

2023-2024 Strong Readers Act

GOVERNOR'S REPORT

In fulfillment of Section 1210.508C of Title 70 of the Oklahoma Statutes. This study provides data on third grade reading achievement by socio-economic status, learning disability status, English learner status and race. It also provides evidence on reading instructional practices and remediation efforts currently being used by districts in Oklahoma and explores the potential efficacy of these practices.

Background

The Reading Sufficiency Act (RSA) was enacted in Oklahoma in 1997 to improve students' reading skills by the end of third grade. It required reading assessments for kindergarten through third-grade students at the beginning and end of each school year. Amendments to the law include:

- 2012: Third-grade students are required to demonstrate reading proficiency or qualify for good-cause exemptions to advance to fourth grade starting in the 2013-2014 school year.
- 2014 (HB 2625): Introduced "probationary promotion," allowing third graders to advance based on recommendations from a Student Reading Proficiency Team (SRPT), which included the student's parents and educators.
- 2017 (HB 1760): Made the SRPT a permanent option.
- 2020 (SB 601): Amended good-cause exemptions, added a mid-year reading assessment for kindergarten through third grade, and clarified language around expectations for kindergarten students.
- 2024 (SB 362): Added exemptions for certain student groups, removed third-grade promotion requirements, and introduced new reporting requirements.

Purpose

The State Department of Education (SDE) annually conducts a study on reading instruction and the retention of students in the third grade based on reading assessments as required by Section 1210.508C of Title 70 of the Oklahoma Statutes. The purpose of the study is to identify trends in assessment data for students in kindergarten through third grade, as well as trends in promotion and retention decisions for third-grade students. Through this report, data is also collected on the instructional practices utilized by schools and the research literature regarding the effectiveness of those practices is discussed.

The purpose of the Strong Readers Act is to strengthen literacy among Oklahoma's students by integrating reading proficiency into the criteria for grade progression, ensuring appropriate instructional support, and maintaining clear communication with families about student progress. As such, the Reading Sufficiency Act (RSA) follows the Multi-Tiered Systems of Support (MTSS) model. Third grade is the transition year in which students apply the foundational skills they have been learning in the early grades to begin to focus on more critical analysis and understanding of text. During the school year 23-24, the current legislation mandated that the major determinant in assessing a third grader's reading proficiency was the student's score on the reading portion of the Oklahoma School Testing Program (OSTP). A student must either meet RSA criteria on the reading and vocabulary portions of the assessment, show reading proficiency through one of the approved screening assessments, qualify for any of the good-cause exemptions, be promoted with probation by the Student Reading Proficiency Team (SRPT), or be retained. Reports such as this one allow Oklahomans the opportunity to take an informed glance at the progress in continually improving literacy in schools across our state.

Key Findings

In this report you will see:

- In 2023-24 90,741 (46.9%) K-3 students were identified as at-risk of reading difficulties through beginning of year screening processes. By the end of the school year, 70,877 (36.6%) students were identified as at-risk through end of year screening processes and on a reading plan for intervention.
- There was a 10.3% decrease in the number of students needing reading interventions from the beginning of the school year to the end of the school year.
- There was an increase of total students meeting RSA criteria as determined by the Oklahoma State Testing Program (OSTP) with 71.2% of third graders achieving this goal. Although not yet equal to pre-COVID numbers, the trajectory is positive for increasing the number of students meeting RSA criteria.
- Hispanic, Black, and Pacific Islander subgroups did not meet RSA criteria at the same rate as other subgroups.
- Every ethnicity/race subgroup had an increased percentage of students met the RSA criteria on the OSTP in SY2024. The largest gain was Pacific Islander students with a 7.3% gain. The smallest gain was the Hispanic / Latino subgroup with a 0.5% gain over last year.

Organization

As outlined in 70 O.S. § 1210.508C, this report is organized around these central questions:

- How many students (number and percent) in kindergarten through third grade have been determined as at-risk for reading difficulties as compared to the total number of students enrolled in each grade?
- How many students (number and percent) in kindergarten through third grade continue to be at-risk for reading difficulties as determined by the year-end measurement of reading progress?
- How many students (number and percent) in kindergarten through third grade have successfully completed their program of reading instruction and are reading on grade level as determined by the results of approved reading assessments?
- How many third-grade students (number and percent) met the performance criteria for the RSA as determined by the Commission for Educational Quality and Accountability on the reading portion of the statewide third-grade assessment?
- How many third-grade students participated in the Oklahoma State Testing Program (OSTP) and, of that number, how many met reading proficiency on a screening instrument, how many were promoted through each of the good-cause exemptions, how many were retained, and how many were promoted through probationary promotion? How does reading proficiency vary by socioeconomic status, learning disability status, English learner (EL) status and race/ethnicity?
- What funding was appropriated to each district for reading remediation?
- What screening instruments are being used to identify reading deficiencies and monitor reading progress?
- What types of reading instructional practices, instructional methods and remediation efforts are currently being used by districts?
- What types of reading resources do students have access to outside of school?

Limitations

This report provides information that, when placed in the proper context, can help Oklahomans better understand the implementation and effectiveness of programs of reading instruction for kindergarten through third grade classrooms across the state. Current data reporting methods include self-reported data from districts, and thus, limit the conclusions which can be confidently drawn from this report. Data is reported at the site level rather than by student level. Therefore, it is difficult to know if data changed due to student improvement or movement to another school. Data show if students met a set target. However, it does not show the rate of improvement to determine if students made reasonable progress through the year. Because data is not collected at the student level, it cannot be determined which students on a reading plan might also be receiving additional instructional supports, such as English learner instruction or special services, or if the student was referred for additional services during the year. Districts report the number of students retained in grade three. However, this report does not show how many students might have been retained for academic reasons in grades K-2.

Results & Analysis

This section of the study will provide the critical data, tables, and narrative as outlined in 70 O.S. § 1210.508C. The Data Sources and Survey Results sections will provide the background for how the data was collected for the subsequent sections. The questions were also grouped into categories and include evaluative information based on the tables and figures provided.

Data Sources

To determine the number and percentage of students considered at-risk for reading difficulties at the beginning of the year as compared to the total number of students enrolled, we used district-reported data which delineated the number of students who were considered at-risk based on their enrollment in a program of reading instruction and the number of students enrolled. These numbers were directly reported to the OSDE by districts.

This study used data from the following sources:

- Reading Sufficiency Act Survey, including Beginning-of-Year and End-of-Year reports
- Third-Grade Promotion and Retention Report
- RSA district funding data
- State-developed survey on instructional practices, instructional methods, remediation efforts, and reading resource access
- Student information data
- Literature on instructional practices, instructional methods, remediation efforts, and reading resources.

Any student data contained in the report was reported only in the aggregate so that individual students could not be identified, except for promotion and retention decisions for third grade students who did not meet RSA criteria on the state test. In this case, districts were asked to report the final retention decision, as well as the method that was used for a student who was promoted. To gather information on reading instruction, a survey was sent to district personnel, administrators, and teachers who work with kindergarten through third-grade students. There were 570 responses to the survey. The respondents represented 67 (87%) counties in Oklahoma and 322 (59%) of the 544 school districts. The majority of the respondents (44%) were classroom teachers. Responses to the survey do not represent all districts and reflect a limited number of educators.

QUESTION 1

- **How many students (number and percent) in kindergarten through third grade have been determined as at-risk for reading difficulties as compared to the total number of students enrolled in each grade?**

The following table showcases the percent of students who are identified as at-risk of not achieving reading proficiency as determined by a beginning-of-year screening assessment administered within the first few weeks of the school year. The data provided does not indicate the progress made in that grade level throughout the year.

Table 1. Students Identified as At-Risk for Reading Difficulty at Beginning of Year Compared to Total Enrollment

 OKLAHOMA Education	Grade	At-Risk BOY	Total Enrolled	Percent At-Risk BOY
2021	Kindergarten	18,950	47,680	39.7%
	Grade 1	24,815	49,223	50.4%
	Grade 2	24,180	48,045	50.3%
	Grade 3	21,519	47,591	45.2%
	All Grades	89,464	192,539	46.5%
2022	Kindergarten	22,073	49,857	44.3%
	Grade 1	25,867	50,185	51.5%
	Grade 2	26,386	49,356	53.5%
	Grade 3	23,582	49,834	47.3%
	All Grades	97,908	199,232	49.1%
2023	Kindergarten	19,930	48,424	41.2%
	Grade 1	25,044	50,826	49.3%
	Grade 2	25,645	49,215	52.1%
	Grade 3	24,104	49,517	48.7%
	All Grades	94,723	197,982	47.8%
2024	Kindergarten	18,322	46,463	39.4%
	Grade 1	23,662	48,887	48.4%
	Grade 2	25,590	49,113	52.1%
	Grade 3	23,167	49,061	47.2%
	All Grades	90,741	193,524	46.9%

Figure 1. Students Identified as At-Risk for Reading Difficulty at Beginning Of Year Compared To Total Enrollment

Data Points of Interest:

- K-3rd grade enrollment for SY2023-2024 decreased by 4,458 students from SY2022-2023.
- The number of students identified as at-risk for meeting proficiency decreased from 47.8% for all K-3rd grade students to 46.9% for all K-3rd grade students. This percentage is lower than the previous two years.
- For the 2nd year in a row, 52.1% of all 2nd grade students were at-risk for meeting grade level proficiency, making them the only grade with above 50% at risk.

QUESTION 2

- **How many students (number and percent) in kindergarten through third grade continue to be at-risk for reading difficulties as determined by the year-end measurement of reading progress? How many students (number and percent) in kindergarten through third grade have successfully completed their program of reading instruction and are reading on grade level as determined by the results of approved reading assessments?**

To determine the number and percentage of students considered at-risk for reading difficulties at the end of the year, a calculation was made using the number of students not meeting grade-level reading targets on an Individualized Program of Reading Instruction (IPRI) at the end of the year as compared to the number of students not meeting grade-level reading targets on an IPRI at the beginning of the year. These data were directly reported to the OSDE by districts. End-of-year data reflect the effectiveness of instruction for students over the course of that school year. It does not reflect the influence (if any) of a summer break. The data do not differentiate between students who have made progress but have not quite reached the goal, students who have maintained growth at the same rate as their peers but have not closed the learning gap, or students who continue to struggle and have fallen further behind their peers.

Table 2. Students Remaining as At-Risk for Reading Difficulty at End of Year Compared to Total Enrollment

 OKLAHOMA Education	Grade	At-Risk EOY	Total Enrolled	Percent At-Risk EOY
2021	Kindergarten	14,064	47,680	29.5%
	Grade 1	17,932	49,223	36.4%
	Grade 2	18,535	48,045	38.6%
	Grade 3	14,924	47,591	31.4%
	All Grades	65,455	192,539	34.0%
2022	Kindergarten	15,464	49,857	31.0%
	Grade 1	18,229	50,185	36.3%
	Grade 2	18,677	49,356	37.8%
	Grade 3	15,551	49,834	31.2%
	All Grades	67,921	199,232	34.1%
2023	Kindergarten	13,889	48,424	28.7%
	Grade 1	18,651	50,826	36.7%
	Grade 2	19,587	49,215	39.8%
	Grade 3	17,323	49,517	35.0%
	All Grades	69,450	197,982	35.1%
2024	Kindergarten	14,580	46,463	31.4%
	Grade 1	18,937	48,887	38.7%
	Grade 2	20,482	49,113	41.7%
	Grade 3	16,878	49,061	34.4%
	All Grades	70,877	193,524	36.6%

Figure 2. Students Remaining as At-Risk for Reading Difficulty at End of Year as Compared to Total Enrollment

Table 3. Students Completing Individualized Program of Reading Instruction (IPRI) by Meeting Grade-Level Target Prior to End of Year

 OKLAHOMA Education	Grade	Number of Students on Plan	Number of Students Completed Plan	Percent of Students Completed Plan
2021	Kindergarten	21,835	7,618	34.9%
	Grade 1	27,478	9,221	33.6%
	Grade 2	26,647	7,888	29.6%
	Grade 3	23,605	8,370	35.5%
	All Grades	99,565	33,097	33.2%
2022	Kindergarten	24,221	8,697	35.9%
	Grade 1	26,946	8,640	32.1%
	Grade 2	27,039	8,291	30.7%
	Grade 3	24,057	8,425	35.0%
	All Grades	102,263	34,053	33.3%
2023	Kindergarten	22,723	8,827	38.8%
	Grade 1	27,579	8,918	32.3%
	Grade 2	27,219	7,619	28.0%
	Grade 3	25,756	8,420	32.7%
	All Grades	103,277	33,784	32.7%
2024	Kindergarten	22,435	7,855	35.0%

	Grade 1	51.5%	36.3%	-15.2%
	Grade 2	53.5%	37.8%	-15.7%
	Grade 3	47.3%	31.2%	-16.1%
	All Grades	49.1%	34.1%	-15.0%
2023	Kindergarten	41.2%	28.7%	-12.5%
	Grade 1	49.3%	36.7%	-12.6%
	Grade 2	52.1%	39.8%	-12.3%
	Grade 3	48.7%	35.0%	13.7%
	All Grades	47.8%	35.1%	-12.7%
2024	Kindergarten	39.4%	31.4%	-8%
	Grade 1	48.4%	38.7%	-9.7%
	Grade 2	52.1%	41.7%	-10.4%
	Grade 3	47.2%	34.4%	12.8%
	All Grades	46.9%	36.6%	-10.3%

Figure 4. Students At-Risk for Reading Difficulty at Beginning Versus End of Year

Data Points of Interest:

- The number of students identified as at-risk for reading difficulties in the beginning of the SY2023-2024 was 90,741 (46.9%). At the end of the year, 70,877 (36.6%) students were identified as at-risk and on a reading plan for intervention. The decrease throughout the year was 10.3% of students needing reading interventions.
- For SY2021-2024, second grade students consistently had the largest percentage of students remaining at-risk at the end of the year. This could be due in part to being expected to perform tasks more independently and having less supports in place than in the earlier grades. Students with foundational gaps may no longer be able to keep up with grade level expectations.

QUESTION 3

- **How many third-grade students (number and percent) met the performance criteria for the RSA as determined by the Commission for Educational Quality and Accountability on the reading portion of the statewide third-grade assessment?**

To determine the number and percentage of students meeting the performance criteria for the RSA on the reading portion of the statewide third-grade assessment, OSTP reading scores were analyzed. The performance levels for the reading portion of the third grade test identified by the Commission for Educational Quality and Accountability are “Meets RSA Criteria” and “Does Not Meet RSA Criteria.” These scores are determined by using only questions that address Standard 2: Reading and Writing Process and Standard 4: Vocabulary. Additionally, demographic data were analyzed to provide descriptive statistics on reading proficiency and retention by free- and reduced-lunch (FRL), individualized education program (IEP), English learner (EL) status, and race/ethnicity.

Table 5. 2021 Oklahoma State Testing Program (OSTP) Data

 OKLAHOMA Education	Subgroup	Met RSA Criteria		Did Not Meet RSA Criteria		Total

	Total	35,616	71.2%	14,438	28.8%	50,054	

Data Points of Interest:

- From school years 2021 to 2024, students in the IEP subgroup consistently showed incremental progress in meeting RSA criteria on the OSTP. Progress was recorded as follows: 38.6% in 2021, 39.4% in 2022, and 39.9% in 2023. In the school year 2024, there was a notable increase, with 41.4% of students meeting the RSA criteria.
- The free- and reduced-lunch (FRL) subgroup has made increases in the last four years with the largest increase in the SY2024. Students in the FRL subgroup that met RSA criteria increased from 57.3% in SY2021 to 58.6% in SY2022, then to 61.3% in SY2023 and finally to 64.5% in SY2024.
- The English Learner (EL) subgroup has shown consistent results varying only 3 points within the past four years. EL students that met RSA criteria increased from 48.3% in SY2021 to 48.9% in SY2022, and 51.1% in SY2023, then dropped slightly in SY2024 to 50.4%.
- White and Asian subgroups are at least 4.5% more likely to meet RSA criteria than any other subgroup with the greatest disparity being between the Black (53.3% met RSA criteria) and the White and Asian subgroups (78.5% met RSA criteria).
- In SY2024, all subgroups for race/ethnicity demonstrated an increase in the number of students who met RSA Criteria.
- Pacific Islander students who met RSA Criteria increased from 47.7% in SY2023 to 55.0% in SY2024, which is a 7.3% increase, the largest increase in any subgroup population.

QUESTION 4

- **How many third-grade students participated in the Oklahoma State Testing Program (OSTP) and, of that number, how many met reading proficiency on a screening instrument, how many were promoted through each of the good-cause exemptions, how many were retained, and how many were promoted through probationary promotion? How does reading proficiency vary by socioeconomic status, learning disability status, English learner (EL) status and race/ethnicity?**

Pathway 1: Meet RSA criteria on the reading and vocabulary portions of the OSTP,

Pathway 2: Demonstrate reading proficiency through one of the approved screening assessments,

Pathway 3: Meet the requirements for one of the seven good-cause exemptions, and

Pathway 4: Obtain a unanimous decision by the Student Reading Proficiency Team (SRPT) to be promoted with probation.

To determine the number of students promoted by each of the pathways or retained, districts reported the data to OSDE. Any discrepancies between the data in this section and that in the previous section may be due to the variations in reporting structures. When reporting promotion decisions, districts often indicate all promotion options that a student may be eligible for. In this case, those data are reported here as a hierarchy. Students with multiple promotion pathways are tallied in the order of the pathways. For example, if a student qualified for promotion through both a screening assessment (Pathway 2) and good-cause exemption 5 (Pathway 3), the student was included in the data for Pathway 2 only.

Table 9. Promotion Pathways and Retention Decisions

 OKLAHOMA Education	2021	2022	2023	2024
Pathway 1: Met RSA Criteria on OSTP	31,057 62.7%	33,755 67.7%	34,702 70.0%	35,616 71.7%

Data Points of Interest:

- Table 9 shows that in SY2024 71.7% of students were promoted by meeting RSA Criteria on OSTP assessments, an increase from 70.0% of students in SY2023.
- Due to the other pathway options such as screeners, good-cause exemptions, and school reading proficiency teams (SRPTs), the actual percentage retained has decreased each year. This year's percentage is at 1.4% compared with SY23 at 1.9%, decreasing only slightly from 2.0% in SY2022 and 2.4% in SY2021
- Table 10 shows that good-cause exemption 5, Making Progress on IEP Goals, was most commonly used at 59%.

QUESTION 5

➤ **What funding was appropriated to each district for reading remediation?**

The State Department of Education Office of State Aid maintains records of funding allocated to each district. Those amounts are reported here. Since Fiscal Year 2014, RSA funds have been allocated and paid without districts submitting claims for reimbursement. Instead, the total allocation has been disbursed to districts for their use throughout the year. Funds are disbursed after every school site serving kindergarten through third-grade students has certified their Beginning of Year data report and has submitted an Annual District Reading Plan that has been approved by the Oklahoma State Department of Education. Funds are generally received by districts in December of each year.

RSA funds may be used for the following:

- Salaries for teachers and teaching assistants for before-school and after-school programs
- Summer school teachers and during-school reading interventionists
- Data processing services, software services and internet services
- Printing and binding, copy supplies and office supplies
- Instructional materials for students identified and placed on a program of reading instruction
- Approved screening assessments, academic student assessment supplies and materials
- Books, state-adopted textbooks, supplemental non-state-adopted textbooks, workbooks, magazines, approved technology-related equipment and reading software
- Contracted services (non-payroll personnel) for offsite, onsite or online professional development training
- Travel and registration fees for teachers, paraprofessionals and interventionists to attend approved RSA professional development training
- Salaries for bus drivers providing student transportation for before- and after-school programs or the Summer Academy Reading Program for RSA.

WOODWARD	WOODWARD	\$43,276.50	\$37,798.30	\$33,603.88	\$34,636.80
STATE	ALL DISTRICTS	\$10,999,810.50	\$12,000,106.74	\$13,000,283.52	\$12,999,500.80

Data Points of Interest:

- The per-student funding allocation for SY2023-2024 was \$140.80. This number increased from \$133.88 in SY2022-2023 and \$121.93 in SY2021-2022. To be considered fully-funded, the RSA allocation should be \$150 per student.
- The total amount of RSA funding distributed to schools was \$12,999,500.80 for SY2023-2024. This allocation paired with the smaller number of students at-risk rendered the highest per pupil allotment in Oklahoma RSA history to date.

When spending funds from the RSA allocation, districts use the Oklahoma Cost Accounting System (OCAS) codes to report how funds are expended. Some funds may be carried over to the next year to cover costs that occur in the fall.

Figure 5. Overall District Spending for SY24 by Category

Data Points of Interest:

- The largest expense category is Instruction and Materials. This includes salaries for interventionists and teachers who conduct small group interventions or provide tutoring in after-school programs. Additionally, instructional materials and intervention curricula fall under this category.

- Professional Development represents the second largest expense category, serving as a vital investment in equipping educators with the skills and knowledge necessary to effectively support the literacy development of young students.
- The categories of building and vehicle services and administration and services are likely costs associated with Summer Reading Academy.
- The total amount accounted for is \$11,780,775. The remaining \$1,219,225 is likely carry over for districts to use at the beginning of the next school year.

QUESTION 6

➤ **What screening instruments are being used to identify reading deficiencies and monitor reading progress?**

Screening assessments are brief tests that are valid, reliable, and evidence-based. They are used with all students to measure their skills in each of the five components of reading: phonemic awareness, vocabulary, phonics, reading fluency and comprehension. These tests help teachers identify students with reading deficiencies and, together with diagnostic assessments, drive instruction toward the specific needs of their students. The assessments on this list meet criteria for reliability and validity, as well as alignment to the Oklahoma Academic Standards. Districts were able to choose which of the screening assessments best fit their needs.

The approved screening assessments from which districts could choose for SY2023-2024 are shown below in Table 15. Most districts identify one screening assessment that will be used for students in kindergarten through grade 3. Some districts choose to use one assessment for some grades and a different one for other grades. For this report, those districts have been identified as “mixed use” of assessments.

Table 16. Approved Screening Assessments for RSA

Approved Screening Assessment	Publisher
Acadience	Acadience Learning, Inc.
AimswebPlus	Pearson
Amira	Amira Learning
ExactPath	Edmentum, Inc.

MAP Reading Fluency	NWEA
MAP Growth	NWEA
mCLASS DIBELS 8th Edition	Amplify Education, Inc.
Star Early Learning Suite	Renaissance Learning, Inc.

Figure 6. Screening Assessments Used by School Sites in SY2023-2024

Data Points of Interest:

- Of the approved screening assessments for SY2023-2024, 7 assessments fell under 5% of use by districts, 3 assessments fell between 7-10% usage, and 1 assessment (Star) accounted for an overwhelming majority at 61%.
- 325 of the 530 reported school districts (61%) indicated using Star Early Learning as their screening assessment for SY2023-2024.
- 20 school sites (4%) reported mixed use, using unique screeners for different grade levels. This number is down from 122 sites (14%) last school year.

QUESTION 7

► What types of reading instructional practices, instructional methods and remediation efforts are currently being used by districts?

A survey was made available to Oklahoma teachers and administrators to gain feedback on the types of instructional practices and methods being used for both core and supplemental instruction in kindergarten through third grade, as well as supplemental practices to aid students after third grade who were promoted through a good-cause exemption or the Student Reading Proficiency Team (SRPT). The survey results reflect a limited sample of educators and do not represent all districts.

For this question, respondents were asked to identify the instructional practices or methods regularly used as part of on-grade-level core instruction for all kindergarten through third-grade students.

Figure 7. Instructional Practices and Methods for Tier 1 (Core Instruction) for Students in Grades K-3

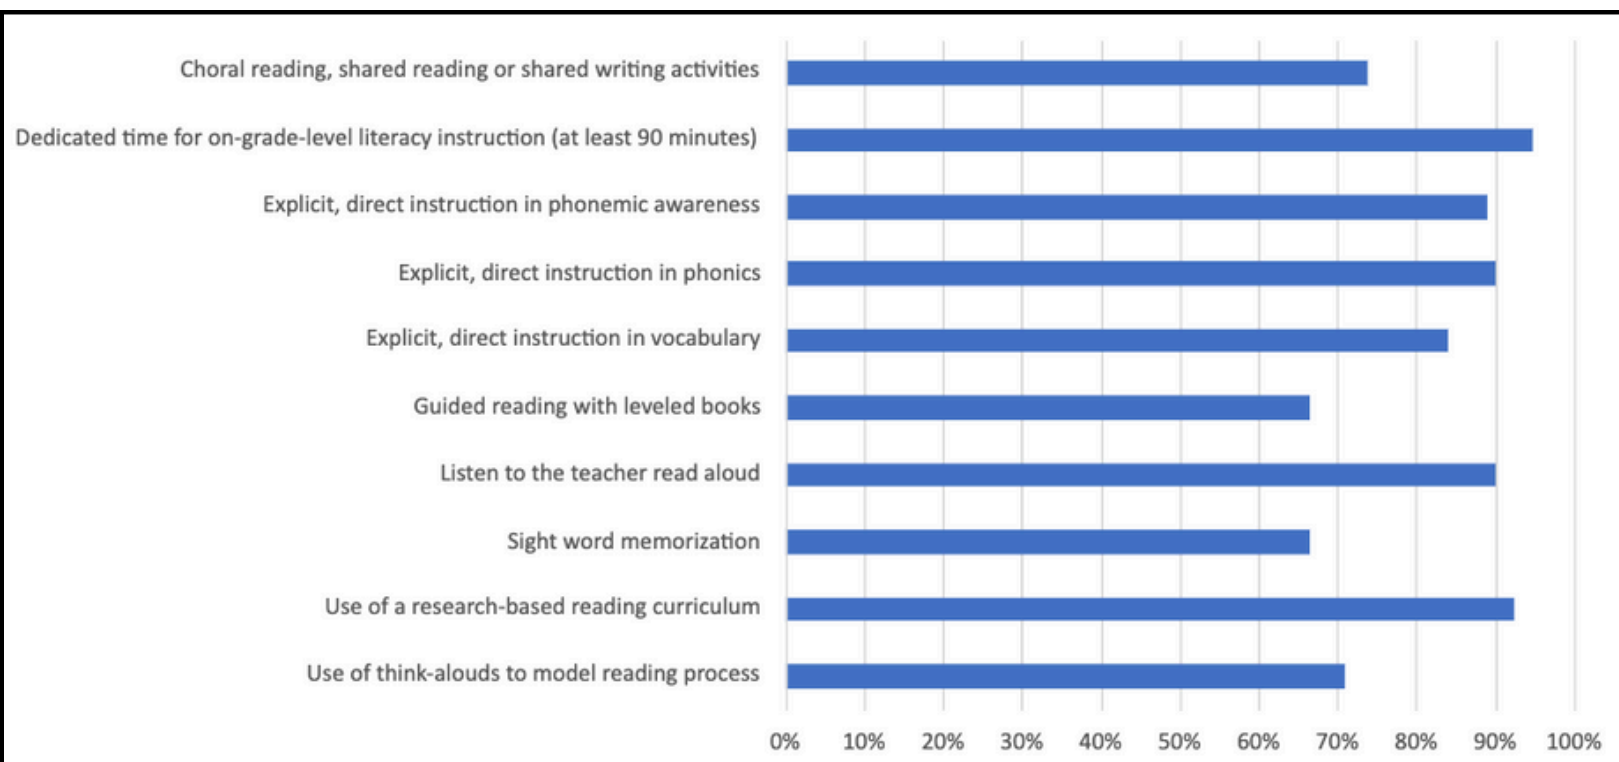

Figure 8. Instructional Practices and Methods for Students in Grades K-3 Who Are Not Meeting Grade-Level Targets

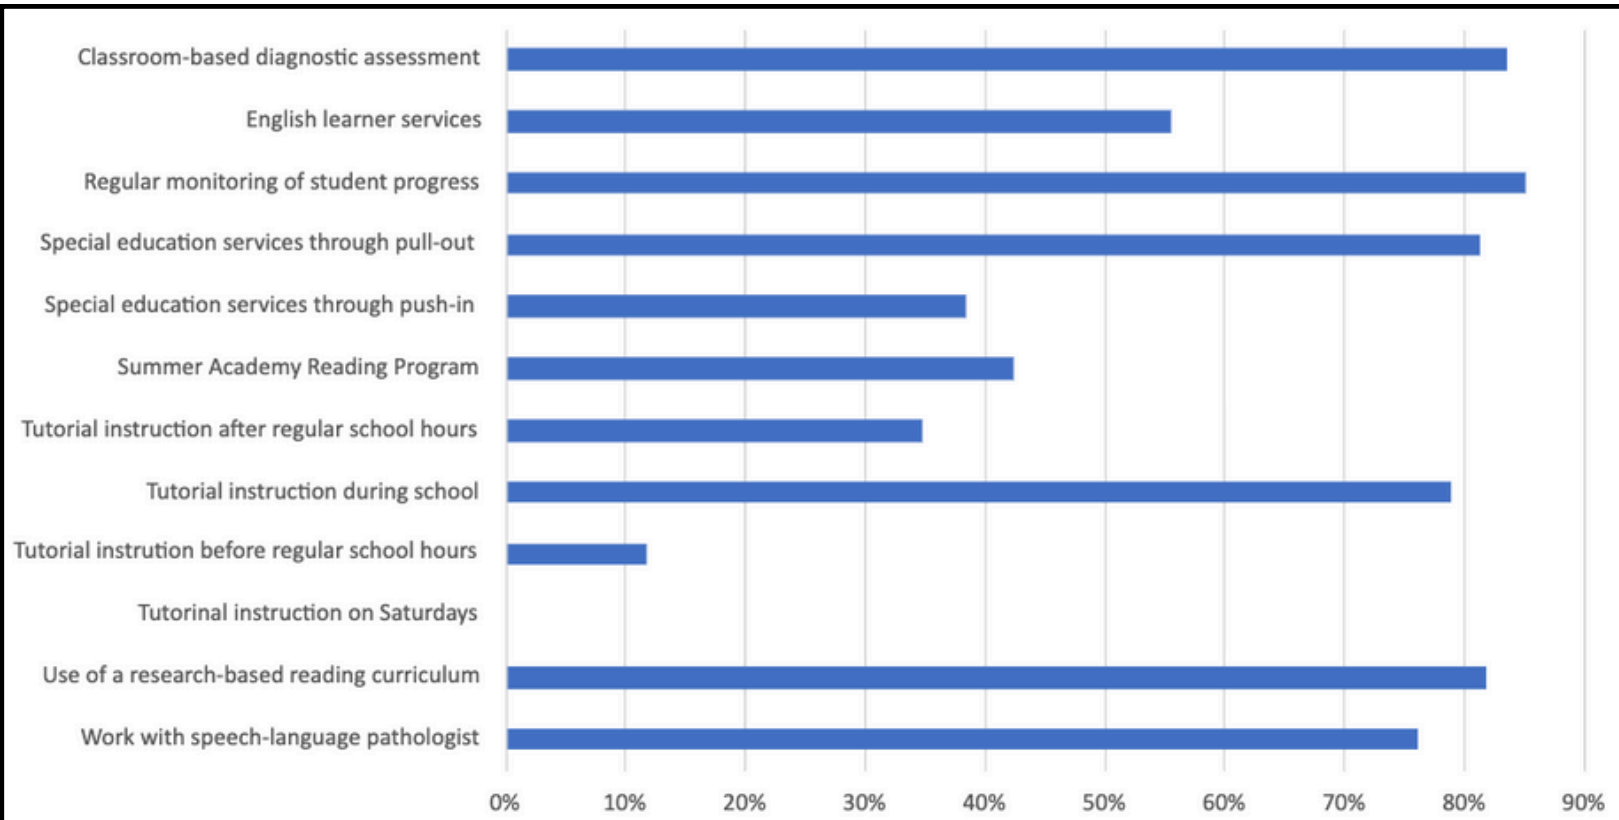

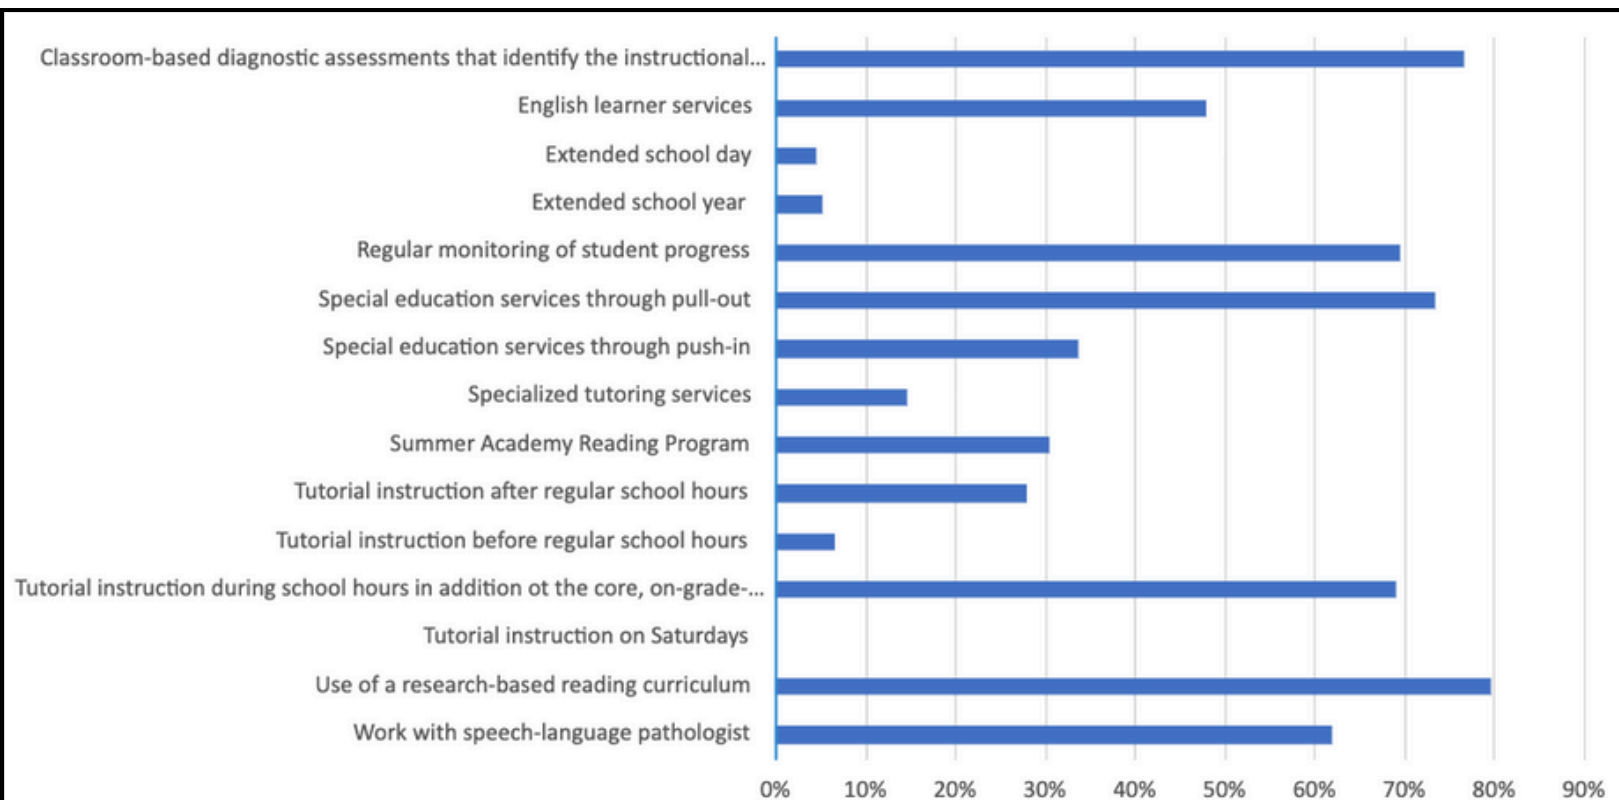

Figure 9. Instructional Methods and Practices for Students After Grade 3 Who Were Promoted with Good-Cause Exemptions or with Probation by the Student Reading Proficiency Team

Data Points of Interest:

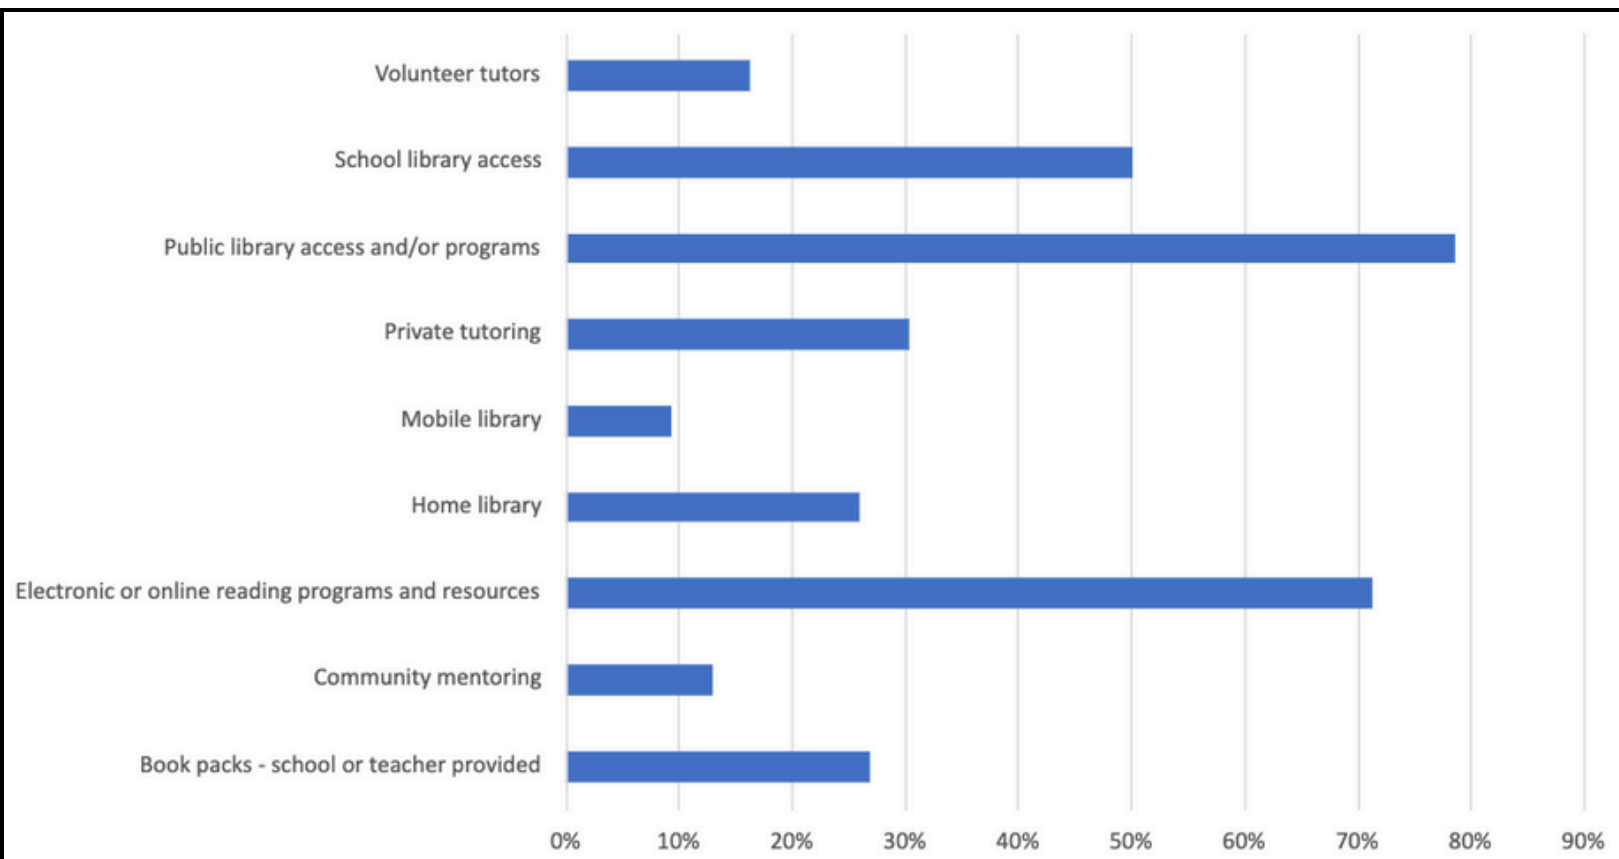

- 95% of schools who responded to the survey report implementation of the required 90-minute reading instruction time allocation.
- 84-90% of schools reported explicit, direct instruction in phonemic awareness, vocabulary, and phonics as shown in Table 16. This is a slight increase over last year. Explicit and direct instruction in these areas is proven to support reading proficiency for all students.
- As shown in Figure 7, guided reading with leveled books, listening to the teacher and sight word memorization are still being used by 66% of survey respondents. However, some of these instructional methods are not supported by evidence or research in the ability for all students to meet grade level targets.
- For students who are promoted through a good cause exemption, a varied list of supports and interventions are reported. Regular monitoring of student progress was reported at 69%, although 100% of students alternatively promoted should be regularly monitored.

QUESTION 8

► What types of reading resources do students have access to outside of school?

This question asked respondents to identify the reading resources available to students outside of school. This could include resources used after school, on weekends during the school year or over the summer. Several respondents indicated they were not aware of the resources available to students. It is important to note that while respondents report that these resources are available to students, it does not mean that all students have equitable access to reading resources dependent on factors outside of the responsibility or control of the school or student.

Figure 10. Reading Resources Accessible to Students Outside of School

Data Points of Interest:

- As Figure 10 shows, electronic or online reading programs and resources and public library access are reported as the top resources offered to students outside of school at 71% and 79%, respectively.
- All other resources, except for the use of the school library, are reported as being made available at or below 30% of the time.
- Many of the responses listed in this table and in the “other” category are based on specific school and community program availability.

Conclusion

Data indicates that Oklahoma students are steadily improving since the pandemic disrupted learning. Although pre-COVID performance levels have not yet been fully regained, the progress reflects the positive impact of recovery efforts. To further enhance student achievement, Oklahoma remains focused on three key objectives: adopting and implementing high-quality instructional materials, providing teacher support to apply the science of reading, and delivering continuous intervention support and training. These goals establish a comprehensive approach to reading instruction, ensuring students receive the needed instructional support necessary to achieve reading proficiency by the end of third grade.
