

THE BOARD'S BULLETIN

A Biannual Publication for Licensees of the Oklahoma State Board of
Licensure for Professional Engineers and Land Surveyors

January - June, 2011 Volume 25 Issue 71

In order to safeguard life, health and property, and to promote the public welfare, the practice of engineering and ... land surveying are declared to be subject to regulation in the public interest.

MESSAGE FROM THE CHAIR

Robert C. Zahl, PE, Board Chair

WHY SPECIAL INSPECTIONS ARE NOT SO SPECIAL

The Oklahoma Board was notified recently about a disturbing issue that appears to have been a long-standing problem regarding *Special Inspections*.

What Are Special Inspections:

The 2009 International Building Code defines a *Special Inspection* as “*Inspection as herein required of the materials, installation, fabrication, erection or placement of components and connections requiring special expertise to ensure compliance with approved construction documents and references standards.*”. These inspections are designated as such for the simple reason that they are intended to be of a quality that is over-and-above what would be considered a typical periodic inspection performed by a PE as part of the Construction Phase services. Periodic inspections are typically provided by the PE as part of a standard contract for a building design project, but certain portions of the construction are designated by the building codes as requiring these *Special Inspections*.

Some specific examples of *Special Inspections*, as related to structural items, are:

1. Inspections of concrete reinforcing placement prior to pouring concrete.

2. Inspections of structural steel welded connections.
3. Inspections of masonry reinforcing placement prior to grouting.

Problematic Issues Regarding Special Inspections:

Since the Board recently became aware of this serious issue and has not addressed this topic before, it is now trying to develop a good description and definition of the problems that exist. With input from various resources, the Board identified two specific issues, as follows:

Issue #1 - Accuracy of the Special Inspections: *Special Inspections* are being performed routinely by technicians in the field who have neither the education nor the experience to qualify as being capable of doing these inspections properly. Further, many of the PE's in responsible charge of the employees who are doing these inspections are signing and sealing these *Special Inspection Reports* without adequate knowledge as to whether the facts in the reports bear any resemblance to the conditions which actually exist in the field.

Section 1704.1 of the 2009 International Building Code states: “...*The special inspector shall be a qualified*

satisfaction of the building official, for the inspection of the particular type of construction or operation requiring special inspection The registered design professional in responsible charge and engineers of record involved in the design of the project are permitted to act as the approved agency and their personnel are permitted to act as the special inspector for the work designed by them, provided those personnel meet the qualification requirements of this section to the satisfaction of the building official. ...”

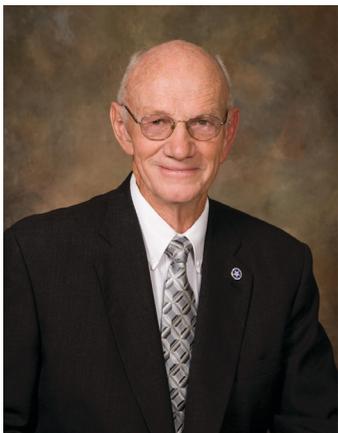

Issue #2 – Conflict of Interest:

Special Inspections are being performed routinely by entities **hired by the contractor, not by the owner** or the registered design professional in responsible charge, acting as the owner's agent. Not only does this violate

Board Member News

ELECTION OF OFFICERS 2011-2012

Roy W. Entz, PE, PLS - Board Chair

Roy W. Entz, P.E., P.L.S. was recently elected to serve as Board Chair beginning July 1, 2011. Serving his third term as surveyor member of the Board, Mr. Entz is retired from Entz Engineering & Associates, Inc., a Civil Engineering/Surveying firm in Muskogee.

Glen W. Smith, P.E., P.L.S. was elected to serve as Board Vice Chair beginning July 1, 2011. Mr. Smith was appointed to the Board in 2007.

William A. McVey Jr. was elected to serve as Board Secretary beginning July 1, 2011. Mr. McVey is serving his second term as a Board Member.

SACK ELECTED NCEES SOUTHERN ZONE VICE PRESIDENT

Theodore "Ted" Sack, P.L.S.

Ted Sack, P.L.S. was elected to serve the NCEES Southern Zone as its Vice President from August 2011 to July 2013. Elections were held in Austin, Texas at the NCEES Southern Zone Meeting in April. Mr. Sack has been a member of the Oklahoma Board since 1997. He has served as the NCEES Southern Zone Assistant Vice President for the past 2 years. Mr. Sack was also the recipient of the 2010 NCEES Distinguished Service Award at the August 2010 NCEES Annual Meeting held in Denver, Colorado.

ARE YOU IN COMPLIANCE WITH THE OKLAHOMA TAX COMMISSION?

By law, the Board cannot renew a professional license if the licensee is in non-compliance with the Oklahoma Tax Commission. At times it is a lengthy process to get into compliance, so please make sure you allow yourself ample time prior to your renewal date to complete the process.

Practicing engineering or land surveying with an expired license, even if it is expired due to non-compliance with the tax commission, is a violation of state law and will be prosecuted by this Board.

2011 Exam Administration Dates

<u>Examination</u>	<u>Type</u>	<u>Exam Date</u>	<u>Application Deadline</u>
PE Examinations: Agricultural, Chemical, Civil, Control Systems, Electrical & Computer, Environmental, Fire Protection, Industrial, Mechanical, Metallurgical, Mining and Mineral Processing, Nuclear, Petroleum, 16 hour Structural	NCEES	October 28, 2011	June 1, 2011 (August 1, 2011 deadline for Summer Graduates)
PE Examinations: Architectural, Chemical, Civil, Electrical, Environmental, Mechanical 16 hour Structural	NCEES	April 13, 2012	December 1, 2011 (Jan. 3, 2012 deadline for Fall Graduates)
Principles of Land Surveying (PS – 6 hr)	NCEES	October 28, 2011	June 1, 2011 (August 1, 2011 deadline for Summer Graduates)
	NCEES	April 13, 2012	December 1, 2011 (Jan. 3, 2012 deadline for Fall Graduates)
Fundamentals of Engineering (FE) & Fundamentals of Surveying (FS)	NCEES	October 29, 2011	August 1, 2011
	NCEES	April 14, 2012	February 1, 2012

Please share this information with anyone who may be interested in taking examinations. All application forms are online at www.pels.ok.gov

			Shawn Collins
			Taylor Denniston

Fundamentals of Surveying Exam:

PLS EDUCATION REQUIREMENTS - REMINDER

This Information Is Critical to the future PLS Licensees of the Board. Because of its importance, it is being reprinted from the last edition of the Board's Bulletin. Please help future Professional Land Surveyors by sharing this information.

As we have been publicizing since our statute changed in 2005, education requirements for licensure as a PLS are changing. Since Long Established Practice (LEP) will no longer be a path to licensure after July 1, 2014, the Board is encouraging those on the path to licensure, regardless of where they are right now, to be familiar with the requirements. Furthermore, the Board strongly encourages potential licensees to begin pursuing a 2-year Surveying degree or at least taking the Core Curriculum now!

Even those who will qualify for the exams by LEP are encouraged to start taking land surveying classes now. For the most part, the surveying exams are based on knowledge obtained in college level land surveying class work. Taking college classes, particularly those included in the Core Curriculum, will improve the applicant's chance of success on the examinations and improve the chance of success in their surveying practice. Furthermore, a LEP applicant who does not complete all of the examinations prior to the April 2014 deadline will be that much closer to qualifying for licensure by an education pathway.

Critical Facts About Licensure as a PLS Under Long Established Practice (LEP)

- ✓ April 2014 is the last date to take the PS and/or OLS if admitted under LEP
- ✓ If the applicant has not met all of the requirements for licensure by July 2014, he/she will have to reapply with proof of sufficient education to qualify.
- ✓ If you plan to qualify for PLS licensure under LEP, apply as soon as you get 9 years of experience so you can begin the exam process!

THE PATH TO COMPLIANCE

Corner Perpetuation and Filing Act Do's and Don'ts

Since 1978 Oklahoma has required that land surveyors file a Certified Corner Record (CCR) for every public land corner used as control in a land survey unless it is substantially the same as one already on file. Besides the Licensing Act, this is the single most important law governing the practice of land surveying in Oklahoma. Perpetuation and protection of public land corners is essential to the orderly development of our communities and more importantly, the permanence of our land boundaries.

While over 150,000 CCR's have been prepared and filed with the State Department of Libraries, it has come to the attention of the Board that there are still many CCR's filed that either lack necessary information or contain incorrect information. The following brief list of **Do's and Don'ts** is intended as a reminder of what is required to be in compliance with the law, so that surveyors following in your footsteps may confidently use your CCR.

Bruce Pitts, PLS
Director of Enforcement

Do thoroughly complete the Monument Description section of the CCR form. **Do not** simply state "Found 5/8" iron pin" or "Set Mag Nail" without listing supporting evidence found; and, if applicable the method used for restoring a lost corner.

Monument location must be supported by evidence whether it's other monuments, fences or improvements found, record evidence like a recorded subdivision plats or even parol evidence. You are responsible for searching for and then listing enough evidence so that any surveyor following in your footsteps can be assured that your corner location has been properly researched and can be relied upon. Anything less than thorough investigation may expose the surveyor to unwarranted liability and possible result in disciplinary action by this Board.

Do contact the previous surveyor if you disagree with the corner position shown on their CCR.

This is particularly important if the CCR was filed long ago and many surveyors have used that CCR as control in boundary surveys. Disagreement over the location of public land corners is likely to lead to boundary disputes between neighbors.

Do not be guilty of creating boundary confusion in a neighborhood without taking the professional courtesy of contacting the other surveyor involved.

Remember, contacting the other surveyor and making an effort to resolve the disagreement is a requirement of the state minimum standards.

(Continued on Page 11)

DISCIPLINARY ACTIVITY OF THE BOARD

January 20-21, 2011

In the Matter of Timber Systems Engineering, P.L.L.C., CA 6072 and Lawrence P. Mangindin, P.E. 24773; Case No. 2010-074; Through Consent; For offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, Timber Systems Engineering, P.L.L.C. is hereby found **Guilty**, assessed an administrative fine of \$750.00 and is hereby **Reprimanded**. For offering and performing engineering services in the State of Oklahoma without a Certificate of Licensure to do so, Lawrence P. Mangindin is found **Guilty**, assessed an administrative fine of \$750.00 and is hereby **Reprimanded**.

In the Matter of Dodd and Grayson Consulting Engineers and John Franklin Germ, P.E. 14306; Case No. 2010-078; Through Consent; For offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, Dodd and Grayson Consulting Engineers is hereby found **Guilty**, assessed an administrative fine of \$500.00 and is hereby ordered to **Cease and Desist** from offering and/or performing engineering services in the state of Oklahoma until such time as they are licensed to do so. **Through Agreement;** John Franklin Germ has surrendered his Certificate of Licensure in lieu of administrative action.

In the Matter of Micha P. Duffy, P.E. 20621; Case No. 2010-080; Through Consent; For committing the practice of fraud or deceit in obtaining or attempting to obtain or renew his Certificate of Licensure, Micha P. Duffy is found **Guilty**, assessed an administrative fine of \$1,300.00, is ordered to successfully complete the Intermediate Studies in Engineering Ethics course offered by the National Institute of Engineering Ethics at Texas Tech University and is hereby **Reprimanded**.

In the Matter of Taliaferro & Browne, Inc., CA 6091 and Hagos E. Andebrhan, P.E., Temporary Permit No. 762; Case No. 2010-082; Through Consent; For offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, Taliaferro & Browne, Inc. is hereby found **Guilty**, assessed an administrative fine of \$1,000.00 and is hereby **Reprimanded**. For offering and performing engineering services in the State of Oklahoma without a Certificate of Licensure to do so, Hagos E. Andebrhan is found **Guilty**, assessed an administrative fine of \$1,000.00 and is hereby **Reprimanded**.

March 3, 2011

In the Matter of Great Plains Surveying, Drafting and Design, L.L.C., CA 4931 and Randall Campo, P.L.S., 1462; Case No. 2010-088; Through Final Order; For violation of the Corner Perpetuation and Filing Act, for failing to achieve the Oklahoma Minimum Standards for the Practice of Land Surveying, gross negligence, gross incompetence and misconduct, Randall Campo is hereby found **Guilty** and his Certificate of Licensure is hereby **Revoked immediately**. For issuing surveys prepared by Randall Campo that were in violation of the Corner Perpetuation and Filing Act, for failing to achieve the Oklahoma Minimum Standards for the Practice of Land Surveying, gross negligence, gross incompetence and misconduct, Great Plains Surveying, Drafting and Design, L.L.C. is hereby found **Guilty** and the Certificate of Authorization is hereby **Revoked**.

April 14-15, 2011

In the Matter of SEACON Engineering Associates, Inc., CA 3259 and Sam C. Wilkerson, III; Case No. 2010-102; Through Consent; For offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, SEACON Engineering Associates, Inc. is hereby found **Guilty**, assessed an administrative fine of \$850.00 and is hereby **Reprimanded**. For offering and performing engineering services in the State of Oklahoma without a Certificate of Licensure to do so, Sam C. Wilkerson is found **Guilty**, assessed an administrative fine of \$850.00 and is hereby ordered to **Cease and Desist** from offering and/or performing engineering services in the state of Oklahoma until such time as he is licensed to do so.

DISCIPLINARY ACTIVITY (CONT.)

In the Matter of Haltom Engineering, L.L.C., CA 6155 and Jeffery W. Haltom, P.E. 24983; Case No. 2010-103; Through Consent; For offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, Haltom Engineering, L.L.C. is hereby found **Guilty**, assessed an administrative fine of \$850.00 and is hereby **Reprimanded**. For offering and performing engineering services in the State of Oklahoma without a Certificate of Licensure to do so, Jeffery W. Haltom is found **Guilty**, assessed an administrative fine of \$850.00 and is hereby **Reprimanded**.

In the Matter of Ramsey and Associates and John Christopher Ramsey; Case No. 2010-104; Through Consent; For offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, Ramsey and Associates is hereby found **Guilty**, assessed an administrative fine of \$2,000.00 and is hereby ordered to **Cease and Desist** from offering and/or performing engineering in the State of Oklahoma. For offering and performing engineering services in the State of Oklahoma without a Certificate of Licensure to do so, by preparing a structural inspection report on numerous apartment complexes in the State of Oklahoma, and by placing an engineer's seal and signature on the reports without the knowledge of the professional engineer, John Christopher Ramsey is hereby found **Guilty**, assessed an administrative fine of \$2,000.00 and is hereby ordered to **Cease and Desist** from offering and/or performing engineering in the State of Oklahoma.

In the Matter of GPD Associates and David B. Granger, P.E. 20959; Case No. 2010-105; Through Consent; For offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, GPD Associates are hereby found **Guilty**, assessed an administrative fine of \$1,000.00 and is hereby **Reprimanded**. For performing engineering services outside his area of expertise and competence, David B. Granger is hereby found **Guilty**, assessed an administrative fine of \$1,000.00 and is hereby **Reprimanded**.

June 13-14, 2011

In the Matter of Lou Portillo and Associates, PLLC and Lou Portillo; Case No. 2010-107; Through Consent; For offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, Lou Portillo and Associates, PLLC is hereby found **Guilty**, assessed an administrative fine of \$850.00 and is hereby ordered to **Cease and Desist** from offering and/or performing engineering in the State of Oklahoma. For offering and performing engineering services in the State of Oklahoma without a Certificate of Licensure to do so, Lou Portillo is hereby found **Guilty**, assessed an administrative fine of \$850.00 and is hereby ordered to **Cease and Desist** from offering and/or performing engineering in the State of Oklahoma.

In the Matter of Husker Surveying, L.L.C., CA 5076 and Jayme Malone, P.L.S. 1544; Case No. 2011-001; Through Agreement; Jayme Malone has surrendered his Certificate of Licensure No. 1544 to the Board in lieu of administrative action that provides he will be permanently barred from reissuance of his Certificate of Licensure as a professional land surveyor in the State of Oklahoma.

In the Matter of Jamnu H. Tahiliani & Associates, Inc., CA 6185 and Michael Joseph Rose, P.E. 16763; Case No. 2011-011; Through Consent; For offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, Lou Portillo and Associates, PLLC is hereby found **Guilty** and assessed an administrative fine of \$850.00. For aiding and assisting Jamnu H. Tahiliani & Associates, Inc. in offering and performing engineering services in the State of Oklahoma without a Certificate of Authorization to do so, Michael Joseph Rose is hereby found **Guilty** and assessed an administrative fine of \$850.00.

In the Matter of Gary Lynn Bratcher, P.E. 16416; Case No. 2011-018; Through Agreement; Gary Lynn Bratcher has surrendered his Certificate of Licensure No. 16416 to the Board in lieu of administrative action that provides he will be permanently barred from reissuance of his Certificate of Licensure as a professional engineer in the State of

MORTGAGE INSPECTION REPORTS

Position Statement Adopted by the Board July 2011

Effective immediately, land surveyors must take care to only show measurements on a mortgage inspection report which are true representations of the conditions that were found. Anyone showing measurements or other representations on a mortgage inspection report that are not true representations of the conditions that were found at the time of the inspection will be in violation of the Minimum Standards for the Practice of Land Surveying.

Minimum Standards for the Practice of Land Surveying O.A.C. 245:15-13-2 (e) - (existing language – no amendments proposed) MORTGAGE INSPECTION REPORT

'This Mortgage Inspection Report was prepared for ... (individual or firm).... It is not a land or boundary survey plat, and it is not to be relied upon for the establishment of fence, building or other future improvement lines. The accompanying sketch is a true representation of the conditions that were found at the time of the inspection, and the linear and angular values shown on the sketch, if any, are based on record or deed information and have not been verified unless noted.'

Any further statements shall be made only after proper research, investigation and boundary analysis is conducted per 245:15-13-2(a) through (d).

Renderings prepared by Designers Pickard, Chilton Architects, Inc. The Devon Tower will be a 3-sided glass tower featuring diamond-shaped faces at the top, a 100' by 100' glass rotunda just beside it and a six-story "podium" stretching to west to Hudson. The "podium" will have auditoriums, classrooms and offices. Reflecting pools will sit at the base of the tower, and a transparent wall will allow passersby to see into the tower lobby. The project has been scaled back to 50 stories since its original design. Photo by Studio AMD.

Corner Perpetuation and Filing Act

Do's and Don'ts

By Bruce Pitts, PLS (continued from page 7)

Do know the surveying definition of existing, obliterated and lost corner classifications so that you **do not** mistakenly identify an ODOT brass cap or a 3/8" iron pin as an existing corner, or classify a corner as obliterated and then state that proportional measurement was used to set the corner.

Do use the correct proportional measurement procedure if the corner is classified as lost.

This requires special attention on the exterior of a township, on the northern or western tiers of sections within a township, in country surveyed by the 3-mile method or where the original surveyors employed special procedures.

Do file a CCR for all public land survey corners used as control in performing proportional measurement.

Do file a new CCR if the corner or its accessories (references) are substantially different from a CCR currently on file.

For example, if the existing CCR calls for a 1/2" iron pin, and you find a Mag nail, you are required to prepare a CCR for the Mag nail. Yes, the land surveyor who set the Mag nail should have filed a CCR and could be disciplined by the Board for not doing so; but since they didn't file, you are now responsible and you must file a CCR.

Do make it clear on your CCR that your corner is in the same position as the one shown on the previous CCR.

Do carefully describe the monument you set or find.

There is a difference between a 1/2" and a 5/8" iron pin and failure to note that could lead to confusion and wasted time.

Do consider the history of and the method used to establish a corner location with an existing CCR before you establish a new corner location in close proximity to the existing CCR.

*Multiple monuments in close proximity **do not** protect the public and they make the surveying profession look inadequate.*

Do show all monuments in the immediate vicinity on your CCR with horizontal ties and carefully describe why your position is better and, therefore necessary.

This is not a complete list of **Do's and Don'ts** because there are many other common sense examples. Using references that are in the close proximity of the corner, providing an accurate sketch with topographical features and even digging up the monument instead of just relying on the signals from the magnetic locator, are all examples of care that must be taken to ensure that our public land survey corners are perpetuated.

Establishing and re-establishing the positions of public land survey corners by painstakingly discovering an accurate and defensible trail of evidence and then publishing the results for others to follow was the purpose of this law when it was enacted 33 years ago. Protection of the public demands that surveyors go to great lengths to correctly perform this most important land surveying duty.

Why Special Inspections Are Not So Special - by Robert C. Zahl, PE (Continued From Page 2)

the 2009 IBC, but it provides an ethical dilemma for the registered design professional when they are hired by the contractor. For example, if the Special Inspector finds too many problems with the contractor's work, this could lead to this inspector not being hired to do any further inspections, even if there are more to be done.

Section 1704.1 of the 2009 International Building Code states:

"Where application is made for construction as described in this section the owner or the registered design professional in responsible charge acting as the owner's agent shall employ one or more approved agencies to perform inspections during construction on the types of work listed under Section 1704."

Issues Are Also Potential Violation of Oklahoma Board Administrative Rules:

- 1. OAC 245:15-9-4(a)** Licensees shall practice only in the areas of their competence and shall undertake assignments only when qualified by education, examination, or experience in the specific technical fields of engineering or land surveying involved...
- 2. OAC 245:15-9-4(b)** Licensees shall not affix their signatures, date of signature, or seals to any plans or documents dealing with subject matter in which they lack competence, nor to any plan or document not prepared under their direct control and personal supervision.
- 3. OAC 245:15-23-7(a)(2)** Acts which evidence a disregard or indifference toward the rules or statutes governing the practice of engineering ... regulations, codes, ordinances and recognized standards including but not limited to those regulating the design of facilities to be constructed.

Special Inspection Issues Addressed In NY State:

Because of problems identified regarding special inspections in other states, there are now many engineering firms whose services are composed not only of design work but of doing *Special Inspections* for both their projects and for projects that have been designed by others. New York State now requires that special inspector companies become certified and certify that their staff meets the requirements to perform special inspections. Those certified engineering firms or individuals must be hired by the **owners**. This is the way that *Special Inspections* were intended to be done, and this is what we should be striving to make happen.

The Board Needs Your Assistance: who are involved in any portion of this type of work is for you to send suggestions to this Board as to how you think this problem can be resolved in the interest of public protection. We are looking for all perspectives to ensure we are addressing the problem from all viewpoints. Now that we know about the problem and have chosen to address it, we need your input. To submit your input you may email khart@pels.ok.gov, or snail mail:

Oklahoma State Board of Licensure for
Professional Engineers and Land Surveyors
201 NE 27th St., Room 120
Oklahoma City, OK 73105
ATTN: Kathy Hart

Special Inspections - To Be Continued:

The Board will continue to work towards a solution until we find one that will result in getting a proper special inspection performed without putting the firms or the individuals who are doing these inspections into situations where they are violating the licensing laws that are intended to protect the public.

CONTINUING EDUCATION FOR PROFESSIONAL ENGINEERS AND LAND SURVEYORS - UPDATE

**George T. Gibson, PE
Chair - PE Continuing
Education Committee
2002 - 2011**

Thank you to George Gibson, PE (pictured above) and Ted Sack, PLS (pictured page 3) for Chairing the Continuing Education Committees since their inception in 2002 and 1994 respectively.

Beginning July 1, 2011, Bill McVey, PE will serve as Chair of the PE Continuing Education Committee and Glen Smith, PE, PLS will serve as Chair of the PLS Continuing Education Committee.

When reporting professional development hours (PDH's) for PE's and PLS' at the time of your renewal, whether renewing online or by mail, you will no longer be required to submit a detailed log form of your credits earned. However, for audit purposes you must keep an up-to-date log form in your files, along with copies of all proof of attendance.

Annually, approximately 250 PE's and 50 PLS' are audited for compliance with the continuing education requirement. Typically, 95% of those audited have no problem providing the Continuing Education Committee with the appropriate proof of attendance for these professional development hours. Unfortunately there is always a very small percentage that either do not comply with the request for the audited material or cannot provide proof of their professional development hours. Occasionally the Continuing Education Committees have encountered outright fraud in the reporting of the professional development hours and these individuals have had formal disciplinary actions filed against them by the Board.

Also, after reviewing a request by the Uniform Building Code Commission, it was determined by the Board that professional development hours could be earned for writing technical standards.

Thanks to the Continuing Education Audit Committee Members for both Engineering and Surveying. Your assistance is vital to conducting a professional audit of the continuing education requirements for PE's and PLS'.

PE Continuing Education Committee Members:

Julie Guy, PE; Marcia Bates, PE; Alan Bates, PE; John Veenstra, PE; Chuck Darr, PE; Glen Smith, PE; Bill McVey, PE; Jim Kersey, PE; Eric Strong, PE; Monte Tull, PE; Tommy Lear, PE; Shawn Thompson, PE; Bill Dickerson, PE; Bruce Pitts, PLS

PS Continuing Education Committee Members:

Aaron Morris, PLS; Gary Brickley, PLS; Gordon Johnson, PLS; Ron Leifheit, PLS; Kelly Schmidt, PLS; Roy Entz, PE, PLS; Glen Smith, PE, PLS; Bruce Pitts, PLS;

License Expirations

EXPIRATION/REVOCATION - Licenses may be revoked by the Board for non-payment of renewal fees. Licensees will be notified of revocation by certified mail. Typically this notification is mailed 10 days following expiration.

RENEWALS - Each license issued by the Board expires on the last day of the month in which renewal fees are due, and becomes invalid on that date unless paid. One notice of the renewal is sent by first class mail to the address of record in the board files. This in effect provides notice two months prior to revocation.

REINSTATEMENT - Former licensees whose certificates have expired and were revoked for failure to pay renewal fees and desire to reinstate shall make application for reinstatement within 180 days after expiration and pay the prescribed renewal fee and penalty. After 180 days, a new application will be required, which shall be considered specifically by the Board, both from the standpoint of competency and of character.

Renewal Notice: Online License Renewal Information

Watch your mail for your new renewal notification postcard, which will explain how to use the online license renewal system.

Additional explanation is shown below.

- 1 Log on to www.pelsrenewal.ok.gov and select the Continue button. In the fields provided, please enter the following:
- 2 License Number
- 3 Designation
- 4 Password
- 5 Select the 'Login' button to begin your online renewal.
- 6 Once online renewal and payment are complete, be sure to print your receipt as confirmation of your online renewal.

OKLAHOMA STATE BOARD OF LICENSURE
for Professional Engineers & Land Surveyors

YOUR LICENSE IS DUE FOR RENEWAL.
See details on the back of this card.
Renew or Retire your license online at www.pelsrenewal.ok.gov

TO LOGIN TO YOUR ACCOUNT

- 1 Enter your license number as listed on the back of this card.
- 2 Designate your type of license to be renewed.
- 3 Enter your previously created password or click on "Forgot Password".

To renew by mail or questions regarding renewals or retired status, contact tparr@pels.ok.gov

For renewal questions or to renew by mail, please contact
tparr@pels.ok.gov
