Foundation, Inc. began operations on a memorial site to honor the 2,983 men, women, and children who perished on September 11, 2001. Technical Systems is honored to have been a part of the building process by providing an emergency backup chiller for a portion of the 9/11 Memorial in New York City.

In 1919, the release of one of the first creme-filled snack cakes, Hostess Cupcake, made history. In only six years, Continental Baking expanded it's line of sweet treats and the Hostess brand was born. By 1930, the brand had become iconic with the invention of Twinkies. Century Refrigeration's D Series Condensing Unit will be used at the Hostess Twinkie plant to cool water to 35° during the production process.

Filmed in Dutch Harbor, Alaska, *The Deadliest Catch* is a Discovery Channel television series that follows groups of fisherman as they navigate the dangerous waters of the Bering Sea during the crab fishing seasons. Though their work is treacherous, the fisherman are dedicated to providing some of the freshest, most delicious seafood available. Century Refrigeration recently shipped a D-Series Condensing Unit to Dutch Harbor to assist *The Deadliest Catch* fisherman in their pursuit of this goal. This equipment was designed and built for the sole purpose of freezing the crabs caught by these fisherman, and providing you with a delicious catch!

The Walt Disney Company has long been a source of joy for children around the world. With its cast of fun, colorful characters, it's no wonder that Walt Disney World is known as "the happiest place on Earth!" Century Refrigeration recently installed a set of D Series Air Cooled Condensing Units at Walt Disney World in Orlando, Florida. This equipment was designed to cool the walk-in refrigerators for the amusement park's many restaurants and shops.

Founded in 1911, M&M Mars is currently the fifth-largest privately held company in the United States and one of the leading manufacturers of confectionery products in the world. The company is the birthplace of beloved sweet treats such as Milky Way, Twix, Skittles, Snickers, Mars bars, and M&Ms. RAE Coils has had the fortune of working with M&M Mars to bring you the legendary candy that melts in your mouth, not in your hand. By providing a series of Fluid Coils to the company, RAE Coils has aided in the chocolate-making process of M&Ms and the satisfaction of chocolate lovers worldwide.
