COMPREHENSIVE ANNUAL FINANCIAL REPORT

For the Year Ended December 31, 2002

Oklahoma Transportation Authority

A Component Unit of the State of Oklahoma

Oklahoma City, Oklahoma

Prepared by the Controller Division

About the OKLAHOMA TRANSPORTATION AUTHORITY

The Oklahoma Transportation Authority (OTA) is an instrumentality of the State of Oklahoma created by the State Legislature by statute in 1947 for the purpose of constructing, operating and maintaining the Turner Turnpike. In 1953, the original purpose was statutorily redefined to allow the construction of additional turnpikes, and changes were made in the Authority's membership to include a representative from each of Oklahoma's congressional districts. These changes were ratified by a statewide referendum in January 1954.

The Oklahoma State Legislature has the exclusive right to authorize turnpike routes. Subsequently, the OTA has the responsibility to complete engineering and economic feasibility analyses of the authorized routes before any turnpike can be constructed.

Turnpike bond sales must be approved by the Executive and Legislative Bond Oversight Commissions and must comply with all rules and regulations of the United States Treasury Department and the United States Securities and Exchange Commission.

All OTA debt is issued in accordance with the Trust Agreement dated February 1, 1989, as amended. Since inception, the OTA has provided essential, convenient, cost effective and safe roadways to its patrons.

Toll Revenue by Vehicle Class 86-87
Revenue Bond and Debt Service Coverage 88
Operating Expenses by Function 88
Traffic Accident Statistics and Enforcement and Motorist Assistance Statistics 89
Oklahoma and U.S. Demographic Statistics ... 90
Miscellaneous Statistics 91

This report is dedicated to the memory of Captain Ken Reed of the Oklahoma Highway Patrol. Captain Reed brought great integrity, loyalty and leadership to the Authority, and he will be greatly missed.

Introductory Section

OKLAHOMA TRANSPORTATION AUTHORITY

3500 Martin Luther King Avenue • P.O. Box 11357 • Oklahoma City, Oklahoma 73136-0357 • (405) 425-3600 • Fax (405) 427-8246

April 30, 2003

The Honorable Brad Henry,
Citizens of the State of Oklahoma and
Oklahoma Turnpike Bondholders

Systemwide net toll revenues for the Oklahoma Transportation Authority (OTA) during 2002 surpassed $176.4 million, exceeding 2001 net toll revenues by 7.5%. The opening of the Creek Broken Arrow South and Creek East Turnpike Extensions contributed significantly to this strong revenue growth. Please refer to the Management's Discussion and Analysis (MD&A) portion of this report for a detailed discussion of the OTA's financial performance. While an emphasis was placed on completing new extension construction, progress continued towards the rehabilitation and improvement projects identified in the 2002 portion of the OTA's comprehensive System rehabilitation plan to maintain safe, high quality roadways for its customers. In addition, the OTA refunded approximately $577.8 million in Revenue Bonds on May 14, 2002, reducing aggregate debt service payments over the next 20 years by roughly $50.9 million.

On behalf of the OTA, we are pleased to transmit this comprehensive annual financial report (CAFR) for calendar year 2002. The Controller Division prepared this CAFR in accordance with accounting principles generally accepted in the United States of America. Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests solely with the OTA. We believe that the data, as presented, is accurate in all material respects and that it presents fairly the financial position and results of the OTA's operations. This CAFR complies with Section 711 of our Trust Agreement, which requires that an audit of the financial statements shall be performed in accordance with generally accepted auditing standards each year.

The CAFR is presented in three parts:

1. The Introductory Section provides general information about the OTA and an overview of its operations during the year.
2. The Financial Section includes the independent auditors' reports, the MD&A, the basic financial statements, notes to the financial statements, and other supplementary information; and,
3. The Statistical Section contains selected key information about the Turnpike System and comparative, multi-year comprehensive annual financial information.

The OTA strives for the highest level of customer service, convenience and safety, and to manage our operations in an effective and cost efficient manner. It is our sincere hope that this CAFR will help everyone understand the OTA's financial and operational activities more fully.

Respectfully submitted,

THE OKLAHOMA TRANSPORTATION AUTHORITY

The Oklahoma Transportation Authority's (OTA) governing body (the Authority) consists of the Governor (ex-officio) and six members. The members are appointed by the Governor and approved by the State Senate. They serve eight-year, uncompensated terms and may be reappointed.

The Authority appoints the Director of the OTA. Ms. Holly Lowe is the Acting Director and Chief Financial Officer of the OTA, and Mr. Phil Tomlinson has been appointed as Oklahoma's Secretary of Transportation.

The Acting Director and Chief Financial Officer, with the management staff, supervises the daily operations of the organization. Authority members provide oversight and policy direction. They appoint various consulting entities with national reputations for excellence, including the General Counsel, Bond Counsel, Consulting Engineers, Consulting Traffic Engineers, Financial Advisor, Bond Underwriter(s) and Independent Auditor(s).

All action taken by Authority members and staff must be in strict compliance with the provisions of the OTA's Trust Agreement.

Senior Management

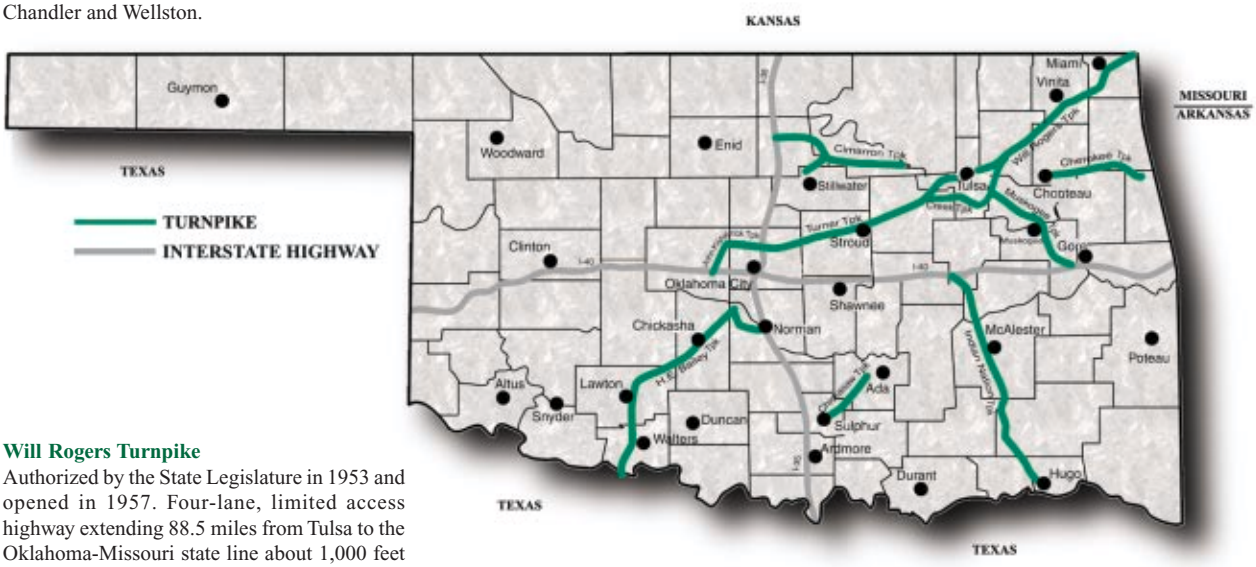
Standing left to right: **Wendy Smith** – Director of Finance & Revenue; **Duane Griffith** – Director of Maintenance; **Gary Brown** – Director of Information Technology; **Eric Strong** – Chief Engineer; **David Machamer** – Director of Toll Operations; **Lori Scott** – Controller; **Randy Moore** – Director of *PIKEPASS* Customer Service; **Captain Gerald Davidson** – Oklahoma Highway Patrol (not pictured)

Description Of
The Oklahoma Turnpike System

Turner Turnpike
Authorized by the State Legislature in 1947 and opened in 1953. Four-lane, limited access highway extending 86.0 miles from Tulsa to Oklahoma City. Interchanges at Sapulpa, Kellyville, Bristow, Stroud, Chandler and Wellston. Service station and/or restaurant with free restrooms at Heyburn, Bristow, Stroud, Chandler and Wellston.

Chickasaw Turnpike
Authorized by the State Legislature in 1987 and opened in 1991. Two-lane, limited access highway extending 27.1 miles from S.H. 7 west of Sulphur to S.H. 1 near Ada. Only 17.3 miles tolled, with interchanges at S.H. 7, U.S. 177 and Roff.

Cherokee Turnpike
Authorized by the State Legislature in 1987 and opened in 1991. Four-lane, limited access highway extending 32.8 miles from U.S. 412 at Locust Grove to U.S. 412 west of West Siloam Springs. Interchanges at Locust Grove, U.S. 412 and S.H. 10. Restaurant and service station with free restrooms at Leach.



Will Rogers Turnpike
Authorized by the State Legislature in 1953 and opened in 1957. Four-lane, limited access highway extending 88.5 miles from Tulsa to the Oklahoma-Missouri state line about 1,000 feet south of the southeast corner of Kansas. Interchanges at Claremore, Adair (S.H. 28), Big Cabin, Vinita, Afton and Miami. Service station and/or restaurant with free restrooms at Vinita and Miami.

H.E. Bailey Turnpike
Authorized by the State Legislature in 1953, the original 86.4 miles opened in 1964, and the 8.2 mile extension authorized in 1987 opened in 2001. The original four-lane, limited access, highway extending 86.4 miles opened in two sections: north section (61.4 miles) from Oklahoma City to U.S. 277 north of Lawton; south section (25.0 miles) from U.S. 277 south of Lawton to U.S. 70, 5.2 miles north of the Texas state line. Interchanges at Chickasha, Cyril, Elgin and Walters. Service station and/or restaurant with free restrooms at Chickasha and Walters. The four-lane, limited access extension runs 8.2 miles within Grady County from an interchange of the original H.E. Bailey Turnpike to S.H. 9. The route generally extends east and west through a rural area west of Norman.

Indian Nation Turnpike
Authorized by the State Legislature in 1955, north section (41.1 miles) opened in 1966 and south section (64.1 miles) opened in 1970. Four-lane, limited access highway extending 105.2 miles from U.S. 75/I-40 near Henryetta to U.S. 70 near Hugo. Interchanges at Eufaula, Ulan, McAlester, Daisy and Antlers. Service station and restaurant with free restrooms at Eufaula and Antlers.

Muskogee Turnpike
Authorized by the State Legislature in 1965 and opened in 1969. Four-lane, limited access highway extending 53.1 miles from Tulsa to I-40 near Webber Falls. Interchanges at Coweta, Muskogee and U.S. 64 near Webber Falls. Service station and restaurant with free restrooms at Muskogee.

John Kilpatrick Turnpike
Authorized by the State Legislature in 1987, the original 9.5 miles opened in 1991, and the 15.8 mile extension opened in sections during 2000 and 2001. Four-lane, limited access, urban highway extending 25.3 miles from the Oklahoma City interchange of the Turner Turnpike and I-35 to I-40 between Mustang and Sara Road. The route is generally along Memorial Road on the north, turning south parallel to Sara Road just west of County Line Road, passing by Lake Overholser on its west side parallel to Morgan Road to an interchange at I-40, giving access to traffic traveling east and west on the interstate system. Interchanges at Eastern Ave., U.S. 77/Broadway Extension, Western Ave., Pennsylvania Ave., May Ave., Portland Ave./Lake Hefner Parkway, Meridian Ave., MacArthur Blvd., Rockwell Ave., NW Expressway, Wilshire Blvd., S.H. 66 and N.W. 10th.

Cimarron Turnpike
Authorized by the State Legislature in 1965 and opened in 1975. Four-lane, limited access highway extending 59.2 miles on main route from I-35/U.S. 64 east of Enid to Tulsa, and 8.5 miles on a spur connecting the main route with Stillwater and Oklahoma State University. Interchanges at U.S. 77, U.S. 177, Stillwater, Morrison, S.H.18, Hallett and S.H. 48. Service station and restaurant with free restrooms at Lone Chimney.

Creek Turnpike
Authorized by the State Legislature in 1987, the original 7.4 miles opened in 1992, the 4.9 mile Creek West Extension opened in 2000, the 13.1 mile Broken Arrow South Loop opened in sections during 2001 and 2002 and the 9.0 mile Creek East Extension opened in 2002. Four-lane, limited access, urban highway extending 34.4 miles from the Turner Turnpike at S.H. 66 to the I-44 interchange of the Will Rogers Turnpike, providing access to traffic traveling east into Tulsa and south to Okmulgee; continues generally through the city of Broken Arrow to the Muskogee Turnpike; then north to the Will Rogers Turnpike. Interchanges at South 49th West Avenue, U.S. 75, Peoria Avenue, Riverside Drive, Yale Avenue, U.S. 64/Memorial Drive, U.S. 169, South 129th East Avenue, South 161st East Avenue, South 193rd East Avenue, East 101st Street, S.H. 51, Muskogee Turnpike, 71st Street, 51st Street, 31st Street, 11th Street, Highway 412 and Pine Street.

2002 HIGHLIGHTS

Building a comprehensive transportation infrastructure for the entire state of Oklahoma -- its people, its visitors, its commerce -- is the number one mission of the OTA. This transportation backbone provides power to enrich the lives of Oklahomans and builds commerce and economic development opportunities that will continue to attract business to the state. The OTA makes major contributions to Oklahoma's economic health and growth by providing internationally recognized leadership in turnpike and transportation management.

The OTA fulfilled its commitment to construct an urban corridor around Tulsa and Oklahoma City with the opening of the Creek East Turnpike Extension in Tulsa on September 18, 2002. The $622 million construction program began in 1998 to extend not only the Creek Turnpike, but also the John Kilpatrick Turnpike in Oklahoma City and the H.E. Bailey Turnpike's Norman Spur. This historic achievement was commemorated with a patriotic dedication ceremony that included Oklahoma's Governor and Lieutenant Governor, the OTA's Authority members, staff, consultants and contractors as well as mayors, city officials and chamber of commerce representatives from the surrounding cities of Bixby, Broken Arrow, Catoosa, Glenpool, Jenks, Sapulpa and Tulsa.

The OTA celebrated the completion of the urban corridors around Tulsa and Oklahoma City on September 18, 2002.

The construction of the new extensions has resulted in an economic explosion along each of these roadways. Communities surrounding Tulsa have expressed support for the new Creek Turnpike Extensions. The former president of the Sapulpa Chamber of Commerce commended the Creek West Turnpike Extension for raising the overall awareness of Sapulpa and what it has to offer businesses, industries and residents. The extension has been a catalyst for economic development in the area and has helped to promote more broadly Sapulpa's positive image. At the ribbon-cutting ceremony to open the new Broken Arrow branch of the Arkansas Valley State Bank, the Broken Arrow South Loop was credited for bringing the bank into an area that is poised for growth. A new Wal-Mart store and shopping center are already under construction in this area. In Glenpool, a major trucking company elected to relocate to this area primarily for easy access to several turnpikes. That company is now a major employer in Glenpool.

Towns surrounding Oklahoma City have also enjoyed benefits from the new extensions. According to Yukon's City Manager, the recent extension to the John Kilpatrick Turnpike has brought new business and new interest to Yukon. The highway has stimulated new housing development, which in turn has spurred retail development. The turnpike also has enhanced development around Route 66, Yukon's Main Street. Some of the new commercial developments include a retail strip center, regional hospital and dental office. Developers hope this will become an area-wide draw, attracting shoppers from surrounding towns. Another growth area is in far northwest Oklahoma City in the Piedmont School District where a large number of houses have been platted since construction began on the John Kilpatrick Turnpike Extension.

Oklahoma's turnpikes are among the smoothest roads in the nation.

Oklahoma's turnpikes are among the smoothest roads in the nation, according to the American Concrete Pavement Association, and have received countless awards for excellence in highway construction. The newly constructed urban turnpikes are no exception. During 2002, the American Concrete Paving Association selected a section of the Creek Broken Arrow South Loop as Runner Up for their Excellence in Concrete Paving Award. To receive this type of national recognition, the pavement can deviate from perfection by less than one inch per mile. The OTA recently received notification that it has been selected to receive national recognition for asphalt smoothness on the H.E. Bailey Norman Spur. The Oklahoma Asphalt Pavement Association recognized the OTA with two prestigious state awards. The first was Winner of the Full Depth Award for the asphalt pavement section of the Creek East Turnpike Extension including its tie-in with the Will Rogers Turnpike. The second award was Runner Up for the Rural Overlay Award for asphalt overlay on the Indian Nation Turnpike.

Nearly 50 years ago, the Oklahoma Legislature empowered the OTA to engage in the most leading edge, entrepreneurial means possible to bring contemporary commerce, employment and enhanced lifestyle opportunities to the people of Oklahoma. Through this empowerment, the Turner Turnpike was constructed. The contribution the Turner Turnpike has made to Oklahoma's infrastructure was recognized in 2002 by the American

Road and Transportation Builders Association (ARTBA) during their 100th Anniversary celebration. Commemorating their anniversary, the ARTBA conducted a national survey to identify the top transportation infrastructure projects and public officials of the 20th century in all 50 states. The Turner Turnpike was selected as one of Oklahoma's top two transportation infrastructure projects, and Neal A. McCaleb, the former Oklahoma Secretary of Transportation and Director of OTA, was chosen as one of Oklahoma's top two public officials. The award ceremony was held on August 22, 2002 at the OTA's Neal A. McCaleb Transportation Building.

The Turner Turnpike was selected as one of Oklahoma's top two infrastructure projects of the 20th century.

No tax appropriations are used to operate Oklahoma's turnpikes. The System pays its debt service and manages its operations strictly with revenue from toll collections. Annual toll revenues for 2002 generated over $176.4 million and represented a 7.5% growth over 2001 toll revenues. The new turnpike extensions contributed to outstanding revenue growth rates of 20.5% on the John Kilpatrick Turnpike and 46.0% on the Creek Turnpike above 2001. The six turnpikes constructed before 1990 reported a 4.0% increase in annual toll revenues over those of 2001. The annual revenue growth for the four newer turnpikes was 24.6% over 2001 annual toll revenues. Toll transactions surpassed 111.3 million in 2002, a substantial 13.0% increase over transactions in 2001.

Net revenues in 2002 exceeded projections by 7.1%. Revenue fund operating expenses for 2002 were a significant 7.9% below the annual operating budget through cooperation and continued effort among the divisions to monitor costs under the direction of the Authority's Acting Director and Chief Financial Officer. The efforts to monitor costs have also contributed to the senior and total debt service ratios continuing to achieve anticipated results.

The OTA received improved bond ratings from three municipal credit research companies on New York's Wall Street. Standard & Poor's upgraded the OTA's bonds from an A to an AA-; Moody's Investors Services upgraded the bonds from an A1 to an Aa3; and Fitch, rating the OTA's bonds for the first time, gave the bonds an AA- rating. Moody's upgrade report stated the OTA's high rating was a result of primary credit strength

derived from its strong financial and operational performance and strong emphasis on cost containment. Moody's also stated that the OTA exhibits by far the lowest operating costs relative to its size of any Moody's Aa3 rated toll roads. The Standard & Poor's report attributed the upgraded bond rating to an experienced and strong management team that has historically demonstrated sound fiscal policies and prudent business decisions. The Fitch report stated that the OTA's financial performance is strong, providing ample debt service coverage on existing bonds as well as funding ongoing significant capital needs. All three firms refer as key to the OTA's positive ratings the OTA's five-year plan to use net income remaining after debt service to fully fund its capital improvement plan. Because of these ratings upgrades, the OTA attained substantial savings on bond insurance and in coupon savings on the 2002 bond refunding.

The OTA saved approximately $2.5 million per year from 2003-2022 by refunding bonds.

Spotless audits and a bond rating excellent by Wall Street standards provide the OTA the buying power to make healthy investments. On May 14, 2002, bids were opened for the Series 2002A and 2002B Refunding Second Senior Revenue Bonds. These bonds were issued to refund $577,810,000 in Revenue Bonds from the remaining Series 1989 Bonds, the Series 1992A-E Bonds and portions of the Series 1992F&G Bonds. Following the bid opening, the bonds were resized to provide the amount of proceeds necessary to cover costs and the exact amount of the proceeds required to fund the refunding escrow from the date of closing, May 23, 2002, to July 1, 2002, the call date of the refunded bonds. The par amount of the new bonds was $314,065,000 for the Series 2002A Bonds and $255,575,000 for the Series 2002B Bonds. Bidders included Merrill Lynch, JP Morgan, Salomon Smith Barney, Morgan Stanley/Dean Witter and A.G. Edwards. Both issues were very competitively bid with the bids on the Series 2002A within one basis point and the bids on the Series 2002B within three basis points. The successful bidder on both the Series 2002A and 2002B was Merrill Lynch with a true interest cost for the Series 2002A of 4.819692% and a true interest cost for the Series 2002B of 4.832711%. The sale was very favorable resulting in gross savings, net of all costs for both series, of $50,923,956 or approximately $2.5 million per year from 2003 until 2022. The net present value savings was $32,583,380.

The OTA is comprised of many individuals that possess outstanding leadership abilities. Mr. Tim Stewart, the OTA's Director of Planning and Operations, received the highly esteemed Government Official of the Year Award for the innovative use of diamond grinding and area wide maintenance contracting in Oklahoma by the International Grooving and Grinding Association. Mr. David Machamer, the OTA's Toll Division Director, was appointed to the board of directors of the International Bridge, Tunnel and Turnpike Association (IBTTA), an international association that promotes safety and convenience through toll financing. Mr. Carl Selby, the OTA's Chief Internal Auditor, serves his country as a helicopter pilot for the Oklahoma National Guard where, if activated, he will fly Black Hawk helicopters to deploy Medevac units and collect injured soldiers. During 2002, Mr. Eric Strong joined the OTA's management team as the OTA's Chief Engineer. As a professional engineer, Mr. Strong's experience prior to coming to the OTA includes designing for turnpike construction; cleaning-up asbestos, fuel spills, and water pollution; and designing engineering projects for the Air Force.

The OTA's five year plan for using net income after debt service to fund capital improvements is key to the OTA's postive bond ratings.

The intuitiveness of the OTA's leadership is essential in the success of the five-year Capital Plan for maintenance, rehabilitation and improvements, first adopted in 1994. The plan identifies the Turnpike System's needs over the next 20-30 years and then prioritizes the needs into five-year segments to achieve the goals of the Authority. The OTA reviews the plan annually and makes updates, if necessary. Through this comprehensive asset management effort, the OTA annually invests in System rehabilitation at a rate that approximates the 30-year straight-line depreciation of its infrastructure. When the next five-year segment of the Capital Plan is complete, Oklahoma motorists will travel over more than 100 miles of revitalized pavement and as many as 25 reconditioned bridges.

Significant improvements identified in the 2002 portion of the Capital Plan to extend pavement life and improve the ride quality include diamond grinding, dowel-bar retrofit and replacement of cracked slabs on 17 miles of the Cherokee Turnpike and concrete overlay on the Will Rogers Turnpike at the Vinita concession area. Shoulder reconstruction to prevent erosion and preserve roadway integrity has been performed along ten miles of the Muskogee Turnpike. Bridge rehabilitations include four bridges

on the H.E. Bailey Turnpike, two bridges on the Will Rogers Turnpike and one bridge each on the Muskogee and Turner Turnpikes. Minor substructure repairs are continually addressed, and preventive maintenance is performed to extend the length of time between major rehabilitation projects.

The 2003 portion of the Capital Plan proposes funding from cash resources of over $55.9 million. Approximately 77.8% of this funding is apportioned to road and bridge rehabilitation projects, and the remaining 22.2% is apportioned to other capital projects. Planned road and bridge improvements include pavement rehabilitation of sections of the Turner, Will Rogers and Chickasaw Turnpikes, bridge rehabilitation on the Muskogee, Turner, H.E. Bailey, Will Rogers and Cherokee Turnpikes, toll plaza reconstruction at Sapulpa on the Turner Turnpike, slope and shoulder rehabilitation and scour counter measures on the Cherokee and Indian Nation Turnpikes and the construction of salt storage buildings on the H.E. Bailey and Will Rogers Turnpikes. Other capital projects include the purchase of new *PIKEPASS* transponders, *PIKEPASS* refurbishment and the purchase of Oklahoma Highway Patrol (OHP) cars.

Throughout the System, crews routinely perform maintenance to roads and existing drainage structures. Inmates, supervised by turnpike employees, assist with trash removal, mowing, weed control, fence repair/replacement and brush removal. The outsourcing of this work through inmate labor remains a key element to decreasing the cost of the maintenance program by requiring fewer full time equivalent employees.

Maintenance crews are ready to respond, as dispatched, to urgent situations throughout the System such as motorist assists, motorist accidents, chemical spills, fires and snow removal. During 2002, maintenance crews worked long hours battling severe winter storms. As a result, crews plowed and sanded over 91,800 lane miles and treated over 3,500 lane miles with magnesium chloride. The total spent for these winter storms exceeded $1.5 million.

With the nation at "high" risk for a terrorist attack, the OTA places a very high priority on safety. To provide the traveling public the safest possible roadways, the OTA contracts with the Oklahoma Department of Public Safety for the services of the OHP. The presence of the OHP troopers enforcing traffic laws, regulating and directing traffic movement and assisting citizens safeguards the public. The OHP's cooperation with other law enforcement officers and public officials provides timely, relevant information in the event of an emergency. The OHP troopers do an outstanding job promoting turnpike safety through various programs including the special enforcement emphasis program, speed monitoring awareness radar trailers, aircraft traffic enforcement program, size and weights enforcement and the use of lasers for speed enforcement.

OTA's troopers not only preserve the safety on the highways, but also preserve the highways.

The commercial vehicle enforcement troopers possess a great knowledge of the size and weights laws and perform commercial vehicle tasks in their general enforcement programs. These troopers not only preserve the safety on the highway, but also preserve the highways themselves since trucks that are overweight by 20% deteriorate the pavement life exponentially. Because of this effort, accidents involving commercial vehicles have declined, and the decline can be attributed to safer and more responsible driving habits being displayed by this portion of the traveling public in response to the efforts of the OTA troopers.

In response to customer requests, the OTA initiated a speed limit study to increase turnpike speed limits to match those of intersecting interstates. On August 16, 2002, Commissioner Bob Ricks of the Oklahoma Department of Public Safety approved OTA's initiative to increase the speed limit on the John Kilpatrick Turnpike in Oklahoma City from 65 to 70 miles per hour. This increase affects all of the John Kilpatrick Turnpike. Commissioner Ricks also approved an increased speed limit on a small section of the Creek Turnpike in Tulsa from 65 to 75 miles per hour. The area that experienced the increased speed is approximately a 4-mile stretch extending from the Turner Turnpike to U.S. 75.

The OTA opened renovated side gates at Bristow and Big Cabin during 2002.

The OTA demonstrates its dedication to excellence in customer service by providing efficient collection of tolls, courteous disbursement of information and assistance to the traveling public. The OTA's toll collectors are ambassadors for the state of Oklahoma and continually enhance their services through training and operational enhancements.

Mr. Don Quickle and Mr. Willard Parish are outstanding examples of the character among the OTA's toll attendants. Mr. Quickle, toll collector at the Walters Toll Plaza on the H.E. Bailey Turnpike, retired this year after 38 years of dedicated service as the OTA's longest-tenured active Toll Division employee at the time of his retirement. Mr. Quickle believes the key to his success is in his philosophy to always try to treat people right. Mr. Quickle has seen everything from tornadoes passing over the turnpike to frayed fathers-to-be and expectant mothers on their way to the hospital. Mr. Parish, toll collector at the Bristow Toll Plaza on the Turner Turnpike, earned a Silver Star for his heroic actions during the Vietnam War. Mr. Parish was key in the success of the first major battle in the war. The movie "We Were Soldiers Once..." was based on the story of the battle Mr. Parish was involved in and of the soldiers who fought there. The OTA believes it is important to honor the "heroes among us" whether they are soldiers, policemen, firemen or people doing heroic things in their ordinary course of life.

The OTA opened the first two of 11 renovated side gates featuring updated toll collector booths, free-flowing *PIKEPASS* lanes and aesthetically pleasing canopies at Bristow on the Turner Turnpike and Big Cabin on the Will Rogers Turnpike. These new side gates provide patrons with faster and more efficient service.

The OTA is focused on the enhancement of its electronic toll collection system for the over half-a-million users that utilize the automatic toll collection lanes each day. The new program refines the enforcement process, adding airtight integrity to the entire system. Customers save time and money by using *PIKEPASS* tags, while improving the efficiency of highway travel by eliminating the inconvenience and delays associated with paying tolls manually. *PIKEPASS* customers with 20 or more qualifying toll transactions in a month, save an additional 5% through participation in the volume discount program. During 2002, over $2.1 million in *PIKEPASS* volume discounts were given to customers, a 19.2% increase over 2001.

The customer service agent program was successful during 2002. Program participants issued approximately 65,000 *PIKEPASS* tags, roughly 45% of all *PIKEPASS* tags issued for the year. Customers can select from two *PIKEPASS* stores, six commercial partnerships or 69 tag agencies throughout Oklahoma that are authorized *PIKEPASS* agents and have the ability to provide customer service functions. A new service called Transponder Replacement Program (TRiP) is available for *PIKEPASS* customers on the OTA website at www.pikepass.com. Customers enter their *PIKEPASS* tag number to determine if it is time for their *PIKEPASS* tag to be recycled. If it is time, TRiP offers the customer an option to recycle by means of the OTA website or to locate directions to the nearest *PIKEPASS* outlet. As of December 31, 2002, active *PIKEPASS* tags totaled 582,742, and active *PIKEPASS* accounts totaled 328,846, an approximate 11.8% increase over the number of active *PIKEPASS* accounts as of December 31, 2001.

Hundreds of miles of fiber optic cable run throughout right-of-way easements along Oklahoma's roadways, providing a means of transportation for many forms of digital communication. The OTA is connecting its toll collection facilities to the OTA's fiber optic network. Since the implementation of the fiber optic network, the OTA has eliminated the cost of many externally provided telephone circuits by utilizing this fiber optic network. The OTA's Internal Audit Branch also utilizes this fiber optic network to obtain video images digitally and expedite the toll audit process. This eliminates the need for VCRs at each toll plaza, which were a considerable expense and labor intensive to maintain.

Another form of technology utilized by the OTA is document imaging. As of December 31, 2002, the OTA has scanned and placed over 1.7 million documents into electronic storage. This document-imaged information has also been placed on DVD at the Oklahoma Department of Libraries.

ECONOMIC TRENDS AND OUTLOOK

Northeastern State University in Broken Arrow was constructed along the Broken Arrow South Loop Extension.

At this time, it is still uncertain how the current war with Iraq will affect the United States' economy. The country has begun recovery from the economic devastation of the September 11th terrorist attacks, but with scandals in corporate America shaking the trust of the American people, economic recovery is slow. However, according to the "2003 Oklahoma Economic Outlook" published by the College of Business Administration of Oklahoma State University (OSU), the U.S. economy is already on an upswing with recovery well underway. The report cautions, however, that this recovery continues to be jobless as unemployment increased to 6% during the final two months of 2002. This trend is not atypical, as the 1990's recession that ended in March 1991 did not show month-to-month job gains start to materialize until March 1992. The study predicts that consistent month-to-month job gains are just around the corner. This optimism is contingent on a quick and successful war with Iraq and the absence of any large-scale terrorist attacks on the home front.

The publication "Global Insight" agrees, stating that if the war is quick and successful in the early part of 2003, the impact might be a boost to the economy resulting from higher defense spending. The publication cautions that if the war takes longer, the result could be the opposite: higher oil prices, lower consumer confidence, and a hit to the stock market resulting in a deeper recession.

The Congressional Budget Office (CBO) states in its January 2003 report entitled "The Budget and Economic Outlook: Fiscal Years 2004-2013" that there are indeed some indicators pointing to a brighter outlook for the economy this year. The report states that the stock market has moved slowly upward since its low point in October 2002 and that business spending on equipment and software has strengthened. The CBO report concurs with the report from OSU, expecting the recovery to continue at about the same pace as the recession recovery of 1990-1991.

Although Oklahoma is in the midst of a fiscal crisis with revenue collections coming in substantially below budget, the State is not alone. State budgets have rarely, if ever, been in worse condition than they are today. According to the National Association of State Budget Officers (NASBO), the cumulative national deficit for state budgets stands at $40 billion in this fiscal year alone. Along with other states, Oklahoma has been growing its spending faster than the underlying population growth and inflation. Even as the economy turned down and revenue growth began to sag, spending growth continued to accelerate. This growth in government spending is difficult to turn around.

According to OSU's 2003 report, Oklahoma posted an increase in the number of jobs during 2002 despite the national decline. Growth of .44% from November 2001 to November 2002 gave Oklahoma the 11th best job growth performance in the nation. This made Oklahoma one of only twenty states that posted job gains during that period. Other economic indicators also looked good for Oklahoma. Per capita income increased 4.3% in Oklahoma compared to just 2.4% nationally. With the dependence on the energy sector and the diversification of the State's economy, Oklahoma's economy relies heavily on and mirrors the national economy. Even as the Oklahoma economy has shown clear signs of improvement, the resulting boost to the State revenues will take time to catch up.

With the State's disparity between revenues and outlays, the State legislature and the Governor have the challenging task of developing long-term solutions to weather the State's fiscal crisis and stimulating the State's economic development. The OTA has stimulated economic development throughout the State with its $622 million urban turnpike construction program that was completed in the latter part of 2002. The building of the John Kilpatrick Turnpike has resulted in millions of dollars in commercial building permits being issued by the City of Oklahoma City along its corridor. This demonstrates the impact that improved access in growing areas can have on local economies. The east end of the Turner Turnpike is the most heavily traveled section. Because the Creek West Extension has been constructed, traffic previously traveling through the central, more congested, section of Tulsa will now be diverted to south Tulsa. South Tulsa has seen a boon in the economy in this area due to the construction of the Creek West Turnpike. The Creek East and Broken Arrow South Extensions that extend the current Creek Turnpike to the Will Rogers Turnpike opened to traffic in August of 2002. These infrastructures will provide easier access for industries that are contemplating locating in various parts of Oklahoma, which in turn could bring new sources of much needed revenues to the State of Oklahoma.

FINANCIAL INFORMATION

Internal Controls

It is necessary to establish and maintain internal controls designed to provide reasonable assurance that assets are safeguarded against loss, theft or misuse and to ensure that reliable and adequate accounting records are maintained. In fulfilling this responsibility, estimates and judgments are required to assess the expected benefits and related costs of internal control structure policies and procedures. The Authority believes that the organization's internal control structure adequately safeguards assets and provides reasonable assurance of proper recording of financial transactions.

Fiduciary Operations

The OTA's Trustee, Bank of Oklahoma, works closely with financial management and staff to ensure that the OTA is in compliance with the terms and covenants of its Trust Agreement and that all financial and operational decisions are made in the best interest of the OTA's bondholders.

Debt Administration

As of December 31, 2002, the OTA's outstanding debt, net of unamortized discount and net deferred debit on refundings, was approximately $1,245,000,000. The current portion of this debt totals $10,155,000. Final maturity on this debt is scheduled for the year 2028.

Cash Management

All deposits were either insured by federal depository insurance or collateralized. Throughout the year, available cash was invested in U.S. Government obligations, repurchase agreements, and guaranteed investment contracts. All investments, other than the guaranteed investment contracts, were classified in the category of highest quality rating of credit risk, as defined by the Governmental Accounting Standards Board (GASB). The guaranteed investment contracts were either rated within the two highest quality ratings of credit risk by Moody's Investors Service and Standard and Poor's Corporation (S&P) or collateralized by U.S. Government securities in an amount equal to 105% of the outstanding principal. At the direction of the Authority, all investments were made by the Trustee in strict compliance with the provisions of the Trust Agreement.

Risk Management

The OTA maintains an aggressive safety and loss prevention program that is staffed by a full-time safety officer. Insurance policies are purchased for normal business risk at favorable rates through the Oklahoma State Office of Risk Management. All major areas of operations are covered, including buildings and contents, bridges, workers' compensation, and general, personal injury and auto liability. The OTA also maintains surety bonds covering Authority Members, and a directors' and officers' insurance policy that provides a broad range of coverage against liability to the OTA, its Authority Members, management and staff.

Flow of Funds

Section 507 of the Trust Agreement dated February 1, 1989, establishes the flow of funds with which the OTA must comply. The OTA must deposit toll and other revenues from its operations into the Revenue Fund on a daily basis. All monies in the Revenue Fund at the end of the month (less a reserve for current operating expense not to exceed 20% of the amount of current operating expenses shown in the OTA's latest budget) are transferred and deposited as follows: 1) bond service accounts in accordance with their respective lien hierarchy for the purpose of paying bond principal and interest; 2) bond reserves in accordance with their respective lien hierarchy for the purpose of ensuring sufficient monies are available to make bond principal and interest payments in the event that current revenues are insufficient; 3) the Reserve Maintenance Fund for the purpose of paying special maintenance expenses to keep the Turnpike System in good repair; 4) the balance to the General Fund for any other lawful purpose.

Under the OTA's Enabling Act and amendments thereto, a portion of the motor fuel excise taxes collected on fuels consumed on the turnpikes is made available to the OTA from the Oklahoma Tax Commission. Since July 1, 1992, the motor fuel tax monies have been apportioned to the OTA on the first day of each calendar month. All motor fuel taxes apportioned to the OTA are available to fund debt service to the extent monies are not otherwise available. If such motor fuel excise taxes apportioned to the OTA are not necessary in such month, the fuel tax monies shall be paid immediately to the Oklahoma Department of Transportation (ODOT). During 2002, the OTA received, and

immediately remitted to ODOT, all of the $32,804,885 of motor fuel excise taxes apportioned to the OTA during the year.

Basis of Accounting

The operations of the Authority are accounted for as an enterprise fund on an accrual basis in order to recognize the flow of economic resources. Under this basis, revenues are recognized in the period in which they are earned, expenses are recognized in the period in which they are incurred, depreciation of assets is recognized, and all assets and liabilities associated with the operation of the Authority are included in the Statements of Net Assets. The prevailing Trust Agreement and supplements thereto dated February 1, 1989 require that the Authority adopt accounting principles generally accepted in the United States of America (GAAP) for government entities; but it also requires that certain funds and accounts be established and maintained. The Authority consolidates these funds and accounts for the purpose of enterprise fund presentation in its external financial statements.

Financial Results From Operations

Toll revenues for 2002 generated over $176.4 million and were 7.5% higher than 2001 toll revenues.

Annual toll revenues generated over $176.4 million in 2002, a strong 7.5% growth over 2001. Toll transactions surpassed 111.3 million for 2002, resulting in an impressive 13.0% increase over 2001. Concession revenues generated approximately $1.2 million.

Total operating expenses were approximately $48.8 million in 2002, a 6.4% increase over total operating expenses in 2001. Revenue Fund operating expenses for 2002 were held to a significant 7.9% below the annual operating budget. Increased operating costs related to the new turnpike extensions include the operation and maintenance of the new attended lane locations, road maintenance including privatization contracts and additional OHP troopers to patrol the new extensions. Engineering expenditures decreased 32.4% primarily due to the completion of two non-capitalizable projects in 2001. Feasibility studies were conducted in 2001 but the projects were not undertaken, and therefore the projects were not capitalized. The OTA's efforts to minimize operating costs have also contributed to the senior and total debt service ratios continuing to achieve budgeted results. These results exceed trust requirements on a rolling twelve-month basis by approximately 60.0%.

BUDGETARY CONTROL

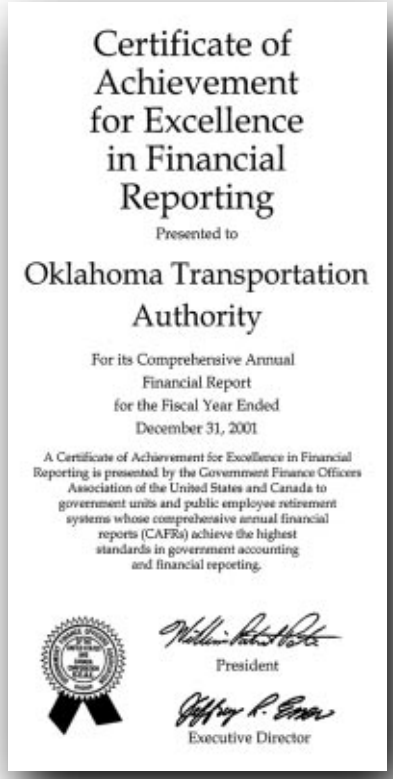
The OTA prepares an annual budget of current operating expenses and monthly deposits to the Reserve Maintenance Fund in compliance with the Trust Agreement and adopts a capital improvement plan each year. The budget is adopted on a modified accrual (non-GAAP) basis wherein expenditures are recognized on a cash basis and depreciation is not budgeted as an expenditure. Budgets are controlled at the division level, and the object of the budgetary controls is to ensure compliance with the provisions of the Trust Agreement. The Director may approve changes within the budget at any level, but an increase in the total budget must be approved by the Authority. Monthly reports of actual expenses versus budgeted expenses are provided to the Authority and management. Unexpended budget balances lapse at fiscal year end. Project-length financial plans are maintained for capital projects.

During November 2002, the Authority adopted the calendar year 2003 Annual Budget. The 2003 Annual Budget for operating and maintenance of the Turnpike System is $51,852,000. The Operating and Maintenance Budget reflected a minimal increase over the 2002 Budget, increasing only 3.75%. The Existing System Budget for the turnpikes constructed prior to 1998 increased a mere $194,170, or .44%. The balance of the Operating and Maintenance Budget increase is necessary for the operation of the new extensions and other new programs. The 2003 Annual Budget also includes $55,905,861 in funding for the projects identified for 2003 in the five-year Capital Plan.

INDEPENDENT AUDIT

The Trust Agreement requires an annual audit of the financial statements by an independent accounting firm. The required audit has been performed for the year ended December 31, 2002 by our independent auditors, KPMG LLP.

SPECIAL AWARDS



Certificate of Achievement for Excellence in Financial Reporting

Presented to

Oklahoma Transportation Authority

For its Comprehensive Annual Financial Report for the Fiscal Year Ended December 31, 2001

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

President

Executive Director

The Government Finance Officers Association of the United States and Canada (GFOA) presented an award for Distinguished Budget Presentation to the Authority for its annual budget for the year beginning January 1, 2002.

In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan and as a communication device.

The award is valid for a period of one year only. This is the eleventh consecutive year that the OTA has earned this award. The OTA is one of the only two state agencies in Oklahoma to receive this award.

The GFOA awarded a Certificate of Achievement for Excellence in Financial Reporting to the Oklahoma Transportation Authority for its Comprehensive Annual Financial Report (CAFR) for the year ended December 31, 2001. The Certificate of Achievement is a prestigious national award, recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized CAFR that conforms to program standards. Such CAFR must satisfy both accounting principles generally accepted in the United States of America and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The OTA has received a Certificate of Achievement for the last twelve consecutive years (years ended December 31, 1990-2001). The OTA's award is among 26 awarded throughout the state and is one of only six received by state agencies in Oklahoma. The Authority believes its current report continues to conform to the Certificate of Achievement program requirements, and it will be submitted to the GFOA.

ACKNOWLEDGMENTS

Grateful appreciation is extended to the entire management staff of the OTA for their professional contributions to this report. Thanks also to the Controller Division and Finance and Revenue Division staff who prepared the report, to the Oklahoma Department of Transportation Office Services Division who provided photography services and to our independent auditors for their participation in the review of this report.

Special appreciation is extended to Governor Brad Henry, the Authority Members and Acting Director and Chief Financial Officer Holly Lowe. To all of you, your support of the Authority's efforts to excel in the operational and financial management of the OTA is sincerely appreciated.

Financial Section

Oklahoma Transportation Authority
Management's Discussion and Analysis
Years Ended December 31, 2002 and 2001

This section of the OTA's annual financial report presents our discussion and analysis of the OTA's financial performance during the fiscal year that ended December 31, 2002. Please read it in conjunction with the transmittal letter in the introductory section of this report and the OTA's financial statements, which immediately follow this section.

FINANCIAL HIGHLIGHTS

- Toll revenues surpassed $176.4 million in 2002 and were 7.5% higher than toll revenues in 2001. Toll transactions for 2002 exceeded 111.3 million, a strong 13.0% increase over 2001.
- Total operating expenses approached $48.8 million in 2002. The 6.4% increase in total operating expenses over 2001 is primarily due to the additional operating costs for the new extensions to the Turnpike System. Operating expenses for 2002 were held to a significant 7.9% below the annual operating budget.
- Total net assets at December 31, 2002 grew to approximately $246.4 million, 5.8% higher than total net assets at December 31, 2001.
- The OTA refunded approximately $577.8 million in Revenue Bonds on May 14, 2002, reducing aggregate debt service payments over the next 20 years by roughly $50.9 million.

OVERVIEW OF THE FINANCIAL STATEMENTS

The financial section of this annual report consists of three parts: management's discussion and analysis (this section), the basic financial statements and the notes to the financial statements, and other supplementary information.

The financial statements provide both long-term and short-term information about the OTA's overall financial status. The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements are followed by a section of other supplementary information that further explains and supports the information in the financial statements.

The OTA's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units on an accrual basis. Under this basis, revenues are recognized in the period in which they are earned, expenses are recognized in the period in which they are incurred, and depreciation of assets is recognized in the Statements of Revenues, Expenses, and Changes in Net Assets. All assets and liabilities associated with the operation of the Authority are included in the Statements of Net Assets.

The Statements of Net Assets report the OTA's net assets and how they have changed. Net assets – the difference between the OTA's assets and liabilities – is one way to measure the OTA's financial health or position. The increase in the OTA's net assets during 2002 is an indicator of its strong financial health.

FINANCIAL ANALYSIS OF THE OTA

Net Assets

The OTA's total net assets at December 31, 2002 surpassed $246.4 million, a healthy 5.8% increase over December 31, 2001. (See Table A-1.) Total assets decreased 0.5% to $1,600.5 million, and total liabilities decreased 1.6% to $1,354.2 million. Total net assets at December 31, 2001 reached approximately $232.9 million, a 21.4% increase over December 31, 2000. Total assets that year increased 1.0% to $1,609.3 million, and total liabilities decreased 1.8% to $1,376.4 million.

Table A-1
Net Assets
(in millions of dollars)

	2002	2001	2000	Percentage Change 2002-2001
Current assets	$ 169.8	$ 154.8	$ 141.5	9.7%
Restricted assets	203.6	230.1	393.2	(11.5%)
Capital assets	1,218.1	1,213.1	1,046.6	0.4%
Revenue bond issuance costs	9.1	11.3	11.9	(19.5%)
Total assets	**1,600.6**	**1,609.3**	**1,593.2**	**(0.5%)**
Current liabilities	7.2	5.4	8.8	33.3%
Liabilities payable from restricted assets	70.8	83.7	85.1	(15.4%)
Long-term debt	1,276.2	1,287.3	1,307.4	(0.9%)
Total liabilities	**1,354.2**	**1,376.4**	**1,401.3**	**(1.6%)**
Net assets:				
Invested in capital assets, net of related debt	(24.6)	(45.7)	(104.2)	(46.2%)
Restricted for debt service	66.5	79.2	103.8	(16.0%)
Restricted for reserve maintenance	38.8	21.3	19.9	82.2%
Restricted for construction	0.1	26.0	38.0	(99.6%)
Restricted for other purposes	3.0	2.8	1.6	7.1%
Unrestricted	162.6	149.3	132.8	8.9%
Total net assets	**$ 246.4**	**$ 232.9**	**$ 191.9**	**5.8%**

Construction of the five new, urban turnpike extensions which were financed by the 1998 revenue bonds continued throughout 2001 and 2002. Three of the new turnpike extensions were completed during 2001, with the remaining two completed in 2002. The completion of the new turnpike extensions and depletion of the related bond proceeds has resulted in a continued shift from restricted assets (investments) to capital assets (property and equipment). Rehabilitation projects included in the OTA's Five Year Capital Plan also contribute to the shift from restricted assets to capital assets through funding from the Reserve Maintenance Fund. Capital assets increased more significantly between 2001 and 2000, since only a partial year of depreciation expense was recognized in 2001 for the completed new extensions. In addition, approximately $300 million of the December 31, 2001 balance was related to construction work in progress at December 31, 2001 primarily due to the two uncompleted extensions. At the close of 2002, the construction work in progress balance is $40 million and related to rehabilitation projects. In 2002, the additions to capital assets were offset by the recognition of a full year of depreciation expense on the extensions completed during 2001, as well as the initiation of depreciation on assets previously recorded as construction work in progress as the final new extensions were put into service.

Additionally, the balance of investments required to be restricted for debt service has decreased as a result of the issuance of Revenue Bonds in mid-2002 to refund the outstanding 1989 and 1992 current interest bonds. This bond refunding also resulted in the 19.5% decrease in bond issuance costs and contributed to the 16.0% decrease in net assets restricted for debt service. Another contributor to the decrease in net assets restricted for debt service is the depletion of the reserve for debt service during the period of construction that was funded from the 1998 bond proceeds. This reserve was utilized in 2001 to fund interest expense during the period of construction and resulted in a 23.7% decrease from 2000 to 2001. In mid-2002, this interest reserve was exhausted, and all interest expense relating to the 1998 revenue bonds began being funded from operating revenues.

The 15.4% decrease in liabilities payable from restricted assets is primarily due to a decrease in the payables due to contractors for work performed on the construction of the new, urban turnpike extensions that were completed during 2002. Another decrease to this line item is the $5.5 million decrease in the current portion of revenue bonds payable as a result of the 2002 refunding of the 1989 and 1992 current interest bonds.

Net assets invested in capital assets, net of related debt consists of capital assets net of accumulated depreciation and reduced by the amount of outstanding indebtedness from any bonds that are attributable to the acquisition, construction, or improvement of those assets. This outstanding indebtedness includes both revenue bonds payable and a liability to the Oklahoma Department of Transportation (ODOT) for the construction and acquisition of capital assets.

The deficit in net assets invested in capital assets, net of related debt is a result of the funding from bond proceeds of interest expense during the period of construction of the new, urban turnpike extensions. The proceeds set aside to fund interest expense during the period of construction were not significant to the total of the bond proceeds received. As anticipated, this deficit has consistently decreased since December 31, 2000 and will continue to decrease as purchases of capital assets are made from operating revenues and as principal payments are made on the outstanding revenue bonds.

The 82.2% increase in net assets restricted for reserve maintenance represents the depth of OTA's commitment to its Five Year Capital Plan for rehabilitating and maintaining its existing Turnpike System. During 2002, the OTA turned attention to completing the new, urban turnpike extension construction. With the final extension opened in late 2002, focus is now on planning for the 2003 portion of the Five Year Capital Plan. The 2003 Reserve Maintenance budget includes $20.7 million for rehabilitation and improvement projects.

The amount restricted for construction represents the balance of investment income earned on bond proceeds and used to complete the construction of the new, urban turnpike extensions net of any liabilities payable from that balance. Beginning in the fourth quarter of 2001 and throughout 2002, construction of the new, urban extensions was funded from the cumulative interest income earned on bond proceeds. Consequently, this reserve is almost exhausted.

The balance restricted for other purposes includes amounts restricted for two distinct purposes. The first restriction is on deposits received from *PIKEPASS* patrons for prepayment of tolls, net of the related deferred revenue. The second restriction is on the assets reserved for future payments to the U.S. Treasury for arbitrage earnings, net of the related liability.

Changes in Net Assets

The increase in net assets at December 31, 2002 was approximately $13.5 million, resulting in net assets totaling $246.4 million at December 31, 2002. (See Table A-2.) The OTA's total operating revenues increased by 7.5% to approximately $177.7 million, and total operating expenses increased 19.9% to approximately $112.0 million.

Table A-2
Changes in Net Assets
(in millions of dollars)

	2002	2001	2000	Percentage Change 2002-2001
Operating Revenues:				
Toll revenue	$ 176.5	$ 164.1	$ 131.6	7.5%
Concession revenue	1.2	1.2	1.2	-
Total operating revenues	**177.7**	**165.3**	**132.8**	**7.5%**
Operating Expenses:				
Operating expenses	48.8	45.9	40.9	6.3%
Depreciation and amortization	63.2	47.5	35.6	33.1%
Total operating expenses	**112.0**	**93.4**	**76.5**	**19.9%**
Operating income	**65.7**	**71.9**	**56.3**	**(8.6%)**
Non-operating revenues (expenses):				
Interest earned on investments	13.4	19.7	28.0	(32.0%)
Net increase in fair value of investments	2.7	6.0	8.2	(55.0%)
Interest expense on revenue bonds outstanding	(69.0)	(57.6)	(54.0)	19.8%
Other	0.7	1.0	1.2	(30.0%)
Net non-operating expenses	**(52.2)**	**(30.9)**	**(16.6)**	**68.9%**
Change in net assets	**13.5**	**41.0**	**39.7**	**(67.1%)**
Total net assets, beginning of the year	232.9	191.9	152.2	21.4%
Total net assets, end of the year	**$ 246.4**	**$ 232.9**	**$ 191.9**	**5.8%**

The 7.5% increase in 2002 total operating revenues over 2001 is principally due to the completion of the new turnpike extensions contributing to the impressive revenue growth rates of 20.5% on the John Kilpatrick Turnpike and 46.0% on the Creek Turnpike above 2001 levels. The increase in 2001 total operating revenues to $165.3 million from $132.8 million in 2000 is due in part to the systemwide toll rate increase implemented January 1, 2001. There were no rate increases in 2002.

The operation and maintenance of these additional turnpike miles played a major role in the 6.3% increase in 2002 operating expenses over 2001 operating expenses and a 12.2% increase in 2001 operating expenses over 2000 operating expenses. All divisions continued to closely monitor operating expenses under the direction of the Authority's Acting Director and Chief Financial Officer. (See Table A-3 for a detail by operating function.) The 33.1% 2002 increase in depreciation and amortization expense results from the addition to capital assets of the new extensions and the finalization of projects identified in the Five Year Capital Plan for system maintenance and rehabilitation.

Net non-operating expenses increased 68.9% to approximately $52.2 million in 2002 as compared to 2001 and increased 86.1% to approximately $30.9 million in 2001 as compared to 2000. Three components created the majority of these fluctuations. The downward trend in investment income that began in early 2001 was compounded by the terrible shock to America's investment environment caused by the events of September 11, 2001. Investment income has continued to plummet throughout 2002, with overnight maturity rates below 1.0% and long term treasury notes with rates around 3.8%. The net increase in fair value of investments declined 55.0% in 2002 and 27.6% in 2001 as compared to the respective prior year primarily due to the continued depletion of funds available for investment in the 1998 interest reserve funded by bond proceeds. The 19.8% and a 6.7% increase in interest expense on revenue bonds outstanding in 2002 and 2001, respectively, is due to the period for capitalization of interest expense on the 1998 bonds drawing to a close. The period of construction was completed for three of the new, urban turnpike extensions beginning in 2001, with the final two extensions coming online in mid-2002. At this time, the interest expense related to the bonds issued for construction of the new extensions is no longer capitalizable.

Table A-3
Operating Expenses Before Depreciation and Amortization
(in thousands of dollars)

	2002	2001	2000	Percentage Change 2002-2001
Toll Operations	$ 12,211	$ 11,412	$ 10,687	7.0%
Turnpike Maintenance	14,036	13,516	10,627	3.9%
Engineering	1,880	2,780	2,243	(32.4%)
Highway Patrol	9,151	8,348	7,674	9.6%
PIKEPASS Customer Service	5,141	4,113	3,911	25.0%
General Administration	1,670	1,489	1,395	12.2%
Information Technology	2,664	2,216	2,027	20.2%
Controller	673	722	657	(6.8%)
Finance and Revenue	490	520	620	(5.8%)
Executive	873	743	1,019	17.5%
Authority	8	9	5	(11.1%)
Total operating expenses before depreciation and amortization	**$ 48,797**	**$ 45,868**	**$ 40,865**	**6.4%**

As anticipated in the 2001 and 2002 Annual Budgets, the additional miles of turnpike added to the System during 2001 and 2002 resulted in additional manpower and toll collection equipment maintenance expenditures and increased maintenance service cost in both years. Also, 29 new troopers were assigned to patrol the expanded Turnpike System during late 2001. Consequently, the Toll Operations, Turnpike Maintenance and Oklahoma Highway Patrol Divisions' operating expenses increased 7.0%, 3.9% and 9.6%, respectively, in 2002 when compared to 2001.

The 32.4% decline in the Engineering Division's 2002 operating expenses is largely due to the completion of two non-capitalizable projects in 2001. Feasibility studies were conducted in 2001, but the projects were not undertaken, and therefore the projects were not capitalized. Also, the completion of landscape design on the John Kilpatrick and Broken Arrow South Turnpike Extensions was completed in 2001. The landscape design project was the primary factor in the increase between 2001 and 2000.

Operating expenses for the *PIKEPASS* Customer Service Division have grown steadily since December 31, 2000 and increased 25.0% in 2002 above 2001 operating expenses. The number of active *PIKEPASS* accounts grew 11.8% in 2002. The higher volume of *PIKEPASS* accounts, the addition of the new turnpike extensions and the *PIKEPASS* tag replacement program resulted in higher postage, tag agency and banking and financial service expenditures in 2002.

The 20.2% increase in operating expenses in the Information Technology Division is primarily due to the cost of telecommunication lines utilized for operation of the new toll collection system on the sections of the new, urban turnpike extensions which were opened to traffic during 2002.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

As of December 31, 2002, the OTA had invested approximately $1,980.5 million in capital assets, including roads, bridges, buildings, land, and equipment. Net of accumulated depreciation, the OTA's net capital assets at December 31, 2002 totaled approximately $1,218.1 million. (See Table A-4.) This amount represents a net increase (including additions and disposals, net of depreciation) of approximately $5.0 million or 0.4% over December 31, 2001. At December 31, 2001, net capital assets totaled approximately $1,213.1 million. This amount represents a net increase (including additions and disposals, net of depreciation) of approximately $166.5 million or 15.9% over December 31, 2000.

Table A-4
Capital Assets
(net of depreciation, in millions of dollars)

	2002	2001	2000	Percentage Change 2002-2001
Roads and bridges	$ 679.6	$ 464.4	$ 237.1	46.3%
Construction work in progress	40.1	299.6	417.1	(86.6%)
Improvements	188.6	177.0	151.1	6.6%
Land	161.5	160.2	156.6	0.8%
Buildings	30.9	19.1	10.5	61.8%
Equipment	44.4	22.9	19.3	93.9%
Capitalized interest	73.0	69.9	54.9	4.4%
Total net capital assets	**$ 1,218.1**	**$ 1,213.1**	**$ 1,046.6**	**0.4%**

The use of the 1998 bond proceeds to construct the new, urban turnpike extensions resulted in a 15.9% increase in capital assets in 2001 as compared to 2000. In 2002, total net capital assets grew by only .4%. This is the result primarily of focusing attention on closing the final contracts on the new, urban turnpike extensions and opening those roads for patron travel. Accordingly, construction work in progress decreased 86.6% in 2002 and 28.2% in 2001 as compared to the respective prior year as construction costs for the newly opened turnpike extensions were reclassified to appropriate capital asset classes. Roads and bridges increased 46.3% in 2002 and 95.9% in 2001 as the final portions of the new extensions became operational. Toll plazas and maintenance buildings constructed on the newly opened turnpike extensions account for nearly all of the 61.8% increase in 2002 and an 81.9% increase in 2001 in buildings. The toll collection equipment installed on the new extensions was the largest component of the 93.9% increase in equipment in 2002 when compared to 2001 and an 18.7% increase in 2001 when compared to 2000. The planned purchase

of new Type II *PIKEPASS* tags to accommodate the growing customer base was another sizeable toll collection related component of the increase in equipment in both 2002 and 2001. Depreciation has been initiated on these capital assets as the new extensions became operational.

While an emphasis was placed on completing new extension construction, progress continued towards the rehabilitation and improvement projects identified in the Five Year Capital Plan. Project costs associated with finalized projects were reclassified from construction work in progress into improvements and other appropriate capital asset classes. The rehabilitation projects, combined with signing and road striping projects, generated the 6.6% increase in 2002 improvements over 2001 and a 17.1% increase in 2001 as compared to 2000.

The 2003 portion of the OTA's Five Year Capital Plan calls for spending over $55.9 million for capital projects. Approximately 77.8% of this funding is allocated to road and bridge rehabilitation projects such as pavement rehabilitation on the Turner, Will Rogers and Chickasaw Turnpikes, the construction of toll plazas and salt barns on the Turner, Will Rogers and H.E. Bailey Turnpikes and diamond grinding throughout the System. The remaining 22.2% is allocated to other capital projects such as additional purchases of the new Type II *PIKEPASS* transponders for new patrons as well as refurbishment efforts. The 2003 portion of the Five Year Capital Plan will be funded by a combination of resources on hand and 2003 toll revenues.

Debt Administration

Turnpike bond sales must be approved by the Executive and Legislative Bond Oversight Commissions and must comply with rules and regulations of the United States Treasury Department and the United States Securities and Exchange Commission. On May 14, 2002, the OTA issued $314,065,000 Series 2002A Refunding Second Senior Revenue Bonds and $255,575,000 Series 2002B Refunding Second Senior Revenue Bonds. These Revenue Bonds, combined with other available funds of the Authority, refunded $577,810,000 in Revenue Bonds from the remaining Series 1989 Bonds, the Series 1992A-E Bonds and portions of the Series 1992 F&G Bonds. The refunding resulted in a $50,923,956 decrease to the Authority's aggregate debt service payments over the next 20 years.

The OTA's long-term debt includes revenue bonds payable and a payable to ODOT. At December 31, 2002, the OTA had approximately $1,263.9 million in revenue bonds outstanding, a 1.8% decrease from December 31, 2001. The payable to ODOT at December 31, 2002 was approximately $41.7 million.

Of the $1,263.9 million in revenue bonds outstanding, approximately $1,163.4 million is insured and rated Aaa by Moody's Investors Service, and AAA by both Fitch Ratings and Standard and Poor's Rating Service (S&P) with a positive rating outlook. The remaining debt is rated Aa3 by Moody's Investors Service and AA- by both Fitch Ratings and S&P.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGET

Reports from the Federal Reserve Board indicate subdued growth in economic activity from mid-November through early January 2003, with little change in overall conditions relative to the last survey period. Consumer spending reports were consistently weak, with disappointing holiday sales mostly at or below last year's levels. The "2003 State of Oklahoma Outlook", published by the College of Business Administration of Oklahoma State University, suggests an economic recovery may be underway. Clearer evidence of recovery is provided by estimates of Gross Domestic Product which has been increasing since the declines of the first three quarters of 2001. Oklahoma enjoyed a .44% increase in the number of jobs during 2002, placing Oklahoma 11th in the nation for job growth performance. The Oklahoma unemployment rate declined from 4.4% to 4.2% from November 2001 to November 2002, compared to an increase from 5.6% to 6.0% nationally over the same period.

Like most other states, Oklahoma is facing challenges due to declining revenue. In spite of these challenges, the State's financial condition is healthy. The State's general obligation debt load remains modest, and the State's "Rainy Day Fund" has provided room to address unforeseen emergencies. The shortfall in revenue has caused a 6.5% reduction in fiscal year 2003 appropriations. Of the four major revenue sources, only the gross production tax on natural gas exceeded estimates. The State Board of Equalization has made a finding that will invoke a trigger mechanism increasing the maximum individual income tax to 7% and revoking expansion of a low-income sales tax credit.

The OTA's 2003 Annual Budget, adopted by the Authority on November 25, 2002, includes approximately $51.9 million for the operating and maintenance budget, $20.7 million for the Reserve Maintenance Fund budget and $35.2 million for the General Fund budget. The operating and maintenance budget consists of $44.0 million for the existing system and $7.9 million for the new extensions and new programs. The amounts budgeted within the Reserve Maintenance and General Fund budgets finance the maintenance, rehabilitation and improvements included in the 2003 portion of the OTA's Five Year Capital Plan.

CONTACTING THE OTA'S FINANCIAL MANAGEMENT

This financial report is designed to provide our bondholders, patrons, and other interested parties with a general overview of the OTA's finances and to demonstrate the OTA's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Oklahoma Transportation Authority's Controller Division, P. O. Box 11357, Oklahoma City, OK 73136-0357.

Independent Auditors' Report

Members of the Oklahoma Transportation Authority:

We have audited the statements of net assets of the Oklahoma Transportation Authority (Authority), as of December 31, 2002 and 2001, and the related statements of revenues, expenses and changes in net assets and cash flows for the years then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Authority, as of December 31, 2002 and 2001, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis on pages 23 through 29, is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

In accordance with *Government Auditing Standards*, we have also issued our report dated March 20, 2003 on our consideration of the Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws and regulations. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

Our audits were made for the purpose of forming an opinion on the basic financial statements of the Authority, taken as a whole. The introductory section on pages 2 through 22 and the supplementary information included on pages 52 through 62 is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole. The supplementary statistical information included on pages 65 through 91 is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audits of the basic financial statements and, accordingly, we express no opinion on it.

Oklahoma Transportation Authority
Notes to Financial Statements
December 31, 2002 and 2001

Note 1. Nature of the Organization and Summary of Significant Accounting Policies

The financial statements of the Oklahoma Transportation Authority (the Authority) have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The Authority applies Financial Accounting Standards Board pronouncements and Accounting Principles Board opinions issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements, in which case, GASB prevails, and all of the GASB pronouncements issued subsequently. The more significant of the Authority's accounting policies are described below:

A. Reporting Entity

The Oklahoma Transportation Authority is an instrumentality of the State of Oklahoma (the State) and a body corporate and politic created by statute in 1947. The Authority is authorized to construct, maintain, repair, and operate turnpike projects at locations authorized by the Legislature of the State of Oklahoma and approved by the State Department of Transportation. The Authority receives its revenues from turnpike tolls and a percentage of the turnpike concession sales. The Authority may issue Turnpike Revenue Bonds for the purpose of paying the costs of turnpike projects and Turnpike Revenue Refunding Bonds for the purpose of refunding any bonds of the Authority then outstanding. Turnpike Revenue Bonds are payable solely from the tolls and other revenues of the Authority and do not constitute indebtedness of the State.

The Authority is a component unit of the State and is combined with other similar funds to comprise the Enterprise Funds of the State. The Authority consists of the Governor (ex-officio) and six members who are appointed by the Governor, by and with the consent of the State Senate. The Governor may remove any member of the Authority, at any time, with or without cause. The members are appointed to represent defined geographical districts and to serve without pay for terms of eight years. The Authority has full control over all operations, but must comply with certain bond indentures and Trust Agreements. The Authority employs an Acting Director and Chief Financial Officer who manages the day-to-day operations.

In evaluating how to define the Authority, for financial reporting purposes, management has determined that there are no entities over which the Authority exercises significant influence. Significant influence or accountability is based primarily on operational or financial relationships with the Authority. Since the Authority does not exercise significant influence or accountability over other entities, it has no component units.

B. Basis of Accounting

The operations of the Authority are accounted for as an enterprise fund on an accrual basis in order to recognize the flow of economic resources. Under this basis, revenues are recognized in the period in which they are earned, expenses are recognized in the period in which they are incurred, depreciation of

assets is recognized, and all assets and liabilities associated with the operation of the Authority are included in the Statements of Net Assets. The principal revenues of the Authority are toll revenues received from patrons. The Authority also recognizes as operating revenue the rental fees received from concessionaires from operating leases on concession property. Operating expenses for the Authority include the costs of operating the turnpikes, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

The prevailing Trust Agreement dated February 1, 1989 and all supplements thereto (the Trust Agreement) require that the Authority adopt generally accepted accounting principles for government entities, but it also requires that certain funds and accounts be established and maintained. The Authority consolidates these funds and accounts for the purpose of enterprise fund presentation in its external financial statements.

C. Changes in Accounting Principles

The Authority adopted the provisions of Governmental Accounting Standards Board Statement No. 38, "Certain Financial Statement Note Disclosures" (Statement 38) in 2001, effective January 1, 2000. Statement 38 establishes and modifies certain financial statement note disclosure requirements to make the financial statements more useful in the context of the Statement 34 reporting model. Statement 38 had an impact on the presentation of the notes to the financial statements, but no impact on net assets.

D. Budget

Operating budgets are adopted on a modified accrual (non-GAAP) basis for Revenue Fund expenses, Reserve Maintenance Fund deposits and General Fund project expenses. Project-length financial plans are established for all Reserve Maintenance and General Fund projects and for all new construction projects. All non-project related, unexpended budget amounts lapse at calendar year end. Expenses are recognized in the period in which they are paid rather than the period in which they are incurred for budgetary control purposes. Depreciation is not recognized as an expense, but capital outlays are recognized as expenses for budgetary control purposes. These expenses are reclassified for the purpose of preparing financial reports in accordance with GAAP. See additional information regarding legal compliance for budgets in Note 2.

E. Cash, Cash Equivalents and Investments

Cash includes amounts in demand deposits. Cash equivalents include all highly liquid deposits with an original maturity of three months or less when purchased. These deposits are fully collateralized or covered by federal deposit insurance. The carrying amount of the investments is fair value. The net change in fair value of investments is recorded on the Statements of Revenues, Expenses and Changes in Net Assets and includes the unrealized and realized gains and losses on investments.

F. Materials Inventory

Inventories of turnpike maintenance materials and supplies are valued at the lower of cost or market using the average cost method. These inventories are charged to expense during the period in which the maintenance or repair occurs.

G. Restricted Assets

Certain proceeds of the Turnpike Revenue Bonds are restricted by applicable bond covenants for construction or set aside as reserves to ensure repayment of the bonds. Certain assets advanced to the Authority monthly from motor fuel excise taxes are restricted in accordance with the Trust Agreement for the purpose of paying debt interest and principal if other available sources are not sufficient (see Note 10). Also, certain other assets are accumulated and restricted on a monthly basis in accordance with the Trust Agreement for the purpose of paying debt interest and principal payments that are due on a semi-annual

and annual basis, respectively, and for the purpose of maintaining the reserve funds at the required levels. Payments from these restricted accounts are strictly governed by the Trust Agreement and are only made in compliance with the Trust Agreement. Limited types of expenses may be funded from these restricted accounts. Those types of expenses which do not meet these standards are funded from unrestricted accounts. The funds and accounts are established as follows:

- The "Senior Bond Interest and Sinking Accounts" are established as sinking funds for the payment of interest and principal of the senior lien revenue bonds.

- The "Subordinate Bond Interest and Sinking Accounts" are established as sinking funds for the payment of interest and principal of the subordinate lien revenue bonds.

- The "Senior Bond Reserve Accounts" are established for the purpose of paying interest and maturing principal in the event that monies held in the "Senior Bond Interest and Sinking Accounts" and "Turnpike Trust Fund," and monies available in the "General Fund" and "Reserve Maintenance Fund" are insufficient for such purpose.

- The "Subordinate Bond Reserve Account" is established for the purpose of paying interest and maturing principal in the event that monies held in the "Subordinate Bond Interest and Sinking Accounts" and "Turnpike Trust Fund," and monies available in the "General Fund" and "Reserve Maintenance Fund" are insufficient for such purpose.

- The "Turnpike Trust Fund" is established for the purpose of depositing and segregating the apportionments of motor fuel excise taxes by the Oklahoma Tax Commission derived from the sale of fuels on all Authority turnpikes and can be used only to compensate for any deficiency in the monies otherwise available for the payment of bond interest and principal (see Note 10).

- The "Reserve Maintenance Fund" is established for the purpose of applying and holding monies in reserve to pay the cost of resurfacing, extraordinary maintenance or repairs, engineering expenses, insurance premiums or self-insurance reserves and interest and maturing principal if monies in the "Senior Bond Interest and Sinking Accounts" and "Subordinate Bond Interest and Sinking Accounts" are insufficient for such purposes.

- The "Construction Funds" are established for the purpose of holding bond proceeds and other financing sources to be used to pay the costs of turnpike construction or improvements.

The Authority has also set up the following additional funds by policy for the purpose of restricting monies for which the Authority is liable to others.

- The "Arbitrage Rebate and Interest Fund" is established for the purpose of holding and paying arbitrage investment earnings to the U.S. Treasury as a result of investing tax exempt bond proceeds at rates of return exceeding the maximum amount that is permitted under the applicable tax code.

- The "*PIKEPASS* Prepayment Fund" is established for the purpose of receiving and holding prepayments received from turnpike patrons using the electronic vehicle identification method of paying tolls.

H. Compensated Absences

Vested or accumulated vacation leave is recorded as an expense and a liability as the benefits accrue to employees. There are no accumulating sick leave benefits that vest for which any liability must be recognized.

I. Capital Assets

All capital assets are stated at cost. Capital assets are defined as assets with initial, individual costs exceeding $500 to $20,000 depending on asset category. Depreciation is computed on the straight-line method over the following estimated useful lives:

Roads and bridges	30 years
Improvements	5-20 years
Buildings	20-30 years
Equipment	3-7 years
Capitalized interest	30 years

A full month's depreciation is taken in the month an asset is placed in service. When property and equipment are disposed, depreciation is removed from the respective accounts, and the resulting gain or loss, if any, is recorded in operations.

Interest costs incurred on revenue bonds used to finance the construction or acquisition of assets are capitalized. The amount of interest capitalized is calculated by offsetting interest expense incurred from the date of the borrowing until completion of the project with interest earned on invested proceeds over the same period. Construction of three of the five turnpike extensions for which the 1998 Bonds were issued was completed during 2001. The two remaining extensions were completed in mid-2002. Eligible interest costs incurred in 2002 and 2001 on the Series 1998A and 1998B Second Senior Revenue Bonds as allocated to each turnike extension were approximately $5,770,000 and $22,730,000, respectively. Approximately $5,700,000 and $16,700,000 was capitalized for 2002 and 2001, respectively. The amount of interest income earned on the proceeds of the Series 1998A and 1998B Second Senior Revenue Bonds in 2002 and 2001 was approximately $70,000 and $6,030,000, respectively. Interest expense related to these extensions was no longer capitalized upon completion of construction. Amortization of capitalized interest is included in depreciation expense.

J. Bond Discounts and Bond Issuance Costs

Bond discounts are presented as a reduction of the face amount of the bonds payable. Bond issuance costs are presented as a deferred asset on the Statements of Net Assets. The discounts and issuance costs are amortized over the life of the bonds on a method that approximates the effective interest method. Amortization expense related to bond discounts was approximately $358,000 and $839,000 at December 31, 2002 and 2001, respectively, and is included as a component of interest expense on revenue bonds outstanding on the Statements of Revenues, Expenses and Changes in Net Assets. Depreciation and amortization expense includes amortization of bond issuance costs at both December 31, 2002 and 2001 of approximately $457,000 and $521,000, respectively.

K. Arbitrage Rebate Payable

The Tax Reform Act of 1986 imposed additional restrictive regulations, reporting requirements and arbitrage rebate liability on issuers of tax-exempt debt. This Act requires the remittance to the Internal Revenue Service (IRS) of 90% of the cumulative rebatable arbitrage within 60 days of the end of each five-year reporting period following the issuance of governmental bonds. In July 2002, the Authority made an anniversary payment to the IRS totaling approximately $366,000 representing the Authority's current rebatable arbitrage to reduce the liability on the Series 1992 A-E Bonds. Then in August 2002, the Authority made a payment to the IRS totaling $167,000 for the final rebatable arbitrage due on the Series 1989 Bonds. This final payment was due as a result of the refunding of the Series 1989 Bonds. The IRS required no final rebatable arbitrage payment for the Series 1992 A-E Bonds or portions of the 1992 F and G Bonds that were also refunded, as no arbitrage rebate liability was due at the time of the refunding for these bond series. The Authority's policy is to record annually as a liability the estimated amount owed. The Authority's cumulative arbitrage rebate liabilities for the years ended December 31, 2002 and 2001 are approximately $8,033,000 and $8,156,000, respectively. The increases in this obligation are recorded in operations as a reduction of current year interest income.

L. Income Taxes

The Authority is an instrumentality of the State of Oklahoma. As such, income earned in the exercise of its essential government functions is exempt from state or federal income taxes.

M. Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

N. Reclassifications

Certain amounts in the 2001 financial statements have been reclassified to conform to the 2002 presentation.

Note 2. Legal Compliance-Budgets

The Authority is required to prepare a preliminary budget of current expenses, monthly deposits to the Reserve Maintenance Fund, and the purposes for which the monies held in the Reserve Maintenance Fund will be expended for the ensuing year on or before October 10 of each year. Copies of the preliminary budget must be filed with the bond trustee and each depository, and mailed to the consulting engineers, traffic engineers and all bondholders who have filed their names and addresses with the Secretary and Treasurer of the Authority. If the Trustee or the owners of 5% in aggregate principal amount of outstanding bonds request the Authority in writing on or before November 1 in such a year, the Authority shall hold a public hearing on or before November 20. The Authority is required by the Trust Agreement to adopt a final budget on or before December 1 of each year. The budget is prepared by division at the object detail level, and includes information regarding the preceding year. Project-length financial plans are established for all new construction projects.

The Authority may not expend any amount or incur any obligations for maintenance, repairs and operations in excess of the total amount of the budgeted expenses in the Revenue Fund unless the funding source is other than revenues received from the Turnpike System. The Authority may expend additional monies from the Reserve Maintenance Fund in excess of the budget of monthly deposits. The Acting Director and Chief Financial Officer is authorized to approve all line item and inter-division budget transfers. Budget amendments must be approved by the Authority in a manner similar to the adoption of the annual budget. There were no occurrences of budget noncompliance in 2002.

Note 3. Deposits and Investments

Deposits. At December 31, 2002 and 2001, the carrying amounts of the Authority's cash deposits were $1,238,064 and ($3,135,514), respectively. The bank balances were $951,532 and $1,059,087, respectively. At December 31, 2002 and 2001, the carrying amount and bank balances of the Authority's cash equivalents were $73,322,826 and $98,037,398, respectively. All bank balances were covered by federal depository insurance or collateralized with securities held by the Authority's agent in the Authority's name.

Investments. Under the terms of the Trust Agreement, the Authority can invest in (a) government obligations, federally issued or guaranteed bonds, debentures or notes; (b) defeased municipal obligations; (c) repurchase agreements meeting certain conditions defined in the Authority's Trust Agreement; (d) certificates of deposit and time deposits in, or interests in money market portfolios meeting certain conditions defined in the Authority's Trust Agreement; (e) commercial paper; (f) obligations and full faith and credit obligations of state or local government issuers; (g) shares of stock in a corporation that is a regulated investment company and invests all of its assets in government obligations; and/or (h) any unsecured or secured agreement with the Federal National

Mortgage Association or any bank, trust company or national banking association or a corporation meeting certain conditions defined in the Authority's Trust Agreement. The Authority has complied with the terms of the Trust Agreement in 2002 and 2001.

The Authority has a significant investment in a JPMorgan Chase Bank (JPMorgan) Repurchase Agreement. This Repurchase Agreement bears a yield equal to the rate of 5.991%. If the rating of unsecured senior long-term debt obligations of JPMorgan falls below A by Moody's or S&P, then the Repurchase Agreement can be collateralized with additional securities, transferred with the consent of the Trustee to another entity with long-term senior unsecured debt rated at A or better by Moody's and S&P, or terminated if neither of the above conditions are met. Wells Fargo Bank Minnesota, N.A. is custodian for collateral held under this agreement. The transaction matures every 30 days and is automatically renewed until January 1, 2022. The terms of this Repurchase Agreement are governed by the Master Repurchase Agreement between JPMorgan and Bank of Oklahoma, N.A., Trustee, as supplemented by the letter agreement dated May 23, 2002.

The Authority had significant investments in two Guaranteed Investment Contracts (GIC's) throughout 2002 and at December 31, 2001, the terms of which are summarized as follows:

(1) GIC with AIG Matched Funding Corporation, a subsidiary of American International Group (AIG) – This GIC bears a yield equal to the rate of 8.51%. If the rating of unsecured obligations or uncollateralized long-term debt obligations of AIG falls below Aa2 by Moody's or AA by S&P, then the GIC can be collateralized by U.S. Government securities in an amount equal to 107% of the outstanding principal. Certain AIG debt is rated Aaa by Moody's and AAA by S&P. Withdrawals on the GIC require 2 days written notice and may be made for paying project costs from bond proceeds, paying and redeeming bonds, curing deficiencies in the bond reserve accounts, reducing the bond reserve account requirements, refunding, satisfying an event of default which results in the acceleration or mandatory redemption of all of the bonds, or restricting the bond investment yield should bond counsel deem it necessary. The GIC was sold in May 2002 in conjunction with the issuance of the 2002 Refunding Second Senior Bonds.

(2) GIC with AIG Matched Funding Corporation, a subsidiary of American International Group (AIG) – This GIC bears a yield equal to the rate of 3.651%. If the rating of unsecured obligations or uncollateralized long-term debt obligations of AIG falls below Aa3 by Moody's or AA- by S&P, then the GIC can be collateralized by U.S. Government securities in an amount equal to 105% of the outstanding principal. Certain AIG debt is rated Aaa by Moody's and AAA by S&P. Withdrawals on the GIC require 3 days written notice and may be made for paying project costs from bond proceeds, paying and redeeming bonds, curing deficiencies in the bond reserve accounts, reducing the bond reserve account requirements, refunding, satisfying an event of default which results in the acceleration or mandatory redemption of all of the bonds, or restricting the bond investment yield should bond counsel deem it necessary. The GIC was redeemed on December 31, 2002, and these funds were placed in cash equivalents.

The Authority's investments are categorized to give an indication of the level of custodial credit risk assumed by the Authority at December 31, 2002 and 2001. The categories are described as follows: Category 1 – insured or registered, or securities held by the Authority or its agent in the Authority's name; Category 2 – uninsured and unregistered, with securities held by the counterparty's trust departments or agent in the Authority's name; or Category 3 – uninsured and unregistered with securities held by the counterparty or by its trust department or by its agent not in the Authority's name. The GIC's and open-end mutual funds are not classified in categories of credit risk, because they are direct contractual investments and are not securities.

December 31, 2002	Category 1	Category 2	Category 3	Fair Value
Unrestricted:				
U.S. Government securities	$ 148,090,806	-	-	$ 148,090,806

Note 4. Capital Assets

The following schedules summarize the capital assets of the Authority as of December 31, 2002 and 2001:

2002	Beginning Balance	Increases	Decreases	Ending Balance
Capital assets, not being depreciated:				
Land	$ 160,248,029	$ 1,293,010	$ (12,056)	$ 161,528,983
Construction work in progress	299,578,148	71,585,927	(331,053,633)	40,110,442
Total capital assets, not being depreciated	459,826,177	72,878,937	(331,065,689)	201,639,425
Capital assets, being depreciated:				
Roads and bridges	855,192,648	241,815,975	-	1,097,008,623
Improvements	381,741,829	33,054,913	-	414,796,742
Buildings	40,903,350	13,332,814	(7,810)	54,228,354
Equipment	73,990,761	32,449,186	(5,459,905)	100,980,042
Capitalized interest	106,199,646	5,696,966	-	111,896,612
Total capital assets, being depreciated	1,458,028,234	326,349,854	(5,467,715)	1,778,910,373
Less accumulated depreciation for:				
Roads and bridges	(390,835,131)	(26,528,383)	-	(417,363,514)
Improvements	(204,681,233)	(21,552,328)	-	(226,233,561)
Buildings	(21,842,315)	(1,529,245)	2,603	(23,368,957)
Equipment	(51,052,493)	(10,466,859)	4,979,140	(56,540,212)
Capitalized interest	(36,296,930)	(2,644,972)	-	(38,941,902)
Total accumulated depreciation	(704,708,102)	(62,721,787)	4,981,743	(762,448,146)
Total capital assets, being depreciated, net	753,320,132	263,628,067	(485,972)	1,016,462,227
Total capital assets, net	$ 1,213,146,309	$336,507,004	$(331,551,661)	$ 1,218,101,652

2001	Beginning Balance	Increases	Decreases	Ending Balance
Capital assets, not being depreciated:				
Land	$ 156,621,995	$ 3,664,790	$ (38,756)	$ 160,248,029

Total accumulated depreciation	(662,049,941)	(47,040,587)	4,382,426	(704,708,102)
Total capital assets, being depreciated, net	472,849,001	280,965,300	(494,169)	753,320,132
Total capital assets, net	$ 1,046,578,059	$ 485,130,948	$(318,562,698)	$ 1,213,146,309

At December 31, 2002 and 2001, depreciation and amortization expense related to capital assets was $62,721,787 and $47,040,587, respectively.

Note 5. Risk Management

In conjunction with its normal operations, the Authority is exposed to various risks related to the damage or destruction of its assets from both natural and man-made occurrences, tort/liability claims, errors and omissions claims and professional liability claims. As a result of these exposures, the Authority has developed a comprehensive risk management program that participates with the State of Oklahoma's Risk Management Division in a pooled operation for the majority of this coverage.

As a member of the State of Oklahoma Risk Management pool, the Authority assumes the responsibility for maintaining and reporting to the pool all real and personal property for which it requires insurance coverage. The Authority is also responsible for providing relevant financial and operational data to the pool for all potential losses. The pool, on the other hand, serves as the primary insurer to the Authority with additional layers of coverage provided by commercial insurers for coverage in excess of the self-retained levels of risk assumed by the pool and the governmental immunity provided by state statutes.

The Authority also carries insurance with private insurers for a few high-risk assets under an "all risks" policy. Additional details of this coverage and the corresponding levels of self-retained risk and limits of coverage are noted separately within the financial section of this report as shown on the "Schedule of Insurance in Force."

The self-retention level for property and casualty coverage for non-bridge property is $10,000 per incident, while the overall limit of coverage for bridges and non-bridge property is approximately $525,000,000. This was done in order to restructure the property and casualty coverage to provide increased levels of coverage in the event of catastrophic loss and assume more of the risk of predictable operational exposures.

All other categories of insurance coverage in place were either maintained at current levels or increased as to overall limits of coverage and reduction of self-retained risk so as to reduce the overall exposure of risk to the Authority. There were no settlements in excess of insurance coverage in 2002, 2001 and 2000.

Note 6. Operating Leases

The Authority has entered into various non-cancelable contracts with concessionaires to provide patron services on the Oklahoma Turnpike System. The contracts are generally for five-year terms, with two five-year renewal options. These contracts provide for the Authority to receive concession revenue, including minimum rentals plus contingent rentals based on sales volume. The Authority also leases antenna space under non-cancelable contracts with a 20-year term. Total future minimum rental payments to be received as of December 31, 2002, are approximately:

Year	Minimum Lease Payments
2003	$ 243,220
2004	173,184
2005	165,184
2006	161,184
2007	116,184
Thereafter	446,549
Total	$1,305,505

Note 7. Revenue Bonds

The Authority issues revenue bonds from time to time for the purpose of financing capital improvements and new projects. In addition, when the market environment indicates favorable results, the Authority will issue bonds to restructure its debt to take advantage of these economic factors.

On May 14, 2002, the Authority issued $314,065,000 of Series 2002A Refunding Second Senior Revenue Bonds and $255,575,000 of Series 2002B Refunding Second Senior Revenue Bonds, dated May 1, 2002. The Series 2002 Bonds were issued to provide funds which when combined with other available funds of the Authority, were issued for the purpose of (1) refunding the (a) Series 1989 First Senior and Subordinate Lien Revenue Bonds, (b) Series 1992 A-E Second Senior Revenue Bonds, (c) portions of the Series 1992F First Senior and 1992G Second Senior Revenue Bonds (see additional information below), and (2) paying the costs of issuance. The portions of the Series 1992 F and G Bonds not being refunded included Capital Appreciation Bonds which are not callable and will remain outstanding to their respective maturity dates of January 1, 2004 through 2008.

(a) Pursuant to provisions of a Trust Agreement dated February 1, 1989 (the Trust Agreement), on that date, the Authority issued $385,400,000 of Series 1989 First Senior Revenue Bonds and $173,000,000 of Series 1989 Subordinate Revenue Bonds. The purpose of the Series 1989 Revenue Bonds was (1) to finance the cost of constructing the Kilpatrick, Creek, Cherokee and Chickasaw Turnpikes, (2) to finance the cost of making certain improvements to the existing turnpikes, and (3) to advance refund all of the outstanding Authority bonds from the 1966 and 1971 issues. The Series 1989 Bonds' interest rates ranged from 6.0% to 7.875%.

The Series 1989 Revenue Bonds defeased all Authority revenue bonds from the 1966 and 1971 issues through the escrow deposit of approximately $131,300,000 with two trustee banks. Consequently, the liability for the 1966 Series A, 1966 Series B, and the 1971 Series C Revenue Bonds has been removed from the Statements of Net Assets. This advance refunding was undertaken primarily to restructure the Authority's debt in order to enable the debt financing of the new projects in the most economically efficient manner. Bank of Oklahoma, N.A. serves as the Escrow Trustee on the 1966 Series A and B Bonds. Bank One Trust Company serves as the Escrow Trustee on the 1971 Series C Bonds. At December 31, 2002 and 2001, the defeased bonds outstanding were $36,555,000 and $48,505,000, respectively.

(b) On May 22, 1992, pursuant to the Trust Agreement, the Authority issued $392,265,000 of Series 1992 First Senior Revenue Bonds, $20,655,000 of Series 1992 Second Senior Revenue Bonds and $195,400,000 of Series 1992 Subordinated Revenue Bonds, dated May 1, 1992 with interest rates ranging from 4.35% to 6.3%, 4.25% to 6.25% and 4.25% to 6.25%, respectively. These Series 1992 A-E Bonds were issued for the purpose of (1) refunding approximately 94% of the Series 1989 Bonds, (2) funding capital costs of certain turnpike projects, and (3) paying certain costs of issuance. The principal amount of the Series 1989 Bonds advance refunded and considered defeased was $526,440,000, and the liability for these bonds was removed from the Statements of Net Assets. Approximately 94% of the Series 1989 Bonds were defeased through an escrow deposit with a trustee. Bank One Trust Company serves as the Escrow Trustee on these defeased Series 1989 Bonds. Defeased Series 1989 Bonds outstanding at December 31, 2002 and 2001 were $29,000,000.

(c) On September 25, 1992, the Authority issued $22,786,862 of Series 1992 First Senior Revenue Bonds and $28,017,387 of Series 1992 Second Senior Revenue Bonds, dated October 1, 1992, both with interest rates ranging from 3.15% to 5.3%. These Series 1992 F and G Bonds were issued to (1) provide funds, combined with other available funds of the Authority, to refund the Authority's Oklahoma Turnpike System Series 1991 First and Second Senior Revenue Bonds, (2) pay costs of issuance, and (3) make a deposit to the Second Senior Bond Reserve Account established under the Trust Agreement. The principal amount of the Series 1991 Bonds advance refunded and paid in full in October 1992 was $49,350,000, and the liability was removed from the Statements of Net Assets. The Series 1991 Bonds were originally issued to provide funds for the completion of the Portland Interchange on the John Kilpatrick Turnpike and certain other improvements to the Oklahoma Turnpike System.

The Series 1992 F and G Bonds were issued pursuant to the Trust Agreement, including supplements thereto. The Series 1992 F and G Bonds not refunded are Capital Appreciation Bonds. They were issued in the initial amounts and accrete at interest rates set forth in the Official Statement dated October 1, 1992 to arrive at the Compound Accreted Value at maturity of $8,465,000. The accumulated accretion to date of $3,156,242 is reflected in the balance of long-term debt outstanding on the Authority's Statements of Net Assets as an increase to the principal payable on these bonds. The accretion in 2002 and 2001 is $393,507 and $372,083, respectively. These Series 1992 F and G Capital Appreciation Bonds mature on January 1 in each of the years 2004-2008, with interest payable on January 1 and July 1 of each year.

The Series 2002A and 2002B Refunding Second Senior Revenue Bonds were issued pursuant to the prevailing Trust Agreement, including supplements thereto, with Bank of Oklahoma, N.A. as Trustee. Interest is payable seminannually on January 1 and July 1 of each year, commencing January 1, 2003. The Series 2002 Bonds interest rates range from 4.0% to 5.5%. The principal amount of the bonds refunded and paid in full on July 1, 2002 was $577,810,000, and the liability was removed from the Statements of Net Assets.

On May 12, 1998, the Authority issued $350,000,000 of Series 1998A Second Senior Revenue Bonds, dated May 1, 1998. The Series 1998A Bonds were issued to provide funds which, when combined with other available funds of the Authority, will be used for the purpose of (1) funding a portion of the capital costs of improvements to extend the H.E. Bailey Turnpike, the Creek Turnpike, and the John Kilpatrick Turnpike and for right-of-way acquisition for the Muskogee Turnpike, (2) funding the capitalized interest account for the Series 1998A Bonds, and (3) paying the costs of issuance. The interest rates on the Series 1998A Bonds range from 4.125% to 6.0%.

On July 14, 1998, the Authority issued $337,010,000 of Series 1998B Second Senior Revenue Bonds, dated July 1, 1998. The Series 1998B Bonds were issued to provide funds which, when combined with other available funds of the Authority, will be used for the purpose of (1) funding a portion of the capital costs of improvements to extend the H.E. Bailey Turnpike, the Creek Turnpike, and the John Kilpatrick Turnpike and for right-of-way acquisition for the Muskogee Turnpike, (2) funding the capitalized interest account for the Series 1998B Bonds, and (3) paying the costs of issuance. The interest rates on the Series 1998B Bonds range from 5.0% to 5.5%.

The Series 1998A and 1998B Second Senior Revenue Bonds were issued pursuant to the prevailing Trust Agreement, including supplements thereto, with Bank of Oklahoma, N.A. as Trustee.

The following schedules summarize the revenue bonds outstanding as of December 31, 2002 and 2001.

2002	Date of Issuance	Beginning Balance	Additions	Retired	Ending Balance	Due Within One Year
Series 1989	02/01/1989	$ 30,205,000	$ -	$ (30,205,000)	$ -	$ -
Series 1992A-E	05/01/1992	528,305,000	-	(528,305,000)	-	-
Series 1992F-G	10/01/1992	41,761,988	393,507	(34,920,000)	7,235,495	-
Series 1998A	05/01/1998	350,000,000	-	-	350,000,000	3,520,000
Series 1998B	07/01/1998	337,010,000	-	-	337,010,000	-
Series 2002A-B	05/01/2002	-	569,640,000	-	569,640,000	6,635,000
Total		$1,287,281,988	$ 570,033,507	$ (593,430,000)	$ 1,263,885,495	$ 10,155,000

2001	Date of Issuance	Beginning Balance	Additions	Retired	Ending Balance	Due Within One Year
Series 1989	02/01/1989	$ 30,510,000	$ -	$ (305,000)	$ 30,205,000	$ 325,000
Series 1992A-E	05/01/1992	541,080,000	-	(12,775,000)	528,305,000	13,500,000
Series 1992F-G	10/01/1992	43,099,905	372,083	(1,710,000)	41,761,988	1,795,000
Series 1998A	05/01/1998	350,000,000	-	-	350,000,000	-
Series 1998B	07/01/1998	337,010,000	-	-	337,010,000	-
Total		$1,301,699,905	$ 372,083	$ (14,790,000)	$ 1,287,281,988	$ 15,620,000

Additions to long-term debt on the Series 1992 F and G Bonds in 2002 and 2001 represent the current accretion on the capital appreciation bonds.

The revenue bond debt service requirements below are prepared as of December 31, 2002:

Year Ended January 1	Total Revenue Bonds	
	Principal	Interest
2003	$ 10,155,000	$ 52,502,315
2004	25,904,890	63,625,841
2005	26,918,455	62,597,439
2006	27,612,245	61,427,374
2007	38,063,340	60,260,004
2008-2012	222,001,565	269,602,452
2013-2017	288,645,000	204,946,982
2018-2022	368,230,000	122,085,163
2023-2027	208,190,000	44,996,236
2028	48,165,000	2,469,150
	$ 1,263,885,495	$ 944,512,956

The Interest and Sinking and Reserve Accounts required by the Trust Agreement have been established with the Trustee. The balances as of December 31, 2002 and 2001 were:

	2002	2001
First Senior Bond Reserve Account	$ 1,626,475	$ 33,950,182
Second Senior Bond Reserve Account	53,968,078	4,699,454
Subordinate Bond Reserve Account	-	15,273,146

The Series 1989 and 1992 Subordinate Bonds were refunded during 2002, and therefore a subordinate bond reserve account is no longer required. The Series 1998A and 1998B Second Senior Revenue Bond Reserve account requirements are satisfied by surety bonds from Financial Guaranty Insurance Company in the amount of approximately $26,000,000 and $25,000,000, respectively.

As required by section 501(d) of the Trust Agreement, net revenue, as defined below (which is greater than net income in accordance with GAAP), of approximately $144,654,000 and $135,226,000 for 2002 and 2001, respectively (1) together with the motor fuel excise taxes apportioned to the Authority of approximately $32,805,000 and $31,596,000 for 2002 and 2001, respectively (see Note 10), exceeded 120% of the amount of the debt service requirements on all senior indebtedness outstanding for the year, and (2) exceeded the sum of 105% of the debt service requirements on all bonds and parity indebtedness then outstanding and 100% of amounts required to be deposited into the Reserve Maintenance Fund and to make up deficiencies in the various bond reserve accounts. Net revenue is defined by the Trust Agreement as the excess of tolls and other revenues of the Oklahoma Turnpike System deposited to the credit of the Revenue Fund over the current expenses of the Revenue Fund for the year. Said revenue shall not include payments or transfers from the Reserve Maintenance Fund or General Fund nor any payments received pursuant to the issuance of any subsequent parity indebtedness. Depreciation is not considered in current expenses for purposes of calculating net revenue. The Trust Agreement contains certain other bond covenants that the Authority is aware of and monitors for compliance throughout the year. The Authority has complied with all bond covenants throughout 2002 and 2001.

The Series 2002 A and B Bonds refunded $577,810,000 in revenue bonds from the remaining Series 1989 Bonds, Series 1992 A-E Bonds, and portions of the Series 1992 F and G Bonds. Although the refunding resulted in the recognition of a $32,513,172 deferred debit, the Authority decreased its aggregate debt service payments by approximately $51,000,000 from 2003 to 2022. The net present value savings was approximately $33,000,000. As of December 31, 2002 and 2001, the Statements of Net Assets reflect a net deferred debit of approximately $35,262,000 and $7,407,000, respectively, as a component of debt resulting from accounting losses or gains from the defeasance of debt. The Statements of Revenues, Expenses and Changes in Net Assets reflect the amortization of this deferral as a component of interest expense of approximately $4,659,000 and $2,110,000, respectively.

Note 8. Deferred Compensation Plan

The State of Oklahoma offers to its own employees, state agency employees and other duly constituted authority or instrumentality employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457 and Chapter 45 of Title 74 of the Oklahoma Statutes. The Oklahoma State Employees Deferred Compensation Plan (the Plan), also known as SoonerSave, is a voluntary plan that allows participants to defer a portion of their salary into the Plan. Participation allows a person to shelter the portion of their salary that they defer from current federal and state income tax. Taxes on the interest or investment gains on this money, while in the Plan, are also deferred. The deferred compensation is not available to employees until termination, retirement, death or approved unforeseeable emergency.

Under SoonerSave, the untaxed deferred amounts are invested as directed by the participant among various Plan investment options. Effective January 1, 1998, a Trust and Trust Fund covering the Plan assets was established pursuant to federal legislation enacted in 1996, requiring public employers to establish such trusts for plans meeting the requirements of Section 457 of the Internal Revenue Code. Under terms of the Trust, the corpus or income of the Trust Fund may be used only for the exclusive benefit of the Plan participants and their beneficiaries. Further information may be obtained from the Oklahoma State Employees Deferred Compensation Plan audited financial statements for the year ended June 30, 2002. The Authority believes that it has no liabilities in respect to the State's plan.

Note 9. Employee Retirement Plan

Plan Description

The Authority contributes to the Oklahoma Public Employees Retirement Plan (the Plan), a cost sharing multiple-employer public employee retirement system administered by the Oklahoma Public Employees Retirement System (the System). The Plan provides retirement, disability and death benefits to Plan members and beneficiaries. The benefit provisions are established and may be amended by the Legislature of the State of Oklahoma. Title 74 of the Oklahoma Statutes, Sections 901-943, as amended, assigns the authority for management and operation of the Plan to the Board of Trustees of the System. The System issues a publicly

available annual financial report that includes financial statements and required supplementary information for the Plan. That annual report may be obtained by writing to the System, 6601 N. Broadway Extension, Suite 129, Oklahoma City, Oklahoma 73116 or by calling 1-800-733-9008.

Funding Policy

Plan members and the Authority are required to contribute at a rate set by statute. The contribution requirements of Plan members and the Authority are established and may be amended by the Legislature of the State of Oklahoma. The contribution rate for the Authority and Plan members is as follows:

	State Employees		
Fiscal Year Ended June 30	First $25,000	Above $25,000	The Authority
2001	3.0%	3.5%	10.0%
2002	3.0%	3.5%	10.0%
Thereafter	3.0%	3.5%	10.0%

The Authority's contributions to the Plan for the years ended December 31, 2002, 2001 and 2000 were approximately $1,479,000, $1,374,000 and $1,274,000, respectively, and equal to their required contributions for each year.

Note 10. Advances From the Motor Fuel Tax Trust Fund

By virtue of the "Enabling Act" of 1971 and amendments thereto, a portion of the motor fuel excise taxes collected on fuels consumed on the turnpikes is made available to the Authority from the Oklahoma Tax Commission. Prior to July 1, 1992, this amount was not to exceed $3,000,000 during a fiscal year of the State. In 1992, Title 69, §1730 was amended to remove the cap and allow the Authority to receive the full amount collected in accordance with the original formula. This amendment stated the motor fuel taxes due to the Authority would be apportioned to the Authority on the first day of each calendar month. Beginning July 1, 1992, the amount of cash and investments on deposit was frozen as security for the Series 1989 Revenue Bonds. All motor fuel taxes apportioned to the Authority shall be available to fund debt service and reserves to the extent monies are not otherwise available to the Authority for such purpose. If such motor fuel excise taxes apportioned to the Authority are not necessary in such month, the motor fuel excise taxes shall be paid over to the Oklahoma Department of Transportation (ODOT). During 2002 and 2001, the Authority received, and subsequently remitted to ODOT $32,804,885 and $31,595,788, respectively, of motor fuel excise taxes.

The amounts frozen at July 1, 1992 (fair value of $34,610,664 and $32,708,892 at December 31, 2002 and 2001, respectively) are invested in interest-bearing obligations and with the interest received thereon ($1,563,632 and $1,595,402 during the years ended December 31, 2002 and 2001, respectively) are used to eliminate deficiencies, if any, in available monies to meet revenue bond interest and principal requirements. No deficiencies existed in 2002 or 2001.

Prior to the issuance of the Series 1989 Revenue Bonds, the Authority had not received apportionments from the Oklahoma Tax Commission since 1979 because the maximum amount that could be retained by the Authority in accordance with the Enabling Act was deposited with the prior Trustee.

When all Senior and Subordinate Revenue Bonds, together with interest thereon, have been paid, the Authority will be required to pay all amounts that have been received from the Oklahoma Tax Commission and any interest earned on amounts invested to ODOT. The accumulated liability to ODOT as of December 31, 2002 and 2001 is $41,733,509 and $40,129,728, respectively, and the annual activity is shown below:

	Beginning Balance	Additions	Retired	Ending Balance
2002	$ 40,129,728	$1,603,781	$ -	$ 41,733,509
2001	47,960,927	1,435,952	(9,267,151)	40,129,728

Additions to the liability represent the interest earned on amounts invested, net of gains and losses on the sale of investments. No amounts are due within one year. Retired debt represents the Authority's completion of its obligation relating to a cooperative construction agreement between the Authority and ODOT.

Note 11. Disaggregation of Receivable and Payable Balances

Receivables are primarily comprised of current intergovernmental receivables, representing 45% and 72% at December 31, 2002 and 2001, respectively. Remaining current receivables are comprised of 14% and 10% customer receivables and 41% and 18% other receivables at December 31, 2002 and 2001, respectively.

Payable balances are comprised of 50% and 87% current payables to contractors and vendors and 50% and 13% current intergovernmental payables at December 31, 2002 and 2001, respectively.

Note 12. Commitments and Contingent Liabilities

At December 31, 2002 and 2001, the Authority had commitments outstanding relating to equipment orders and supplies of approximately $766,000 and $11,509,000, respectively. At December 31, 2002 and 2001, the Authority had commitments outstanding relating to construction and maintenance contracts of approximately $33,000,000 and $37,000,000, respectively.

In 1993, the Authority adopted a resolution providing that certain funds on deposit in the General Fund shall be set aside, to the extent that funds are available as determined by the Authority by April 30 of each year. These funds shall be used for the purpose of rehabilitating, reconstructing, replacing, renovating, improving or enhancing the Oklahoma Turnpike System. As of December 31, 2002, the cumulative balance set aside by the Authority is $16,560.

The Authority is a defendant in various litigation. Although the outcome of these matters are not presently determinable, in the opinion of the Authority's management, the resolution of these matters will not have a material adverse effect on the financial condition of the Authority.

Independent Auditors' Report On Compliance And On Internal Control Over Financial Reporting Based On An Audit Of Financial Statements Performed In Accordance With *Government Auditing Standards*

Members of the Oklahoma Transportation Authority:

We have audited the financial statements of the Oklahoma Transportation Authority (the Authority), as of and for the year ended December 31, 2002, and have issued our report thereon dated March 20, 2003. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the Authority's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations and contracts, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Authority's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended solely for the information and use of the audit committee, management, and Authority members and is not intended to be and should not be used by anyone other than these specified parties.
