1. Protect the public;
2. Establish a statewide community sentencing system;
3. Adequately supervise offenders punished under a court ordered community sentence;
4. Provide a continuum of sanctions to the court for eligible offenders sentenced to a community sentence within the community sentencing system;
5. Increase the availability of punishment and treatment options to eligible felony offenders;
6. Improve the criminal justice system within the state through public/private partnerships, reciprocal and inter-local governmental agreements, and interagency cooperation and collaboration; and
7. Operate effectively within the allocation of state and local resources for the criminal justice system.

# PREFACE

The Community Sentencing Division of the Oklahoma Department of Corrections prepared this 2024 Community Sentencing annual report in compliance with the requirements of 22 O.S. § 988.15.13. This report provides an evaluation of the effectiveness of the Oklahoma Community Sentencing Program as it pertains to public safety, performance-based effectiveness in reducing recidivism, utilization by the judiciary, resource allocation, and reduced state and local institutional receptions, if any. Additional information is provided pertaining to statistical data, including, but not limited to, community sentencing participation by county, total number of qualifying and non-qualifying community sentences per month for each local community sentencing system, total number of community sentences ordered per month, program participation and the annual average cost per offender.

# INTRODUCTION

The Community Sentencing Act, 22 O.S. S 988.1-24, was established in 1999 to divert prison-bound offenders from incarceration. Community Sentencing became operational in March 2000 with the funding for six pilot planning councils. The goal of the program is to be an effective tool in preventing recidivism by giving eligible offenders the opportunity to redirect their lives by providing effective, needs-based treatment and programs. This cost-effective program, based in the community, is enhanced by the collaboration between the supervising entity, treatment provider, district attorney's office, public defender/attorney and the judge. Participating offenders remain in the community while working to support their families while being held accountable, and receiving treatment to address issues such as substance abuse and mental health disorders, which many times, are the caveat to their criminal behavior. This marks the 25th year this program has been operational, and many community stakeholders continue to be involved by meeting at a minimum of quarterly to discuss the progress of the local system.

Community Sentencing is not the only diversion program available in the state, and many times the district attorney determines a specialty court such as drug court or mental health court is appropriate for a particular individual and Community Sentencing is overlooked. Many times, the offender wishes to participate in those programs as well, since he or she will not have a conviction upon successful completion. Community Sentencing does not currently have that option. Even so, through the hard work of local administrators in meeting with judges, district attorneys and educating more defense attorneys, community sentencing participation is on the rise.

# INTRODUCTION-Continued

During the legislative session of 2022 the statute was changed to allow misdemeanor offenders to be supervised by these statewide Community Sentencing Programs. Several planning councils in the state began the supervision of misdemeanants during calendar year 2023 and are happy with the success thus far. Funding for treatment and supervision of these cases is coming from the administrative fee account owned by that participating council. It is felt the addition of misdemeanor cases to the Community Sentencing program will bring about more accountability in the early stages of involvement in the criminal justice system. By addressing the needs and risks related to substance abuse and mental health issues for misdemeanants, it is believed that treatment and supervision can aid in the prevention of graduating to felony offenses through continued criminal acts. At year end 2024 Adair County had 7 misdemeanants in their Community Sentencing program, Haskell/Latimer/LeFlore had 4 and Oklahoma County had 98.

During the 2024 legislative session, Senate Bill 1724 was filed amending the Community Sentencing statute found in title 22 O.S. Section 988.20. This bill, which was signed into law effective November 1, 2024, modified the language to allow driving privileges that have been suspended, revoked, canceled or denied by Service Oklahoma for any reason other than a conviction for reckless driving or driving under the influence pursuant to Section 11-901, 11-902 or 11.906.4 of Title 47 of the Oklahoma Statutes. If the court determines that no other means of transportation for the offender participating in the community sentencing program is available, the court may enter a written order requiring Service Oklahoma to stay any and all such actions against the Class D driving privileges of the offender. This action is left to the discretion of the sentencing judge and is not mandatory. However, due to requirements of the community sentencing program involving treatment, reporting and maintaining employment, this change in statute helps them to be successful in being able to drive legally to attend to their requirements and encourages compliance.

Also during calendar year 2024, through the collaborative efforts of the district and associate judge, district attorney, local administrator and multiple members of the community, a planning council in Okmulgee County was formed and had their first meeting on October 24,, 2024. We are looking forward to helping more offenders involved in the criminal justice system in Okmulgee County to be successful by meeting their needs and divert them from incarceration.

# STATEWIDE SUMMARY

Currently, there are eight local administrators who guide the system in their assigned areas and ensure all participants are receiving the benefit of the resources allotted. There are currently 32 funded planning councils, encompassing 47 counties in the state. Eleven councils are multi-county, while 21 are single-county councils.

The system continues to operate by utilizing sanctions and incentives to address the behavior and re-direct the offender as issues arise. Through regular staffings and court dockets, all involved parties are aware of each offender's status and will address violations and/or successful completions of treatment or other requirements.

The Community Sentencing Unit has an appropriated annual budget to utilize during the fiscal year. The statewide operational budget for FY24 was \$2,050,000.00. The total amount expended for FY24 was \$1,543,232.69. Fixed rate contracts for vendors, which include substance abuse services, mental health services, cognitive and behavioral skills programs, offender case management, drug testing and Level of Service Inventory assessments and reports totaled \$1,493,551.02.

The 210 Administrative Fee Account, which is an account maintained by the Department of Corrections, but funded by the collection of administrative fees paid by participants, is also used to pay for services and/or supplies for the planning councils. Any expenditure from this statutorily authorized account must be approved by the planning council wishing to utilize those fees. Each planning council has its own fund to which they contribute, and from which they draw. The Department of Corrections serves as a pass-through conduit with these funds and does not maintain ownership. For FY24, the administrative fee account expenditures from this account, statewide, totaled \$146,167.62.

# STATEWIDE SUMMARY - Continued

Community Sentencing is a proven investment in public safety, which has been found to reduce recidivism by addressing treatment needs and offering an alternative to prison. According to figures released in 2024 the average cost of incarceration is \$67.53 per day in Oklahoma. The average cost per day per offender participating in Community Sentencing is \$4.44 per day, \$135.05 per month and \$1620.60 per year, which is a substantial savings in lieu of incarceration.

Sentencing practices statewide reveal a total number of active participants in the Community Sentencing program to be 2338 as of 12/31/2024 per ICON (Inmate & Community Offender Network). The number of offenders sentenced into Community Sentencing for calendar year 2024 was 1307. In 2024 there were a total of 918 closures with 781 successful completions with an overall success rate of 85%.

There are two main assessment tools utilized to determine if an offender is eligible for the Community Sentencing program; the assessments used are the Level of Service Inventory - Revised (LSI-R) and the Ohio Risk Assessment Survey (ORAS). Some vendors utilize only the LSI-R while some only utilize the ORAS. Both determine eligibility into the program.

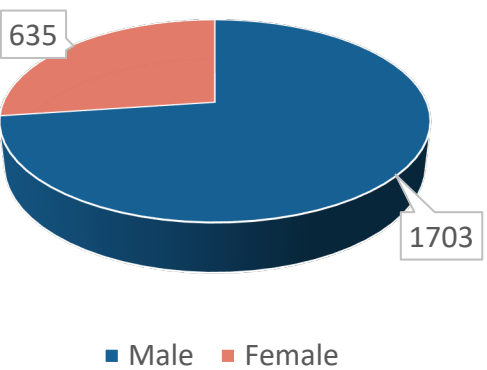

Offenders are supervised for two years on a suspended sentence and 18 months on a deferred sentence unless it is determined there is a continued need for services. If it is determined to be in the best interest of the offender, an additional year may be authorized. Supervision cannot go beyond three continuous years per statute.

The Oklahoma Community Sentencing Act provides for each county to establish a Community Sentencing system, however, active participation and the request for funding, remains optional.

# STORIES OF SUCCESS

My name is Taylor Cunningham, I am 28 years old and my sobriety date is February 25, 2023. I grew up in a small town named Alva in northwestern Oklahoma and come from a long line of alcoholics and drug addicts. Most of my life, my mom struggled with addiction and relationships with abusive partners. When she was strung out she was very abusive towards me and even moved my sister and me away from any family support we had in Alva to Tulsa while she was lost in her addiction. Once we finally moved back to Alva, I had experienced so much trauma that I didn't want to live anymore so I attempted suicide 3 times at the age of 13. After 3 unsuccessful suicide attempts, I decided I would just use drugs and drink to numb the pain until I died. I took pills and drank until I was 16 which is when I first tried meth. I used meth for years, my house was raided 3 different times, I was sent to at least 7 rehabs in my life and even prison, but none of it made me want to get sober. I wanted to continue living in the chaos that I grew to love. At age 17 I had my first child and even after having my second child, I still didn't want to stay sober. I still had every intention of dying from my drug addiction. I then started using Fentanyl. The last time I used my heart stopped because of the Fentanyl and I almost didn't survive it. After waking up in the hospital and being told what had happened, I was angry that I had survived. The withdrawal symptoms were so bad that I knew I needed to go to detox to get through them or I was going go back to using, so I went to The Recovery Center in Oklahoma City for detox, not because I wanted to get sober, but because I couldn't handle the withdrawals. While I was there, groups of people would bring support group meetings to us at the center and they gave me hope that I could get sober and actually be happy with my life. So I decided after detox I would move in to Oxford House sober living to give the sober life a chance and it was the best decision I've ever made in my life. After moving into sober living, I was offered the opportunity to participate in the Community Sentencing program for my pending charges in Canadian County, and for that I am extremely grateful. This program has given me a second chance at life. The staff has been absolutely amazing towards me and supported me through everything I have achieved and had to overcome. They have given me resources when I needed them and even given me tools to be able to live a sober and happy life. Since being in the program I have gotten my driver's license back after 8 years, was able to fly to Arizona for my daughter's 11th birthday, moved into my own apartment with my girlfriend and get to walk my sister down the aisle on her wedding day this year. None of this would have ever been possible without Canadian County Community Sentencing giving me a second chance that I probably didn't deserve. I also couldn't have achieved any of this without the help of AA, Oxford House and my higher power. My life today is completely different from a few years ago. I used to thrive in chaos and loved every minute of it and now I don't understand how I lived that way for so long. Today, I am actually trusted with my children and able to be a part of their lives instead of being an absent parent. I have rebuilt family relationships, including with my mother who is also in recovery. I've learned that I can overcome anything and everything without having to use or drink anymore. I'm extremely grateful for all the wonderful people I have in my life and for the second chance I received through the Community Sentencing program.

My story begins with drugs when I was around the age of 13 and began using meth. I never was caught though. I was almost a year behind where I needed to be to graduate high school my senior year and I was sent to an alternative school. I ended up dropping out from the alternative school and moving to OKC with my girlfriend. I learned school was not going to pay for diapers. We lived in OKC for a couple years before returning to Enid. My first child came at age 20. In Enid I kept jobs because I needed to make money to put food on the table. I did roofing, worked at a scrap yard, and worked at IHop. I ended up leaving Enid as that relationship ended.

I moved back to Cherokee where I worked at the SmokShak before going to wash out cattle trailers. I continued working at Ingersoll washing cattle trailers and was working for Wilsons in Cherokee building corrals. I never led a continual life of being high all the time, but I had friends that I would run around with that would use and get high. I never had a driver's license which was a problem. My older brother Charlie and I would run around a lot and this led to several times of using drugs to get high together which led to me traveling a road of getting into trouble. The first time I got into trouble was for a meth pipe that was not even mine, seriously. That cost me the first trip to jail for a couple of days.

I moved to Cherokee. Ultimately, I ended up getting into trouble for domestic violence. I never chased continually being high or using meth really. I ended up spending some time in Garfield County on a revocation charge for the meth pipe that was not mine. When I got out some things had happened with my common law wife while I was in lockup that caused me to really lose control of things when I made it back to Cherokee. This caused me to be criminally charged with three separate instances of domestic violence. I was ultimately locked up for about four months in the Alfalfa County Jail before being sent back to Garfield County I eventually was placed into the Community Sentencing program I am still in now.

I met a man by the name Mr. Cookson at the salvage yard in Alva when I was cutting metal. My oldest boy and I spent several months working for at the salvage yard cleaning and cutting metal. One day Mr. Cookson asked me what I was really doing, and I told him I was trying to make a dollar. Mr. Cookson then introduced me to Mr. Campbell who I still work for and with today. Shortly after meeting Mr. Campbell and going to work with him was when I had the opportunity to enter the Community Sentencing program from my prior domestic violence cases in Alfalfa County. I told Mr. Campbell everything about my past and he stuck with me. He is the reason for my success as much or more so than I am. Community Sentencing has helped me get on my feet, learn how to survive, and not just make "day money." Being in the Community Sentencing program and knowing there was supervision, the possibility of frequent drug tests, counseling both drug and mental health and simply working all day helped. Mr. Campbell was a serious "probation officer" as much as the Community Sentencing program. Mr. Truman and Mr. Campbell got me the trailer I live in today, that I had to work to pay for. But this was the beginning of a new way for me to take care of debts and pay fines. I ultimately have paid all my fines and caught my child support up. I now have a driver's license and own a vehicle. All of this was made possible through Mr. Campbell and the Community Sentencing program, and my hard work. I have learned a new way of life, and I am continuing to learn each day, but I am proud to keep moving forward. I am also proud to be drug free for over a year now, closing in on two years very soon! I have not used or touched meth for about four years and never plan to touch it again. The Community Sentencing Program really has helped change my life.

- Allen Schneeberger

### *IN HER OWN WORDS:*

---

My name is Cheyenne Massingill and I had been a drug addict for 7 years and acquired 2 felony drug trafficking charges and was on the run for 5 years before I had finally had enough and got sober. I turned myself in and was sitting in Oklahoma County waiting to be sentenced not knowing what the future had in store for me, but at that point I was willing to do whatever I had to do to take back control of my life and get my kids back. When my public defender told me about community sentencing, I honestly had never even heard about it before, but from the sounds of it that was my best option. Now I am standing before you 2 ½ years sober, living on my own with my kids, with a career that I love and doing amazing. Community Sentencing was the best thing that could have ever happened to me. The people here are so nice, accepting and understanding. They go out of their way to help you when you need someone the most and they encourage you to do your best even when you get hit with a few obstacles like not being able to find a job or needing counseling closer to where you live because you do not have a vehicle. They provide those options to you, and nothing is scarier than not knowing what to do and not having someone there to guide you, especially when you are in recovery. They do it because they genuinely want you to succeed. Community sentencing held me accountable, and I honestly can't believe that I am already done with it and standing before you today but I did it and I hope that many others are given this opportunity. It works and I am proof.
